

Conceptual Spaces

The Geometry of Thought

Peter Gärdenfors

A Bradford Book

The MIT Press
Cambridge, Massachusetts
London, England

Contents

| | |
|--|----|
| Preface | ix |
| Chapter 1 | |
| Dimensions | 1 |
| 1.1 <i>The Problem of Modeling Representations</i> | 1 |
| 1.2 <i>Conceptual Spaces as a Framework for Representations</i> | 4 |
| 1.3 <i>Quality Dimensions</i> | 6 |
| 1.4 <i>Phenomenal and Scientific Interpretations of Dimensions</i> | 8 |
| 1.5 <i>Three Sensory Examples: Color, Sound, and Taste</i> | 9 |
| 1.6 <i>Some Mathematical Notions</i> | 15 |
| 1.7 <i>How Dimensions Are Identified</i> | 21 |
| 1.8 <i>Integral and Separable Dimensions</i> | 24 |
| 1.9 <i>On the Origins of Quality Dimensions</i> | 26 |
| 1.10 <i>Conclusion</i> | 30 |
| Chapter 2 | |
| Symbolic, Conceptual, and Subconceptual Representations | 33 |
| 2.1 <i>An Analogy for the Three Kinds of Representations</i> | 33 |
| 2.2 <i>Symbolic Representations</i> | 35 |
| 2.3 <i>Subconceptual Representations</i> | 40 |
| 2.4 <i>Conceptual Representations</i> | 43 |
| 2.5 <i>Connections to Neuroscience</i> | 48 |
| 2.6 <i>Comparisons</i> | 53 |
| 2.7 <i>The Jungle of Representations</i> | 56 |
| Chapter 3 | |
| Properties | 59 |
| 3.1 <i>Program</i> | 59 |
| 3.2 <i>Properties in Intensional Semantics</i> | 60 |
| 3.3 <i>Criticism of the Traditional View of Properties</i> | 62 |
| 3.4 <i>Criteria for Natural Regions of Conceptual Spaces</i> | 66 |
| 3.5 <i>Natural Properties</i> | 70 |
| 3.6 <i>Reconsidering the Problems</i> | 77 |

| | | |
|------------------|--|-----|
| 3.7 | <i>The Relativism of Conceptual Spaces</i> | 80 |
| 3.8 | <i>Connections to Prototype Theory</i> | 84 |
| 3.9 | <i>Voronoi Tessellations of a Space</i> | 87 |
| 3.10 | <i>Higher Level Properties and Relations</i> | 92 |
| 3.11 | <i>Conclusion</i> | 99 |
| Chapter 4 | | |
| | Concepts | 101 |
| 4.1 | <i>Concepts versus Properties</i> | 101 |
| 4.2 | <i>Modeling Concepts</i> | 102 |
| 4.3 | <i>The Role of Similarity in Concept Formation</i> | 109 |
| 4.4 | <i>Combining Concepts</i> | 114 |
| 4.5 | <i>Learning Concepts</i> | 122 |
| 4.6 | <i>Nonmonotonic Aspects of Concepts</i> | 126 |
| 4.7 | <i>Concept Dynamics and Nonmonotonic Reasoning</i> | 131 |
| 4.8 | <i>Objects as Special Kinds of Concepts</i> | 134 |
| 4.9 | <i>Four Geometric Categorization Models</i> | 136 |
| 4.10 | <i>The Shell Space</i> | 142 |
| 4.11 | <i>Experiments</i> | 145 |
| Chapter 5 | | |
| | Semantics | 151 |
| 5.1 | <i>What Is a Semantics?</i> | 151 |
| 5.2 | <i>Six Tenets of Cognitive Semantics</i> | 159 |
| 5.3 | <i>Analyses of Some Aspects of Lexical Semantics</i> | 167 |
| 5.4 | <i>An Analysis of Metaphors</i> | 176 |
| 5.5 | <i>The Learnability Question</i> | 187 |
| 5.6 | <i>Communicating Referents</i> | 189 |
| 5.7 | <i>Can Meanings Be in the Head?</i> | 196 |
| 5.8 | <i>Conclusion: The Semantic Program</i> | 201 |
| Chapter 6 | | |
| | Induction | 203 |
| 6.1 | <i>Three Levels of Induction</i> | 203 |
| 6.2 | <i>The Symbolic Level</i> | 205 |
| 6.3 | <i>The Conceptual Level</i> | 211 |
| 6.4 | <i>The Role of Theoretical Concepts</i> | 215 |
| 6.5 | <i>The Subconceptual Level</i> | 219 |
| 6.6 | <i>Correlations between Domains</i> | 225 |
| 6.7 | <i>Conclusion: What Is Induction?</i> | 230 |
| Chapter 7 | | |
| | Computational Aspects | 233 |
| 7.1 | <i>Computational Strategies on the Three Levels</i> | 233 |
| 7.2 | <i>Conceptual Spaces as Emergent Systems</i> | 244 |

| | |
|---|-----|
| 7.3 <i>Smolensky's Treatment of Connectionism</i> | 247 |
| 7.4 <i>Not All Computation Is Done by Turing Machines</i> | 249 |
| 7.5 <i>A System for Object Recognition</i> | 251 |
| 7.6 <i>Conclusion</i> | 253 |
| | |
| Chapter 8 | |
| In Chase of Space | 255 |
| 8.1 <i>What Has Been Achieved?</i> | 255 |
| 8.2 <i>Connections among Levels</i> | 257 |
| 8.3 <i>Conclusion: The Need for a New Methodology</i> | 259 |
| | |
