<b>1</b>	<b>Introduction</b> .....	1
1.1	Basics: The Definition of Relational Complexity .....	4
1.1.1	Relational Structures .....	4
1.1.2	Tuples .....	7
1.2	Basics: Some Key Examples .....	9
1.2.1	Existing Results on Relational Complexity .....	13
1.3	Motivation: On Homogeneity .....	15
1.3.1	Existing Results on Homogeneity .....	16
1.4	Motivation: On Model Theory .....	19
1.5	Motivation: Other Important Statistics .....	20
1.6	Beyond the Binary Conjecture .....	23
1.7	Methods: Basic Lemmas .....	24
1.7.1	Relational Complexity and Subgroups .....	25
1.7.2	Relational Complexity and Subsets .....	26
1.7.3	Strongly Non-binary Subsets .....	27
1.8	Methods: Frobenius Groups .....	30
1.9	Methods: On Computation .....	33
<b>2</b>	<b>Preliminary Results for Groups of Lie Type</b> .....	37
2.1	Results on Alternating Sections .....	38
2.2	Stabilizers Containing Certain Elements .....	40
2.2.1	Some Groups that Are Not Almost Simple .....	41
2.2.2	Classical Groups .....	42
2.2.3	Exceptional Groups .....	59
2.3	Results on Odd-Degree Actions .....	62
2.4	Results on Centralizers .....	67
2.5	Outer Automorphisms of Groups of Lie Type .....	67
2.6	On Fusion and Factorization .....	68
<b>3</b>	<b>Exceptional Groups</b> .....	71
3.1	Maximal Subgroups of Exceptional Groups of Lie Type .....	71
3.2	Small Exceptional Groups of Lie Type .....	73

3.3	Maximal Subgroups in (I) of Theorem 3.1.1: Parabolic Subgroups .....	76
3.4	Type (II), Part 1: Reductive Subgroups of Maximal Rank.....	79
3.5	Type (II), Part 2: Maximal Torus Normalizers .....	86
3.6	Maximal Subgroups in (V) of Theorem 3.1.1 .....	91
3.7	Maximal Subgroups in (VI) of Theorem 3.1.1 .....	96
3.8	The Remaining Families in Theorem 3.1.1 .....	98
3.8.1	Type (III) .....	98
3.8.2	Type (IV) .....	99
3.8.3	Type (VII).....	99
3.8.4	Type (VIII).....	99
3.8.5	Type (IX) .....	100
3.8.6	Type (X) .....	100
<b>4</b>	<b>Classical Groups</b> .....	<b>103</b>
4.1	Background on Classical Groups .....	103
4.1.1	Basic Assumptions .....	104
4.2	Family $\mathcal{C}_2$ .....	105
4.2.1	Case $S = \mathrm{SL}_n(q)$ .....	106
4.2.2	The Totally Singular Case .....	109
4.2.3	A General Reduction .....	112
4.2.4	Case Where $S = \mathrm{SU}_n(q)$ and the $W_i$ Are Non-degenerate .....	118
4.2.5	Case Where $S = \mathrm{Sp}_n(q)$ and the $W_i$ Are Non-degenerate .....	120
4.2.6	Case Where $S = \Omega_n(q)$ for $nq$ Odd, and the $W_i$ Are Non-degenerate .....	122
4.2.7	Case Where $S = \Omega_n^\pm(q)$ and the $W_i$ Are Non-degenerate .....	123
4.3	Family $\mathcal{C}_3$ .....	126
4.3.1	Case $S = \mathrm{SL}_n(q)$ .....	127
4.3.2	Case $S = \mathrm{SU}_n(q)$ .....	129
4.3.3	Case $S = \mathrm{Sp}_n(q)$ .....	133
4.3.4	Case $S = \Omega_n^\epsilon(q)$ .....	135
4.4	Family $\mathcal{C}_4$ .....	138
4.4.1	Case $S = \mathrm{SL}_n(q)$ .....	139
4.4.2	Case $S = \mathrm{SU}_n(q)$ .....	141
4.4.3	Case Where $S$ Is Symplectic or Orthogonal .....	143
4.4.4	The Remaining Cases .....	148
4.5	Family $\mathcal{C}_5$ .....	149
4.5.1	Case $S = \mathrm{SL}_n(q)$ .....	149
4.5.2	Case $S = \mathrm{SU}_n(q)$ .....	151
4.5.3	Case $S = \mathrm{Sp}_n(q)$ .....	156
4.5.4	Case $S$ Is Orthogonal .....	157
4.6	Family $\mathcal{C}_6$ .....	158

4.7	Family $\mathcal{C}_7$ .....	164
4.7.1	Case $S = \mathrm{SL}_n(q)$ .....	168
4.7.2	Case $S = \mathrm{SU}_n(q)$ .....	170
4.7.3	Case $S = \mathrm{Sp}_n(q)$ .....	172
4.7.4	Case $S = \Omega_n(q)$ , $n$ Odd.....	175
4.7.5	Case $S = \Omega_n^+(q)$ .....	176
4.8	Family $\mathcal{C}_8$ .....	180
4.8.1	Case $S = \mathrm{SL}_n(q)$ .....	180
4.8.2	Case $S = \mathrm{Sp}_n(q)$ .....	182
4.9	Family $\mathcal{S}$ .....	182
4.9.1	Strategies.....	183
4.9.2	The Case Where $M_0$ Is Alternating .....	187
4.9.3	The Case Where $M_0$ Is Sporadic .....	194
4.9.4	The Case Where $M_0$ Is of Lie Type .....	194
4.10	Exceptional Automorphisms .....	205
	<b>Bibliography</b> .....	209
