<b>Preface</b>	<b>xiii</b>
<b>1 IoT-Based Battery Management System for Hybrid Electric Vehicle</b>	<b>1</b>
<i>P. Sivaraman and C. Sharmeela</i>	
1.1 Introduction	1
1.2 Battery Configurations	3
1.3 Types of Batteries for HEV and EV	5
1.4 Functional Blocks of BMS	6
1.4.1 Components of BMS System	7
1.5 IoT-Based Battery Monitoring System	11
References	14
<b>2 A Noble Control Approach for Brushless Direct Current Motor Drive Using Artificial Intelligence for Optimum Operation of the Electric Vehicle</b>	<b>17</b>
<i>Upama Das, Pabitra Kumar Biswas and Chiranjit Sain</i>	
2.1 Introduction	18
2.2 Introduction of Electric Vehicle	19
2.2.1 Historical Background of Electric Vehicle	19
2.2.2 Advantages of Electric Vehicle	20
2.2.2.1 Environmental	20
2.2.2.2 Mechanical	20
2.2.2.3 Energy Efficiency	20
2.2.2.4 Cost of Charging Electric Vehicles	21
2.2.2.5 The Grid Stabilization	21
2.2.2.6 Range	21
2.2.2.7 Heating of EVs	22
2.2.3 Artificial Intelligence	22
2.2.4 Basics of Artificial Intelligence	23
2.2.5 Advantages of Artificial Intelligence in Electric Vehicle	24

2.3	Brushless DC Motor	24
2.4	Mathematical Representation Brushless DC Motor	25
2.5	Closed-Loop Model of BLDC Motor Drive	30
2.5.1	P-I Controller & I-P Controller	31
2.6	PID Controller	32
2.7	Fuzzy Control	33
2.8	Auto-Tuning Type Fuzzy PID Controller	34
2.9	Genetic Algorithm	35
2.10	Artificial Neural Network-Based Controller	36
2.11	BLDC Motor Speed Controller With ANN-Based PID Controller	37
2.11.1	PID Controller-Based on Neuro Action	38
2.11.2	ANN-Based on PID Controller	38
2.12	Analysis of Different Speed Controllers	39
2.13	Conclusion	41
	References	42
<b>3</b>	<b>Optimization Techniques Used in Active Magnetic Bearing System for Electric Vehicles</b>	<b>49</b>
	<i>Suraj Gupta, Pabitra Kumar Biswas, Sukanta Debnath and Jonathan Laldingliana</i>	
3.1	Introduction	50
3.2	Basic Components of an Active Magnetic Bearing (AMB)	54
3.2.1	Electromagnet Actuator	54
3.2.2	Rotor	54
3.2.3	Controller	55
3.2.3.1	Position Controller	56
3.2.3.2	Current Controller	56
3.2.4	Sensors	56
3.2.4.1	Position Sensor	56
3.2.4.2	Current Sensor	57
3.2.5	Power Amplifier	57
3.3	Active Magnetic Bearing in Electric Vehicles System	58
3.4	Control Strategies of Active Magnetic Bearing for Electric Vehicles System	59
3.4.1	Fuzzy Logic Controller (FLC)	59
3.4.1.1	Designing of Fuzzy Logic Controller (FLC) Using MATLAB	60
3.4.2	Artificial Neural Network (ANN)	63
3.4.2.1	Artificial Neural Network Using MATLAB	63
3.4.3	Particle Swarm Optimization (PSO)	67

3.4.4	Particle Swarm Optimization (PSO) Algorithm	68
3.4.4.1	Implementation of Particle Swarm Optimization for Electric Vehicles System	70
3.5	Conclusion	71
	References	72
<b>4</b>	<b>Small-Signal Modelling Analysis of Three-Phase Power Converters for EV Applications</b>	<b>77</b>
	<i>Mohamed G. Hussien, Sanjeevikumar Padmanaban, Abd El-Wahab Hassan and Jens Bo Holm-Nielsen</i>	
4.1	Introduction	77
4.2	Overall System Modelling	79
4.2.1	PMSM Dynamic Model	79
4.2.2	VSI-Fed SPMSM Mathematical Model	80
4.3	Mathematical Analysis and Derivation of the Small-Signal Model	86
4.3.1	The Small-Signal Model of the System	86
4.3.2	Small-Signal Model Transfer Functions	87
4.3.3	Bode Diagram Verification	96
4.4	Conclusion	100
	References	100
<b>5</b>	<b>Energy Management of Hybrid Energy Storage System in PHEV With Various Driving Mode</b>	<b>103</b>
	<i>S. Arun Mozhi, S. Charles Raja, M. Saravanan and J. Jeslin Drusila Nesamalar</i>	
5.1	Introduction	104
5.1.1	Architecture of PHEV	104
5.1.2	Energy Storage System	105
5.2	Problem Description and Formulation	106
5.2.1	Problem Description	106
5.2.2	Objective	106
5.2.3	Problem Formulation	106
5.3	Modeling of HESS	107
5.4	Results and Discussion	108
5.4.1	Case 1: Gradual Acceleration of Vehicle	108
5.4.2	Case 2: Gradual Deceleration of Vehicle	109
5.4.3	Case 3: Unsystematic Acceleration and Deceleration of Vehicle	110
5.5	Conclusion	111
	References	112

<b>6</b>	<b>Reliability Approach for the Power Semiconductor Devices in EV Applications</b>	<b>115</b>
	<i>Krishnachaitanya, D., Chitra, A. and Biswas, S.S.</i>	
6.1	Introduction	115
6.2	Conventional Methods for Prediction of Reliability for Power Converters	116
6.3	Calculation Process of the Electronic Component	118
6.4	Reliability Prediction for MOSFETs	119
6.5	Example: Reliability Prediction for Power Semiconductor Device	121
6.6	Example: Reliability Prediction for Resistor	122
6.7	Conclusions	123
	References	123
<b>7</b>	<b>Modeling, Simulation and Analysis of Drive Cycles for PMSM-Based HEV With Optimal Battery Type</b>	<b>125</b>
	<i>Chitra, A., Srivastava, Shivam, Gupta, Anish, Sinha, Rishu, Biswas, S.S. and Vanishree, J.</i>	
7.1	Introduction	126
7.2	Modeling of Hybrid Electric Vehicle	127
7.2.1	Architectures Available for HEV	128
7.3	Series—Parallel Hybrid Architecture	129
7.4	Analysis With Different Drive Cycles	129
7.4.1	Acceleration Drive Cycle	130
7.4.1.1	For 30% State of Charge	130
7.4.1.2	For 60% State of Charge	131
7.4.1.3	For 90% State of Charge	131
7.5	Cruising Drive Cycle	132
7.6	Deceleration Drive Cycle	132
7.6.1	For 30% State of Charge	134
7.6.2	For 60% State of Charge	136
7.6.3	For 90% State of Charge	137
7.7	Analysis of Battery Types	139
7.8	Conclusion	140
	References	141
<b>8</b>	<b>Modified Firefly-Based Maximum Power Point Tracking Algorithm for PV Systems Under Partial Shading Conditions</b>	<b>143</b>
	<i>Chitra, A., Yogitha, G., Karthik Sivaramakrishnan, Razia Sultana, W. and Sanjeevikumar, P.</i>	
8.1	Introduction	143
8.2	System Block Diagram Specifications	146

8.3	Photovoltaic System Modeling	148
8.4	Boost Converter Design	150
8.5	Incremental Conductance Algorithm	152
8.6	Under Partial Shading Conditions	153
8.7	Firefly Algorithm	154
8.8	Implementation Procedure	156
8.9	Modified Firefly Logic	157
8.10	Results and Discussions	159
8.11	Conclusion	162
	References	162
<b>9</b>	<b>Induction Motor Control Schemes for Hybrid Electric Vehicles/Electric Vehicles</b>	<b>165</b>
	<i>Sarin, M. V., Chitra, A., Sanjeevikumar, P. and Venkadesan, A.</i>	
9.1	Introduction	166
9.2	Control Schemes of IM	167
	9.2.1 Scalar Control	167
9.3	Vector Control	168
9.4	Modeling of Induction Machine	169
9.5	Controller Design	174
9.6	Simulations and Results	175
9.7	Conclusions	176
	References	177
<b>10</b>	<b>Intelligent Hybrid Battery Management System for Electric Vehicle</b>	<b>179</b>
	<i>Rajalakshmi, M. and Razia Sultana, W.</i>	
10.1	Introduction	179
10.2	Energy Storage System (ESS)	181
	10.2.1 Lithium-Ion Batteries	183
	10.2.1.1 Lithium Battery Challenges	183
	10.2.2 Lithium-Ion Cell Modeling	184
	10.2.3 Nickel-Metal Hydride Batteries	186
	10.2.4 Lead-Acid Batteries	187
	10.2.5 Ultracapacitors (UC)	187
	10.2.5.1 Ultracapacitor Equivalent Circuit	187
	10.2.6 Other Battery Technologies	189
10.3	Battery Management System	190
	10.3.1 Need for BMS	191
	10.3.2 BMS Components	192
	10.3.3 BMS Architecture/Topology	193

10.3.4	SOC/SOH Determination	193
10.3.5	Cell Balancing Algorithms	197
10.3.6	Data Communication	197
10.3.7	The Logic and Safety Control	198
10.3.7.1	Power Up/Down Control	198
10.3.7.2	Charging and Discharging Control	199
10.4	Intelligent Battery Management System	199
10.4.1	Rule-Based Control	201
10.4.2	Optimization-Based Control	201
10.4.3	AI-Based Control	202
10.4.4	Traffic (Look Ahead Method)-Based Control	203
10.5	Conclusion	203
	References	203
<b>11</b>	<b>A Comprehensive Study on Various Topologies of Permanent Magnet Motor Drives for Electric Vehicles Application</b>	<b>207</b>
	<i>Chiranjit Sain, Atanu Banerjee and Pabitra Kumar Biswas</i>	
11.1	Introduction	208
11.2	Proposed Design Considerations of PMSM for Electric Vehicle	209
11.3	Impact of Digital Controllers	211
11.3.1	DSP-Based Digital Controller	212
11.3.2	FPGA-Based Digital Controller	212
11.4	Electric Vehicles Smart Infrastructure	212
11.5	Conclusion	214
	References	215
<b>12</b>	<b>A New Approach for Flux Computation Using Intelligent Technique for Direct Flux Oriented Control of Asynchronous Motor</b>	<b>219</b>
	<i>A. Venkadesan, K. Sedhuraman, S. Himavathi and A. Chitra</i>	
12.1	Introduction	220
12.2	Direct Field-Oriented Control of IM Drive	221
12.3	Conventional Flux Estimator	222
12.4	Rotor Flux Estimator Using CFBP-NN	223
12.5	Comparison of Proposed CFBP-NN With Existing CFBP-NN for Flux Estimation	224
12.6	Performance Study of Proposed CFBP-NN Using MATLAB/SIMULINK	225
12.7	Practical Implementation Aspects of CFBP-NN-Based Flux Estimator	229

12.8	Conclusion	231
	References	231
<b>13</b>	<b>A Review on Isolated DC–DC Converters Used in Renewable Power Generation Applications</b>	<b>233</b>
	<i>Ingilala Jagadeesh and V. Indragandhi</i>	
13.1	Introduction	233
13.2	Isolated DC–DC Converter for Electric Vehicle Applications	234
13.3	Three-Phase DC–DC Converter	238
13.4	Conclusion	238
	References	239
<b>14</b>	<b>Basics of Vector Control of Asynchronous Induction Motor and Introduction to Fuzzy Controller</b>	<b>241</b>
	<i>S.S. Biswas</i>	
14.1	Introduction	241
14.2	Dynamics of Separately Excited DC Machine	243
14.3	Clarke and Park Transforms	244
14.4	Model Explanation	251
14.5	Motor Parameters	252
14.6	PI Regulators Tuning	254
14.7	Future Scope to Include Fuzzy Control in Place of PI Controller	256
14.8	Conclusion	257
	References	258
