

Contents

1	Introduction	1
2	Preliminaries	9
2.1	Probabilistic Method	9
2.2	Classical Groups	11
2.3	Actions of Classical Groups	13
2.4	Standard Bases	15
2.5	Classical Algebraic Groups	16
2.6	Maximal Subgroups of Classical Groups	19
2.7	Computational Methods	21
3	Shintani Descent	23
3.1	Introduction	23
3.2	Properties	26
3.3	Applications	28
3.4	Generalisation	31
4	Fixed Point Ratios	33
4.1	Subspace Actions	34
4.2	Nonsubspace Actions	39
5	Orthogonal Groups	53
5.1	Introduction	53
5.2	Automorphisms	55
5.2.1	Preliminaries	55
5.2.2	Plus-Type	56
5.2.3	Minus-Type	58
5.2.4	Conjugacy of Outer Automorphisms	60
5.3	Elements	62
5.3.1	Preliminaries	63
5.3.2	Types of Semisimple Elements	65

5.3.3	Reflections	68
5.3.4	Field Extension Subgroups	70
5.4	Case I: Semilinear Automorphisms	71
5.4.1	Case I(a)	72
5.4.2	Case I(b)	86
5.5	Case II: Linear Automorphisms	98
5.5.1	Case II(a)	98
5.5.2	Case II(b)	99
5.6	Case III: Triality Automorphisms	106
5.6.1	Case III(a)	106
5.6.2	Case III(b)	107
5.6.3	Case III(c)	108
6	Unitary Groups	111
6.1	Introduction	111
6.2	Automorphisms	112
6.3	Elements	116
6.4	Case I: Semilinear Automorphisms	118
6.4.1	Case I(a)	118
6.4.2	Case I(b)	122
6.5	Case II: Linear Automorphisms	129
6.5.1	Case II(a)	129
6.5.2	Case II(b)	130
6.6	Linear Groups	137
