

# Contents at a Glance

<b>Introduction .....</b>	<b>1</b>
<b>Book I: Getting Started with Java Basics.....</b>	<b>5</b>
Chapter 1: Welcome to Java .....	7
Chapter 2: Installing and Using Java Tools.....	19
Chapter 3: Working with TextPad.....	33
<b>Book II: Programming Basics.....</b>	<b>41</b>
Chapter 1: Java Programming Basics .....	43
Chapter 2: Working with Variables and Data Types .....	61
Chapter 3: Working with Numbers and Expressions .....	95
Chapter 4: Making Choices .....	123
Chapter 5: Going Around in Circles (Or, Using Loops).....	143
Chapter 6: Pulling a Switcheroo.....	169
Chapter 7: Adding Some Methods to Your Madness .....	181
Chapter 8: Handling Exceptions.....	201
<b>Book III: Object-Oriented Programming.....</b>	<b>221</b>
Chapter 1: Understanding Object-Oriented Programming.....	223
Chapter 2: Making Your Own Classes .....	235
Chapter 3: Working with Statics .....	253
Chapter 4: Using Subclasses and Inheritance .....	261
Chapter 5: Using Abstract Classes and Interfaces.....	281
Chapter 6: Using the Object and Class Classes.....	297
Chapter 7: Using Inner Classes, Anonymous Classes, and Lambda Expressions .....	321
Chapter 8: Packaging and Documenting Your Classes .....	333
<b>Book IV: Strings, Arrays, and Collections.....</b>	<b>349</b>
Chapter 1: Working with Strings .....	351
Chapter 2: Using Arrays .....	369
Chapter 3: Using the ArrayList Class.....	395
Chapter 4: Using the LinkedList Class.....	409
Chapter 5: Creating Generic Collection Classes .....	421
Chapter 6: Using Bulk Data Operations with Collections .....	435

<b>Book V: Programming Techniques .....</b>	<b>445</b>
Chapter 1: Programming Threads .....	447
Chapter 2: Network Programming .....	475
Chapter 3: Using Regular Expressions .....	499
Chapter 4: Using Recursion .....	515
Chapter 5: Working with Dates and Times .....	529
Chapter 6: Using BigDecimal .....	549
<b>Book VI: Swing .....</b>	<b>567</b>
Chapter 1: Swinging into Swing .....	569
Chapter 2: Handling Events .....	583
Chapter 3: Getting Input from the User .....	601
Chapter 4: Choosing from a List .....	629
Chapter 5: Using Layout Managers .....	651
<b>Book VII: Web Programming .....</b>	<b>673</b>
Chapter 1: Creating Applets .....	675
Chapter 2: Creating Servlets .....	683
Chapter 3: Using JavaServer Pages .....	703
<b>Book VIII: Files and Databases .....</b>	<b>717</b>
Chapter 1: Working with Files .....	719
Chapter 2: Working with File Streams .....	741
Chapter 3: Database for \$100, Please .....	767
Chapter 4: Using JDBC to Connect to a Database .....	783
Chapter 5: Working with XML .....	797
<b>Book IX: Fun and Games .....</b>	<b>815</b>
Chapter 1: Fun with Fonts and Colors .....	817
Chapter 2: Drawing Shapes .....	831
Chapter 3: Using Images and Sound .....	855
Chapter 4: Animation and Game Programming .....	869
<b>Bonus Chapters at <a href="http://www.dummies.com/extras/javaaio">www.dummies.com/extras/javaaio</a></b>	
Bonus Chapter 1: Using Eclipse	
Bonus Chapter 2: Twiddling Your Bits	
Bonus Chapter 3: Making Menus	
Bonus Chapter 4: Using JavaBeans	
<b>Index .....</b>	<b>887</b>

# Table of Contents

## ***Introduction* ..... 1**

About this Book .....	1
Foolish Assumptions .....	2
Icons Used in This Book .....	3
Beyond the Book .....	4
Where to Go from Here .....	4

## ***Book 1: Getting Started with Java Basics*..... 5**

### **Chapter 1: Welcome to Java ..... 7**

What Is Java, and Why Is It So Great? .....	7
Platform independence .....	8
Object orientation.....	9
The Java API .....	10
The Internet .....	10
Java versus Other Languages .....	11
Important Features of the Java Language .....	12
Type checking .....	13
Automatic memory management.....	14
Exception handling .....	15
On the Downside: Java's Weaknesses.....	16
Java Version Insanity .....	17
What's in a Name? .....	18

### **Chapter 2: Installing and Using Java Tools..... 19**

Downloading and Installing the Java Development Kit .....	20
Downloading the JDK .....	20
Installing the JDK .....	21
Perusing the JDK folders.....	21
Setting the path.....	22
Using Java's Command-Line Tools .....	23
Compiling a program.....	24
Compiling more than one file .....	25
Using Java compiler options .....	26
Running a Java program .....	27
Using the javap command .....	29
Using Java Documentation .....	30
Java SE API Docs .....	30
Java Language Specification .....	31

<b>Chapter 3: Working with TextPad</b> .....	<b>33</b>
Downloading and Installing TextPad .....	33
Editing Source Files .....	34
Compiling a Program.....	36
Running a Java Program .....	38
Running an Applet .....	39
 <b>Book II: Programming Basics</b> .....	 <b>41</b>
<b>Chapter 1: Java Programming Basics</b> .....	<b>43</b>
Looking at the Infamous Hello, World! Program.....	43
Dealing with Keywords .....	46
Working with Statements .....	48
Types of statements .....	49
White space .....	49
Working with Blocks .....	51
Creating Identifiers .....	52
Crafting Comments.....	53
End-of-line comments.....	53
Traditional comments.....	53
JavaDoc comments.....	54
Introducing Object-Oriented Programming .....	54
Understanding classes and objects.....	54
Understanding static methods.....	55
Creating an object from a class.....	56
Viewing a program that uses an object.....	56
So what's the difference? .....	58
Importing Java API Classes .....	60
 <b>Chapter 2: Working with Variables and Data Types</b> .....	 <b>61</b>
Declaring Variables .....	61
Declaring two or more variables in one statement .....	62
Declaring class variables .....	63
Declaring instance variables .....	64
Declaring local variables.....	64
Initializing Variables .....	66
Initializing variables with assignment statements.....	66
Initializing variables with initializers.....	67
Using Final Variables (Constants) .....	67
Working with Primitive Data Types .....	68
Integer types.....	70
Floating-point types.....	71
The char type .....	73

The Boolean type.....	74
Wrapper classes.....	74
Using Reference Types.....	75
Working with Strings.....	77
Declaring and initializing strings .....	77
Combining strings.....	78
Converting primitives to strings.....	78
Converting strings to primitives.....	79
Converting and Casting Numeric Data.....	80
Automatic conversions .....	80
Type casting .....	81
Thinking Inside the Box.....	82
Understanding Scope.....	83
Shadowing Variables.....	84
Printing Data with System.out .....	86
Using standard input and output streams.....	86
Using System.out and System.err .....	88
Getting Input with the Scanner Class.....	88
Importing the Scanner class.....	89
Declaring and creating a Scanner object .....	90
Getting input.....	90
Getting Input with the JOptionPane Class.....	92
Using enum to Create Your Own Data Types .....	94

**Chapter 3: Working with Numbers and Expressions. . . . .95**

Working with Arithmetic Operators .....	95
Dividing Integers.....	98
Combining Operators.....	99
Using the Unary Plus and Minus Operators.....	100
Using Increment and Decrement Operators .....	101
Using the Assignment Operator .....	103
Using Compound Assignment Operators .....	105
Using the Math Class.....	106
Using constants of the Math class .....	107
Working with mathematical functions .....	108
Creating random numbers.....	110
Rounding functions.....	113
Formatting Numbers .....	115
Recognizing Weird Things about Java Math.....	118
Integer overflow .....	118
Floating-point weirdness.....	119
Division by zero .....	119

<b>Chapter 4: Making Choices</b> .....	<b>123</b>
Using Simple Boolean Expressions .....	123
Using if Statements .....	125
Simple if statements .....	126
if-else statements .....	128
Nested if statements .....	129
else-if statements .....	133
Using Mr. Spock's Favorite Operators (Logical Ones, of Course).....	135
Using the ! operator .....	135
Using the & and && operators .....	136
Using the   and    operators .....	137
Using the ^ operator .....	138
Combining logical operators .....	139
Using the Conditional Operator.....	141
Comparing Strings .....	141
<b>Chapter 5: Going Around in Circles (Or, Using Loops)</b> .....	<b>143</b>
Using Your Basic while Loop .....	144
The while statement .....	144
A counting loop.....	144
Breaking Out of a Loop .....	145
Looping Forever.....	146
Letting the user decide when to quit .....	147
Letting the user decide in another way .....	148
Using the continue Statement.....	149
Running do-while Loops .....	150
Validating Input from the User .....	152
Using the Famous for Loop .....	154
Understanding the formal format of the for loop .....	155
Scoping out the counter variable .....	157
Counting even numbers .....	158
Counting backward.....	158
Using for loops without bodies .....	160
Ganging up your expressions .....	161
Omitting expressions .....	162
Breaking and continuing your for loops .....	163
Nesting Your Loops.....	164
A simple nested for loop.....	164
A guessing game.....	165
<b>Chapter 6: Pulling a Switcheroo</b> .....	<b>169</b>
Battling else-if Monstrosities.....	169
Viewing an example else-if program.....	169
Creating a better version of the example program .....	170

Using the switch Statement..... 172  
 Viewing a boring switch example, complete with flowchart..... 173  
 Putting if statements inside switch statements ..... 175  
 Creating Character Cases ..... 176  
 Intentionally Leaving Out a Break Statement..... 177  
 Switching with Strings..... 180

**Chapter 7: Adding Some Methods to Your Madness ..... 181**

The Joy of Methods ..... 181  
 The Basics of Making Methods ..... 182  
 An example ..... 183  
 Another example..... 184  
 Methods That Return Values ..... 186  
 Declaring the method's return type ..... 187  
 Using the return statement to return the value..... 187  
 Using a method that returns a type..... 188  
 You gotta have a proper return statement..... 188  
 Trying another version of the guessing-game program..... 190  
 Methods That Take Parameters ..... 193  
 Declaring parameters ..... 194  
 Scoping out parameters ..... 195  
 Understanding pass-by-value ..... 196  
 Trying yet another version of the guessing-game program ..... 196

**Chapter 8: Handling Exceptions ..... 201**

Understanding Exceptions ..... 201  
 Witnessing an exception ..... 203  
 Finding the culprit ..... 204  
 Catching Exceptions..... 204  
 A simple example..... 205  
 Another example..... 206  
 Handling Exceptions with a Preemptive Strike..... 208  
 Catching All Exceptions at Once ..... 209  
 Displaying the Exception Message ..... 210  
 Using a finally Block ..... 211  
 Handling Checked Exceptions ..... 213  
 Viewing the catch-or-throw compiler error ..... 213  
 Catching FileNotFoundException ..... 214  
 Throwing the FileNotFoundException ..... 215  
 Throwing an exception from main ..... 216  
 Swallowing exceptions ..... 216  
 Throwing Your Own Exceptions..... 217  
 Catching Multiple Exceptions ..... 218

**Book III: Object-Oriented Programming.....221****Chapter 1: Understanding Object-Oriented Programming.....223**

What Is Object-Oriented Programming? .....	223
Understanding Objects .....	224
Objects have identity .....	224
Objects have type .....	225
Objects have state .....	226
Objects have behavior .....	227
Understanding the Life Cycle of an Object.....	228
Working with Related Classes.....	228
Inheritance.....	229
Interfaces .....	229
Designing a Program with Objects .....	230
Diagramming Classes with UML .....	231
Drawing classes.....	232
Drawing arrows .....	234

**Chapter 2: Making Your Own Classes . . . . .235**

Declaring a Class.....	235
Picking class names.....	236
Knowing what goes in the class body .....	236
Seeing where classes go.....	237
Working with Members.....	239
Understanding fields .....	239
Understanding methods .....	239
Understanding visibility.....	240
Using Getters and Setters .....	240
Overloading Methods.....	242
Creating Constructors.....	244
Creating basic constructors .....	244
Creating default constructors .....	245
Calling other constructors.....	247
Finding More Uses for the this Keyword .....	248
Using Initializers .....	250

**Chapter 3: Working with Statics . . . . .253**

Understanding Static Fields and Methods .....	253
Working with Static Fields .....	254
Using Static Methods .....	255
Counting Instances .....	256
Preventing Instances .....	259
Using Static Initializers .....	259

<b>Chapter 4: Using Subclasses and Inheritance</b> .....	<b>261</b>
Introducing Inheritance .....	261
Motorcycles, trains, and automobiles.....	262
Game play .....	263
A businesslike example.....	263
Inheritance hierarchies .....	264
Creating Subclasses .....	264
Overriding Methods .....	266
Protecting Your Members .....	267
Using this and super in Your Subclasses .....	268
Understanding Inheritance and Constructors .....	269
Using final .....	270
Final methods.....	270
Final classes.....	271
Casting Up and Down.....	271
Determining an Object's Type .....	273
Poly What?.....	274
Creating Custom Exceptions.....	277
Tracing the Throwable hierarchy.....	277
Creating an exception class.....	278
Throwing a custom exception.....	279
 <b>Chapter 5: Using Abstract Classes and Interfaces</b> .....	 <b>281</b>
Using Abstract Classes .....	281
Using Interfaces .....	284
Creating a basic interface .....	284
Implementing an interface .....	285
Using an interface as a type.....	286
More Things You Can Do with Interfaces .....	287
Adding fields to an interface.....	287
Extending interfaces .....	288
Using interfaces for callbacks .....	289
Using Default Methods.....	292
 <b>Chapter 6: Using the Object and Class Classes</b> .....	 <b>297</b>
The Mother of All Classes: Object .....	297
Every object is an Object.....	297
Object as a type .....	298
Methods of the Object class.....	299
Primitives aren't objects.....	300
The toString Method .....	301
Using toString.....	301
Overriding toString.....	302
The equals Method.....	303
Using equals .....	304
Overriding the equals method .....	305

The clone Method.....	309
Implementing the clone method.....	309
Using clone to create a shallow copy.....	312
Creating deep copies.....	313
The Class Class .....	318
<b>Chapter 7: Using Inner Classes, Anonymous Classes, and Lambda Expressions .....</b>	<b>321</b>
Declaring Inner Classes.....	321
Understanding inner classes .....	322
Viewing an example.....	322
Using Static Inner Classes.....	325
Using Anonymous Inner Classes .....	326
Creating an anonymous class.....	327
Creating a program with an anonymous class.....	328
Using Lambda Expressions .....	330
<b>Chapter 8: Packaging and Documenting Your Classes .....</b>	<b>333</b>
Working with Packages.....	333
Importing classes and packages .....	333
Creating your own packages .....	335
An example .....	336
Putting Your Classes in a JAR File.....	338
jar command-line options.....	338
Archiving a package .....	339
Adding a jar to your classpath.....	340
Running a program directly from an archive.....	341
Using JavaDoc to Document Your Classes.....	342
Adding JavaDoc comments .....	342
Using the javadoc command .....	345
Viewing JavaDoc pages .....	346
<b><i>Book IV: Strings, Arrays, and Collections .....</i></b>	<b><i>349</i></b>
<b>Chapter 1: Working with Strings .....</b>	<b>351</b>
Reviewing Strings .....	351
Using the String Class .....	353
Finding the length of a string.....	356
Making simple string modifications .....	356
Extracting characters from a string.....	357
Extracting substrings from a string.....	358
Splitting a string.....	359
Replacing parts of a string.....	361

Using the StringBuilder and StringBuffer Classes .....	362
Creating a StringBuilder object .....	363
Using StringBuilder methods .....	363
Viewing a StringBuilder example .....	366
Using the CharSequence Interface .....	366
<b>Chapter 2: Using Arrays.....</b>	<b>369</b>
Understanding Arrays .....	369
Creating Arrays .....	370
Initializing an Array .....	371
Using for Loops with Arrays .....	372
Solving Homework Problems with Arrays.....	373
Using the Enhanced for Loop.....	375
Using Arrays with Methods .....	376
Using Two-Dimensional Arrays.....	377
Creating a two-dimensional array.....	377
Accessing two-dimensional array elements .....	378
Initializing a two-dimensional array .....	379
Using jagged arrays .....	380
Going beyond two dimensions.....	381
Working with a Fun but Complicated Example: A Chessboard .....	382
Using the Arrays Class .....	389
Filling an array.....	390
Copying an array.....	391
Sorting an array.....	392
Searching an array.....	392
Comparing arrays .....	393
Converting arrays to strings.....	393
<b>Chapter 3: Using the ArrayList Class .....</b>	<b>395</b>
Understanding the ArrayList Class .....	396
Creating an ArrayList Object .....	399
Adding Elements .....	400
Accessing Elements.....	401
Printing an ArrayList.....	402
Using an Iterator .....	402
Updating Elements .....	404
Deleting Elements .....	406
<b>Chapter 4: Using the LinkedList Class .....</b>	<b>409</b>
Understanding the LinkedList Class .....	410
Creating a LinkedList .....	415
Adding Items to a LinkedList .....	415
Retrieving Items from a LinkedList .....	417
Updating LinkedList Items.....	418
Removing LinkedList Items .....	419

**Chapter 5: Creating Generic Collection Classes . . . . . 421**  
    Why Generics? ..... 422  
    Creating a Generic Class ..... 423  
    A Generic Stack Class ..... 424  
    Using Wildcard-Type Parameters ..... 428  
    A Generic Queue Class ..... 429  
    Using the Diamond Operator ..... 432

**Chapter 6: Using Bulk Data Operations with Collections. . . . . 435**  
    Looking At a Basic Bulk Data Operation ..... 436  
    Looking Closer at the Stream Interface ..... 438  
    Using Parallel Streams ..... 442

***Book V: Programming Techniques* ..... 445**

**Chapter 1: Programming Threads . . . . . 447**  
    Understanding Threads ..... 448  
    Creating a Thread ..... 449  
        Understanding the Thread class ..... 449  
        Extending the Thread class ..... 451  
        Creating and starting a thread ..... 452  
    Implementing the Runnable Interface ..... 452  
        Using the Runnable interface ..... 453  
        Creating a class that implements Runnable ..... 453  
        Using the CountdownApp class ..... 454  
    Creating Threads That Work Together ..... 457  
    Using an Executor ..... 460  
    Synchronizing Methods ..... 462  
    Creating a Lock ..... 467  
    Coping with Threadus Interruptus ..... 468  
        Finding out whether you've been interrupted ..... 468  
        Aborting the countdown ..... 469

**Chapter 2: Network Programming. . . . . 475**  
    Understanding Network Programming ..... 475  
        IP addresses and ports ..... 476  
        Host names, DNS, and URLs ..... 477  
        telnet ..... 477  
    Getting Information about Internet Hosts ..... 478  
        The InetAddress class ..... 479  
        A program that looks up host names ..... 480  
    Creating Network Server Applications ..... 483  
        The Socket class ..... 483  
        The ServerSocket class ..... 484

Introducing BART .....	485
The BartQuote class .....	486
The BartServer program .....	488
The BartClient program .....	491
Working with BartServer 2.0 .....	494
<b>Chapter 3: Using Regular Expressions .....</b>	<b>499</b>
Creating a Program for Experimenting with Regular Expressions .....	500
Performing Basic Character Matching .....	502
Matching single characters .....	503
Using predefined character classes .....	503
Using custom character classes .....	505
Using ranges .....	506
Using negation .....	507
Matching multiple characters .....	507
Using escapes .....	509
Using parentheses to group characters .....	509
Using the pipe symbol .....	511
Using Regular Expressions in Java Programs .....	511
Understanding the String problem .....	512
Using regular expressions with the String class .....	512
Using the Pattern and Matcher classes .....	513
<b>Chapter 4: Using Recursion .....</b>	<b>515</b>
Calculating the Classic Factorial Example .....	515
The nonrecursive solution .....	515
The recursive solution .....	516
Displaying Directories .....	517
Writing Your Own Sorting Routine .....	521
Understanding how Quicksort works .....	521
Using the sort method .....	523
Using the partition method .....	523
Putting it all together .....	525
<b>Chapter 5: Working with Dates and Times .....</b>	<b>529</b>
Pondering How Time is Represented .....	529
Picking the Right Date and Time Class for Your Application .....	531
Using the now Method to Create a Date-Time Object .....	532
Using the parse Method to Create a Date-Time Object .....	533
Using the of Method to Create a Date-Time Object .....	534
Using the Month enumeration .....	536
Using the ZonedDateTime class .....	536
Using the ZoneOffset class .....	537

Looking Closer at the LocalDate Class .....	537
Extracting Information About a Date .....	539
Comparing Dates .....	540
Calculating with Dates .....	541
Formatting Dates .....	543
Looking at a Fun Birthday Calculator .....	545

**Chapter 6: Using BigDecimal** ..... **549**

Seeing Why Java Can't Add .....	549
Double trouble .....	550
Another example.....	551
BigDecimal to the Rescue! .....	553
Creating BigDecimal Objects.....	553
Doing BigDecimal Arithmetic .....	555
Rounding BigDecimal Values .....	558
The fundamentals of scale.....	558
The how-to of rounding.....	559
Comparing BigDecimal Values .....	561
Converting BigDecimals to Strings .....	563
Revisiting Sales Tax.....	564

**Book VI: Swing**..... **567**

**Chapter 1: Swinging into Swing** ..... **569**

Understanding Some Important Swing Concepts .....	569
Seeing what Swing does .....	569
Viewing the Swing class hierarchy .....	570
I've Been Framed! .....	571
Saying Hello, World! in Swing .....	573
Positioning the frame onscreen .....	575
Using the JPanel Class .....	576
Using Labels .....	578
Creating Buttons.....	580
Controlling the Layout of Components .....	582

**Chapter 2: Handling Events** ..... **583**

Examining Events .....	583
Handling Events .....	587
Creating a ClickMe Program.....	589
Using Inner Classes to Listen for Events .....	591
Using Lambda Expressions to Handle Events.....	593
Adding an Exit Button .....	595
Catching the WindowClosing Event .....	596
Revisiting the ClickMe Program .....	598

<b>Chapter 3: Getting Input from the User</b> .....	<b>601</b>
Using Text Fields .....	601
Looking at a sample program.....	603
Using text fields for numeric entry .....	605
Creating a validation class.....	607
Using Text Areas.....	608
The JTextArea class.....	609
The JScrollPane class .....	611
Using Check Boxes .....	612
Using Radio Buttons.....	615
Using Borders.....	617
Using Sliders.....	620
Designing a Pizza-Ordering Program .....	623
 <b>Chapter 4: Choosing from a List</b> .....	 <b>629</b>
Using Combo Boxes.....	629
Creating combo boxes .....	631
Getting items from a combo box .....	632
Handling combo box events .....	633
Using Lists .....	633
Creating a list.....	636
Getting items from a list.....	636
Changing list items .....	637
Using Spinners .....	639
Using Trees.....	641
Building a tree .....	643
Creating a JTree component .....	646
Getting the selected node.....	647
Looking at a complete program that uses a tree.....	648
 <b>Chapter 5: Using Layout Managers</b> .....	 <b>651</b>
Working with Layout Managers.....	651
Introducing six Swing layout managers .....	652
Applying layout managers .....	653
Using Flow Layout .....	653
Using Border Layout .....	655
Using Box Layout.....	656
Using Grid Layout.....	659
Using GridBag Layout .....	660
Sketching out a plan .....	661
Adding components to a GridBag layout.....	662
Working with GridBagConstraints .....	663
Viewing a GridBag layout example .....	665
Using Group Layout.....	668

**Book VII: Web Programming ..... 673**

**Chapter 1: Creating Applets .....675**

Understanding Applets .....	675
Working with the JApplet Class .....	676
Looking at a Sample Applet.....	678
Creating an HTML Page for an Applet.....	680
Testing an Applet.....	681

**Chapter 2: Creating Servlets. ....683**

Understanding Servlets.....	683
Using Tomcat .....	684
Installing and configuring Tomcat .....	685
Starting and stopping Tomcat.....	685
Testing Tomcat .....	686
Creating a Simple Servlet.....	687
Importing the servlet packages.....	687
Extending the HttpServlet class.....	687
Printing to a web page.....	689
Responding with HTML.....	689
Running a Servlet.....	691
Improving the HelloWorld Servlet.....	692
Getting Input from the User .....	694
Working with forms .....	694
Using the InputServlet servlet.....	695
Using Classes in a Servlet .....	696

**Chapter 3: Using JavaServer Pages .....703**

Understanding JavaServer Pages .....	703
Using Page Directives.....	705
Using Expressions .....	706
Using Scriptlets .....	708
Using Declarations.....	710
Using Classes.....	712

**Book VIII: Files and Databases..... 717**

**Chapter 1: Working with Files .....719**

Using the File Class.....	719
Knowing the class constructors and methods .....	720
Creating a File object.....	722
Creating a file.....	722
Getting information about a file .....	723

Getting the contents of a directory .....	723
Renaming files .....	724
Deleting a file .....	725
Using Command-Line Parameters .....	725
Choosing Files in a Swing Application .....	727
Creating an Open dialog box .....	729
Getting the selected file .....	730
Using file filters.....	731
Using Path Objects .....	733
Creating files with the Paths class .....	734
Getting the contents of a directory .....	735
Using a File Visitor to Walk a File Tree .....	736
<b>Chapter 2: Working with File Streams .....</b>	<b>741</b>
Understanding Streams .....	741
Reading Character Streams.....	742
Creating a BufferedReader.....	744
Reading from a character stream .....	744
Reading the movies.txt file .....	745
Writing Character Streams .....	748
Connecting a PrintWriter to a text file .....	750
Writing to a character stream .....	751
Writing the movies.txt file.....	752
Reading Binary Streams.....	754
Creating a DataInputStream .....	756
Reading from a data input stream .....	757
Reading the movies.dat file .....	758
Writing Binary Streams.....	761
Creating a DataOutputStream .....	763
Writing to a binary stream.....	764
Writing the movies.dat file.....	764
<b>Chapter 3: Database for \$100, Please .....</b>	<b>767</b>
Defining a Relational Database .....	767
Understanding (and Pronouncing) SQL .....	768
Introducing SQL Statements .....	768
Creating a SQL Database .....	769
Querying a Database .....	772
Using a basic select statement .....	772
Narrowing the query .....	773
Excluding rows.....	774
Using singleton selects.....	774
Finding what something sounds like.....	774
Using column functions .....	775
Selecting data from more than one table.....	776
Eliminating duplicates.....	777

Updating and Deleting Rows .....	778
Using the delete statement .....	778
Using the update statement .....	779

**Chapter 4: Using JDBC to Connect to a Database ..... 783**

Setting Up a Driver .....	783
Connecting to a Database.....	783
Querying a Database .....	785
Executing a select statement.....	787
Navigating through the result set .....	787
Getting data from a result set.....	787
Putting it all together: A program that reads from a database.....	789
Updating SQL Data .....	792
Using an Updatable RowSet Object.....	793
Deleting a row.....	795
Updating the value of a row column .....	795
Inserting a row .....	796

**Chapter 5: Working with XML ..... 797**

Defining XML .....	797
Tags .....	798
Attributes .....	799
The XML declaration .....	799
The movies.xml file.....	799
Using a DTD.....	800
Processing XML in Two Ways: DOM and SAX.....	803
Reading a DOM Document.....	804
Creating a DocumentBuilderFactory.....	805
Configuring the DocumentBuilderFactory.....	805
Creating a document builder and the document.....	806
Using the getDocument method .....	806
Reading DOM Nodes .....	807
Processing elements.....	809
Getting attribute values .....	810
Getting child element values .....	810
Putting It All Together: A Program That Lists Movies .....	811

**Book IX: Fun and Games ..... 815**

**Chapter 1: Fun with Fonts and Colors ..... 817**

Working with Fonts .....	817
Using font names.....	818
Using font styles.....	819

Setting a component's font.....	819
Getting a list of available fonts.....	820
Viewing a program that plays with fonts.....	820
Working with Color .....	823
Creating colors.....	823
Using system colors .....	825
Setting the colors of Swing components.....	826
Using a color chooser.....	827
<b>Chapter 2: Drawing Shapes .....</b>	<b>831</b>
Getting a Graphics Context .....	831
Drawing Shapes .....	832
Tweaking a drawn shape .....	833
Seeing how a graphics program creates shapes.....	833
Creating Shapes .....	835
Creating lines.....	837
Creating rectangles.....	837
Creating ellipses.....	838
Creating arcs .....	839
Looking at the ShapeMaker program .....	839
Filling Shapes .....	841
Drawing transparently .....	842
Using a gradient fill .....	842
Rotating and Translating .....	844
The translate method.....	845
The rotate method.....	845
Drawing Text .....	846
Letting the User Draw on a Component .....	847
<b>Chapter 3: Using Images and Sound .....</b>	<b>855</b>
Using Images .....	856
Using the ImageIcon Class.....	856
Using ImageIcon in a Swing application.....	857
Using ImageIcon in an applet .....	859
Using the Image Class .....	859
Creating an Image object .....	860
Drawing an Image object.....	861
Viewing an Image example.....	862
Playing Sounds and Making Music .....	865
<b>Chapter 4: Animation and Game Programming.....</b>	<b>869</b>
Working with Sprites.....	869
Animating a sprite.....	870
Creating an animation applet .....	870
Understanding Double Buffering .....	872

Bouncing the Ball.....	873
Bouncing a Bunch of Balls.....	875
Creating a Ball class.....	875
Animating random balls.....	876
Creating Collidable Balls.....	878
Playing Games.....	880

***Bonus Chapters at [www.dummies.com/extras/javaaio](http://www.dummies.com/extras/javaaio)***

**Bonus Chapter 1: Using Eclipse**

**Bonus Chapter 2: Twiddling Your Bits**

**Bonus Chapter 3: Making Menus**

**Bonus Chapter 4: Using JavaBeans**
