

## CONTENTS

<b>CHAPTER 1. Functional analysis</b>	<b>1</b>
§ 1. Banach and Hilbert spaces	1
§ 2. Linear operators	5
§ 3. Fredholm operators	12
§ 4. The spectrum	13
§ 5. Interpolation	18
§ 6. Intermediate extensions	21
§ 7. Self-adjoint operators	30
<b>CHAPTER 2. Function spaces</b>	<b>39</b>
§ 1. Functions on $E^n$	39
§ 2. Fourier transforms	43
§ 3. $L^p$ multipliers	44
§ 4. The spaces $H^{s,p}$	46
<b>CHAPTER 3. Partial differential operators</b>	<b>51</b>
§ 1. Constant coefficient operators	51
§ 2. Operators with variable coefficients	53
§ 3. Elliptic operators	55
<b>CHAPTER 4. General <math>L^p</math> theory</b>	<b>57</b>
§ 1. The minimal operator	57
§ 2. The maximal extension	60
§ 3. The spectrum of the minimal operator	63
§ 4. The case $p \neq 2$	65
§ 5. Examples	69
§ 6. Perturbation by a potential	72
<b>CHAPTER 5. Relative compactness</b>	<b>77</b>
§ 1. Orientation	77
§ 2. $P_0$ -boundedness	78
§ 3. $P_0$ -compactness	84
§ 4. Comparison of operators	88
§ 5. The operator $qQ_0$	92
§ 6. The adjoint of $P_0 + q$	94
§ 7. Smooth coefficients in $L^2$	95
§ 8. The case $p = 1$	103
§ 9. The case $1 < p \leq \infty$	105

<b>CHAPTER 6. Elliptic operators</b>	114
§ 1. An improvement	114
§ 2. A condition for boundedness	115
§ 3. Bessel potentials	117
§ 4. Some new spaces	120
§ 5. The Sobolev case	123
§ 6. Another estimate	128
§ 7. A general inequality	131
§ 8. Some comparisons	135
§ 9. Relative bounds	140
§10. Elliptic operators	147
<b>CHAPTER 7. Operators bounded from below</b>	154
§ 1. Introduction	154
§ 2. Regularly accretive extensions	155
§ 3. Invariance of the essential spectrum	159
§ 4. Perturbation by an operator	162
§ 5. An illustration	165
§ 6. Essential spectrum bounded from below	167
§ 7. Strongly elliptic operators	169
§ 8. A strengthened version for elliptic operators	174
§ 9. Perturbation by a potential. Elliptic case	175
§10. Perturbation by an operator. Elliptic case	179
<b>CHAPTER 8. Self-adjoint extensions</b>	183
§ 1. Existence	183
§ 2. Extensions with special properties	186
§ 3. Intervals containing the essential spectrum	188
§ 4. Essentially self-adjoint operators	191
§ 5. Finite negative spectrum	192
§ 6. Bounded operators	198
§ 7. Some related spaces	201
<b>CHAPTER 9. Second order operators</b>	212
§ 1. Introduction	212
§ 2. Essential self-adjointness	215
§ 3. Some observations	222
§ 4. Comparison of operators	228
§ 5. Estimating the essential spectrum	234
§ 6. The quadratic form $J(\varphi)$	237
§ 7. Adding of spectra	243
§ 8. Separation of coordinates	251
§ 9. Clusters	254
<b>CHAPTER 10. Applications</b>	260
§ 1. The Schrödinger operator for a particle	260

§ 2. Two particle systems	262
§ 3. The existence of bound states	265
§ 4. Systems of $N$ particles	268
§ 5. The Zeeman effect	271
§ 6. Stability	277
<b>CHAPTER II. Notes, remarks and references</b>	<b>282</b>
§ 1. Chapter 1	282
§ 2. Chapter 2	286
§ 3. Chapter 3	291
§ 4. Chapter 4	293
§ 5. Chapter 5	296
§ 6. Chapter 6	297
§ 7. Chapter 7	298
§ 8. Chapter 8	299
§ 9. Chapter 9	299
§10. Chapter 10	300
<b>BIBLIOGRAPHY</b>	<b>301</b>
<b>LIST OF SYMBOLS</b>	<b>308</b>
<b>SUBJECT INDEX</b>	<b>309</b>
