

CONTENTS

PREFACE v

1 First-Order Differential Equations 1

- 1.1 Introduction 1
- 1.2 First-Order Linear Differential Equations 8
- 1.3 Applications of First-Order Linear Differential Equations 16
- 1.4 Separable Differential Equations 31
- 1.5 Homogeneous Differential Equations 42
- 1.6 Exact Differential Equations (OPTIONAL) 45
- 1.7 Integrating Factors (OPTIONAL) 50
- 1.8 Numerical Methods I: Euler's Method 55
- 1.9 Numerical Methods II: The Runge-Kutta Method 62
- 1.10 Existence of Solutions 66

2 Second-Order Linear Differential Equations 72

- 2.1 Introduction 72
- 2.2 General Solutions 76
- 2.3 Linear Differential Equations with Constant Coefficients, I 84

2.4	An Example from Oceanography (OPTIONAL)	91
2.5	Linear Differential Equations with Constant Coefficients, II	96
2.6	Harmonic Motion	99
2.7	The Method of Undetermined Coefficients, I	107
2.8	The Method of Undetermined Coefficients, II	115
2.9	Resonance and Other Applications	121
2.10	Inverse Differential Operators (OPTIONAL)	130
2.11	Reduction of Order	136
2.12	Variation of Parameters	140
2.13	The Delta Function	146

3 Higher-Order Linear Differential Equations 152

3.1	Introduction	152
3.2	General Solutions	155
3.3	The Wronskian	162
3.4	Higher-Order Linear Differential Equations with Constant Coefficients	162
3.5	An Example from Economics	170
3.6	The Method of Undetermined Coefficients	174
3.7	Inverse Differential Operators (OPTIONAL)	181
3.8	Variation of Parameters	185
3.9	Computational Difficulties	189

4 Laplace Transforms 191

4.1	Introduction	191
4.2	Elementary Properties of the Laplace Transform	197
4.3	Inverse Laplace Transforms	202
4.4	Convolution	206
4.5	Solution of Linear Differential Equations	212

5 Systems of Linear Differential Equations 226

5.1	Preliminaries	226
5.2	Systems of Linear Differential Equations	236
5.3	Flow Lines (OPTIONAL)	243
5.4	General Solutions	247
5.5	Matrix Methods: Real Eigenvalues	256

5.6	Matrix Methods: Complex Eigenvalues	266
5.7	Applications	272
5.8	Elimination	286
5.9	Laplace Transforms	294
5.10	Numerical Methods	305

6 Series Solutions of Differential Equations 317

6.1	Power Series	317
6.2	Series Solutions about Ordinary Points	323
6.3	Solutions about Regular Singular Points, I	336
6.4	Solutions about Regular Singular Points, II	352
6.5	Bessel Functions	357
6.6	Modified Bessel Functions (OPTIONAL)	372

7 Boundary-Value Problems 380

7.1	Fourier Sine and Cosine Series	380
7.2	Separation of Variables	395

Appendix 1	Complex Numbers	407
------------	-----------------	-----

Appendix 2	Determinants	412
------------	--------------	-----

Answers to Odd-Numbered Exercises	418
-----------------------------------	-----

Index	448
-------	-----
