

The Dynamics of Japanese Organizations

Edited by Frank-Jürgen Richter

Contents

<i>List of figures</i>	vii
<i>List of tables</i>	viii
<i>Contributors</i>	ix
Introduction and background	1
Part I Philosophy of organizational dynamism	
1 Self-renewal of corporate organizations: Equilibrium, self-sustaining, and self-renewing models <i>Tsuyoshi Numagami, Toshizumi Ohta and Ikujiro Nonaka</i>	9
2 Self-organization in Informatics <i>Haruo Hata and Charles Adamson</i>	32
3 Epistemological types and creative environment <i>Magoroh Maruyama</i>	59
4 What can we learn from biological networks? <i>Vera Calenbuhr</i>	72
Part II Organizational behaviour and the management of the firm	
5 Japanese management as a set of cybernetic principles of managing human systems <i>Tetsunori Koizumi</i>	95
6 Group decision making in the 'self-organization' perspective <i>Haruo Takagi</i>	102
7 Progressive and degenerative problemshifts of organizations: Organizational evolutionism based on critical rationalism <i>Kenshu Kikuzawa</i>	116

vi *Contents*

- 8 Neural network simulation of QC circle activities
*Shigekazu Ishihara, Keiko Ishihara, Mitsuo Nagamachi
and Alfredo Pinochet* 132

Part III Symbiotic interaction with the environment

- 9 Population ecology versus network dynamics: From
evolution to co-evolution
Frank-Jürgen Richter and Yoshiya Teramoto 151
- 10 Comparative management systems: Trade-offs-free concept
Milan Zeleny 167
- 11 Communicating through on-line database systems:
A strategy for monitoring corporate environments
Nobuyuki Chikudate 178
- 12 Autonomous anticipative management and its
evolutionary process
Kenji Tanaka 189
