

Robert Penner

# Topology and K-Theory

Lectures by Daniel Quillen

With Contribution by Mikhail Kapranov, Kavli Institute  
for the Physics and Mathematics of the Universe,  
Kashiwa, Chiba, Japan

 Springer

# Contents

|           |   |            |
|-----------|---|------------|
| <b>1</b>  | <b>Group Extensions and Cohomology</b> . . . . .                | <b>1</b>   |
| <b>2</b>  | <b>Categories and Their Nerves</b> . . . . .                    | <b>5</b>   |
| <b>3</b>  | <b>Simplicial Objects</b> . . . . .                             | <b>9</b>   |
| <b>4</b>  | <b>Normalization and Conical Contractibility</b> . . . . .      | <b>15</b>  |
| <b>5</b>  | <b>Effaceable <math>\delta</math>-Functors</b> . . . . .        | <b>21</b>  |
| <b>6</b>  | <b>(Co)homology of Cyclic Groups</b> . . . . .                  | <b>25</b>  |
| <b>7</b>  | <b>An Application to the Schur–Zassenhaus Theorem</b> . . . . . | <b>33</b>  |
| <b>8</b>  | <b>The Yoneda Lemma</b> . . . . .                               | <b>39</b>  |
| <b>9</b>  | <b>Kan Formulae</b> . . . . .                                   | <b>45</b>  |
| <b>10</b> | <b>Abelian and Additive Categories</b> . . . . .                | <b>51</b>  |
| <b>11</b> | <b>Diagram Chasing in Abelian Categories</b> . . . . .          | <b>57</b>  |
| <b>12</b> | <b>Fibered and Cofibered Categories</b> . . . . .               | <b>61</b>  |
| <b>13</b> | <b>Examples of Fibered Categories</b> . . . . .                 | <b>67</b>  |
| <b>14</b> | <b>Projective Resolutions</b> . . . . .                         | <b>71</b>  |
| <b>15</b> | <b>Analogues of Homotopy Liftings</b> . . . . .                 | <b>75</b>  |
| <b>16</b> | <b>The Mapping Cylinder and Mapping Cone</b> . . . . .          | <b>83</b>  |
| <b>17</b> | <b>Derived Categories</b> . . . . .                             | <b>89</b>  |
| <b>18</b> | <b>The First Homotopy Property</b> . . . . .                    | <b>95</b>  |
| <b>19</b> | <b>Group Completions and Grothendieck Groups</b> . . . . .      | <b>101</b> |
| <b>20</b> | <b>Devissage and Resolution Theorems</b> . . . . .              | <b>105</b> |

|           |   |     |
