## Section I: The Fundamentals of Responsive Web Design 1

---

### Chapter 1: The Essentials of Responsive Web Design 3

The browser and device landscape ..... 4

Defining responsive web design ..... 5

    Responsive web design in a nutshell • 5

    Browser support • 5

    Text editors • 7

    Tools for software development • 7

Our first responsive example ..... 8

    Our basic HTML file • 8

    Taming images • 14

*A brief tangent on width/max-width for images • 17*

    Enter media queries • 18

*Breakpoints • 18*

*Amending the example for a larger screen • 19*

    The shortcomings of our example • 24

Summary ..... 25

---

<b>Chapter 2: Writing HTML Markup</b>	<b>27</b>
<b>Getting the start of HTML pages right</b> .....	<b>29</b>
The doctype • 29	
The HTML tag and lang attribute • 29	
Character encoding • 30	
The forgiving nature of HTML5 markup • 30	
A sensible approach to HTML markup • 31	
<b>All hail the mighty &lt;a&gt; element</b> .....	<b>32</b>
<b>New semantic elements in HTML5</b> .....	<b>33</b>
The <main> element • 34	
The <section> element • 34	
The <nav> element • 35	
The <article> element • 35	
The <aside> element • 36	
The <header> element • 36	
The <footer> element • 36	
The HTML5 outline algorithm • 37	
A note on h1-h6 and the <hgroup> element • 38	
The <div> element • 39	
The <p> element • 39	
The <blockquote> element • 39	
The <figure> and <figcaption> elements • 40	
<details> and <summary> elements • 40	
The <address> element • 43	
<b>HTML text-level semantics</b> .....	<b>43</b>
The <span> element • 44	
The <b> element • 44	
The <strong> element • 44	
The <em> element • 45	
The <i> element • 45	

---

<b>Obsolete HTML features</b> .....	<b>46</b>
<b>Putting HTML elements to use</b> .....	<b>46</b>
<b>WCAG accessibility conformance and WAI-ARIA for more accessible web applications</b> ...	<b>48</b>
Web Content Accessibility Guidelines (WCAG) •	48
WAI-ARIA •	48
Taking ARIA further •	49
<b>Embedding media in HTML5</b> .....	<b>50</b>
Adding video and audio in HTML •	50
<i>Providing alternate media sources</i> •	52
<i>Audio and video tags work almost identically</i> •	53
Responsive HTML5 video and iframes •	53
<i>The modern way to embed iframes and keep aspect ratio</i> •	55
<b>The loading attribute</b> .....	<b>55</b>
<b>The &lt;dialog&gt; element</b> .....	<b>56</b>
<b>Summary</b> .....	<b>59</b>
<b>An exercise</b> .....	<b>60</b>
<b>Chapter 3: Media Queries and Container Queries</b> .....	<b>63</b>
<hr/>	
<b>The meta viewport tag</b> .....	<b>66</b>
<b>Why media queries are needed for a responsive web design</b> .....	<b>68</b>
Basic conditional logic in CSS •	68
<b>Media query syntax</b> .....	<b>68</b>
Media queries in link tags •	70
Media query on an @import at-rule •	70
Media queries in a CSS file •	71
Inverting media query logic •	71
Combining media queries •	71
A number of different media queries •	72
Everyday media queries •	72
What can media queries test for? •	73

<b>Using media queries to alter a design</b> .....	<b>74</b>
<b>Advanced media query considerations</b> .....	<b>77</b>
Do media queries affect which files get downloaded or how the page renders? • 78	
Should you split media queries into their own files? • 78	
Consolidate media queries or scatter them where it suits? • 79	
<i>What about file size?</i> • 81	
<b>Media Queries Level 5</b> .....	<b>81</b>
Interaction media features • 82	
<i>The pointer media feature</i> • 82	
<i>The hover media feature</i> • 83	
User preference media features • 84	
<i>The prefers-color-scheme media feature</i> • 84	
<i>The prefers-reduced-motion feature</i> • 85	
<i>Future possibilities</i> • 85	
<b>Container queries</b> .....	<b>86</b>
This may change! • 87	
Using a container query • 88	
<i>Why name the container?</i> • 88	
<i>Container relative lengths</i> • 90	
Possibilities • 90	
<b>Summary</b> .....	<b>91</b>
<b>Chapter 4: Fluid Layout and Flexbox</b> .....	<b>93</b>
<hr/>	
Converting a fixed pixel design into a fluid proportional layout .....	94
Why do we need Flexbox? .....	99
Introducing Flexbox .....	99
The bumpy path to Flexbox • 100	
Choosing your autoprefixing solution • 100	
Getting Flexy • 100	
<i>Perfect vertically centered text</i> • 101	
<i>Offset items</i> • 102	

<i>Reverse the order of items</i> • 104	
<i>How about if we want them laid out vertically instead?</i> • 105	
<i>Column reverse</i> • 106	
<b>Inline-flex</b> .....	<b>106</b>
<b>Flexbox alignment properties</b> .....	<b>107</b>
align-items • 109	
align-self • 109	
Possible alignment values • 110	
<i>justify-content</i> • 111	
The flex property • 113	
Simple sticky footer • 116	
<b>Changing the source order</b> .....	<b>117</b>
<b>Wrapping with flex</b> .....	<b>123</b>
<i>Wrapping up Flexbox</i> • 127	
<b>Summary</b> .....	<b>127</b>
<b>Chapter 5: Layout with CSS Grid</b> .....	<b>129</b>
<b>What CSS Grid is and the problems it solves</b> .....	<b>130</b>
Basic Grid syntax • 130	
Grid-specific concepts and terminology • 131	
<b>Setting up a Grid Layout</b> .....	<b>132</b>
Explicit and implicit • 137	
<i>grid-auto-rows and grid-auto-columns</i> • 138	
<i>grid-auto-flow</i> • 140	
<b>Placing and sizing Grid Layout items</b> .....	<b>140</b>
gap • 143	
repeat • 143	
fr units • 143	
Placing items in the grid • 144	
span • 144	
dense • 145	

Named grid lines • 146	
grid-template-areas • 149	
auto-fit and auto-fill • 151	
The minmax() function • 153	
<b>Shorthand syntax .....</b>	<b>154</b>
grid-template shorthand • 154	
grid shorthand • 155	
<i>grid shorthand value – option one</i> • 156	
<i>grid shorthand value – option two</i> • 156	
<i>grid shorthand value – option three</i> • 157	
<b>Allowing nested elements to take part in the Grid .....</b>	<b>159</b>
The subgrid value • 161	
<b>Applying what you have learned so far .....</b>	<b>165</b>
<b>Summary .....</b>	<b>166</b>
<b>Section II: Core Skills for Effective Front-End Web Development</b>	<b>167</b>

<b>Chapter 6: CSS Selectors, Typography, and More</b>	<b>169</b>
<b>Selectors, units, and capabilities .....</b>	<b>170</b>
Anatomy of a CSS rule • 170	
Pseudo-elements and pseudo-classes • 171	
<b>CSS selectors – beyond the normal! .....</b>	<b>172</b>
CSS attribute selectors • 172	
CSS substring matching attribute selectors • 173	
<i>The “beginning with” substring matching attribute selector</i> • 174	
<i>The “contains an instance of” substring matching attribute selector</i> • 174	
<i>The “ends with” substring matching attribute selector</i> • 175	
Chaining attribute selectors • 175	

---

<b>CSS structural pseudo-classes .....</b>	<b>177</b>
The :last-child selector • 178	
The nth-child selectors • 178	
<i>Understanding what nth rules do • 179</i>	
<i>nth-based selection in responsive web designs • 182</i>	
<b>Combinator selectors – child, next sibling, and subsequent sibling .....</b>	<b>185</b>
The child combinator • 185	
The next sibling • 185	
The subsequent sibling • 186	
The negation (:not) selector • 186	
The empty (:empty) selector • 187	
<b>Grouping selectors .....</b>	<b>188</b>
The :is() functional pseudo-class • 189	
The :where() functional pseudo-class • 190	
The :has() relational pseudo-class • 191	
<b>Responsive viewport relative lengths .....</b>	<b>194</b>
<b>Using @supports to fork CSS .....</b>	<b>195</b>
Feature queries • 196	
Combining conditionals • 197	
<b>Web typography .....</b>	<b>198</b>
System fonts • 199	
The @font-face CSS rule • 200	
Implementing web fonts with @font-face • 200	
Optimizing font loading with font-display • 202	
font-display • 203	
<b>Variable fonts .....</b>	<b>204</b>
font-face changes • 205	
How to make use of a variable font • 206	
<i>Registered axis • 206</i>	
<i>Custom axis • 207</i>	
Font features • 208	

---

Exercise .....	209
Summary .....	211
<b>Chapter 7: CSS Color</b> .....	<b>213</b>
RGB color .....	214
HSL color .....	215
Alpha channels • 216	
<i>Alpha with hex</i> • 216	
<i>Alpha with functional notation</i> • 217	
Space-separated functional color notation .....	218
Color concepts and terminology .....	219
Color space • 219	
Gamut • 219	
The current state of CSS color .....	221
Introductory note • 222	
Display-P3 • 222	
<i>@media (color-gamut) media query</i> • 224	
LCH with the <code>lch()</code> function • 224	
OKLab and OKLCH • 227	
Fallbacks for older browsers .....	227
The <code>color-mix()</code> function .....	228
The <code>color-contrast()</code> function .....	229
Relative colors with the relative color syntax .....	231
Summary .....	232
Resources .....	232
<b>Chapter 8: Stunning Aesthetics with CSS</b> .....	<b>233</b>
Text shadows .....	234
Multiple text shadows • 235	
Box shadows .....	236
Inset shadow • 236	

---

Multiple shadows • 237	
Understanding spread • 237	
<b>Background gradients</b> .....	<b>238</b>
The linear-gradient notation • 239	
<i>Specifying gradient direction</i> • 239	
<i>Color stops</i> • 240	
Radial background gradients • 241	
Handy “extent” keywords for responsive sizing • 243	
Conic gradients • 244	
Repeating gradients • 247	
Background gradient patterns • 248	
<b>Multiple background images</b> .....	<b>250</b>
Background size • 251	
Background position • 251	
Background shorthand • 252	
High-resolution background images • 253	
<b>CSS filters</b> .....	<b>254</b>
Available CSS filters • 255	
Combining CSS filters • 260	
<b>A warning on CSS performance</b> .....	<b>260</b>
<b>CSS clip-path</b> .....	<b>262</b>
CSS basic shapes • 262	
<i>clip-path with a circle</i> • 262	
<i>clip-path with ellipse</i> • 264	
<i>clip-path with inset</i> • 264	
<i>clip-path with polygon</i> • 265	
<i>clip-path with URL (clipping source)</i> • 266	
Animating clip-path • 267	
<b>mask-image</b> .....	<b>268</b>
<b>mix-blend-mode</b> .....	<b>270</b>
<b>Summary</b> .....	<b>271</b>

<b>Chapter 9: Responsive Images</b>	<b>273</b>
<b>Modern image formats</b> .....	<b>274</b>
AVIF image format • 275	
WebP image format • 275	
<b>Image format comparisons</b> .....	<b>276</b>
Using the picture element to progressively enhance images • 278	
<b>The inherent problem of responsive images</b> .....	<b>279</b>
Simple resolution switching with srcset • 280	
Advanced switching with srcset and sizes • 281	
<i>Did you say the browser “might” pick one image over another?</i> • 282	
Art direction with the picture element • 282	
A practical note on providing alternate image formats and sizes • 283	
<b>Summary</b> .....	<b>284</b>
<b>Chapter 10: SVG</b>	<b>285</b>
<b>A brief history of SVG</b> .....	<b>287</b>
<b>An image that is also a readable web document</b> .....	<b>288</b>
The root SVG element • 290	
Namespace • 291	
The title and desc tags • 291	
The defs tag • 291	
The g element • 292	
SVG shapes • 292	
SVG paths • 292	
<b>Creating SVGs with popular image editing packages and services</b> .....	<b>293</b>
Saving time with SVG icon services • 293	
<b>Inserting SVGs into your web pages</b> .....	<b>294</b>
Using an img tag • 295	
Using an object tag • 295	
Inserting an SVG as a background image • 296	

---

<i>A brief aside on data URIs</i> • 296	
<i>Generating image sprites</i> • 298	
Inserting an SVG inline • 298	
<b>Reusing graphical objects from symbols</b> .....	<b>299</b>
Inline SVGs allow different colors in different contexts • 301	
Making dual-tone icons that inherit the color of their parent • 301	
Re-coloring SVGs with CSS custom properties • 302	
Reusing graphical objects from external sources • 304	
<b>What you can do with each SVG insertion method (inline, object, background-image, and img)</b> .....	<b>305</b>
<b>Extra SVG capabilities and oddities</b> .....	<b>306</b>
SMIL animation • 306	
Styling an SVG with an external style sheet • 308	
Styling an SVG with internal styles • 309	
<i>SVG properties and values within CSS</i> • 309	
Animating an SVG with CSS • 310	
Animating SVG with JavaScript • 311	
<i>A simple example of animating an SVG with GreenSock</i> • 312	
Using SVGs as filters • 314	
A note on media queries inside SVGs • 316	
<b>Optimizing SVGs</b> .....	<b>317</b>
<b>SVG implementation tips</b> .....	<b>318</b>
<b>Summary</b> .....	<b>319</b>
<b>Further resources</b> .....	<b>319</b>
<b>Chapter 11: Transitions, Transformations, and Animations</b>	<b>321</b>
<hr/>	
<b>What CSS transitions are and how we can use them</b> .....	<b>322</b>
The properties of a transition • 324	
The transition shorthand property • 325	
Transitioning different properties over different periods of time • 326	
Understanding timing functions • 326	

---

<b>CSS 2D transforms</b> .....	<b>328</b>
Scale • 330	
Translate • 331	
<i>Using translate to center absolutely positioned elements</i> • 331	
Rotate • 334	
Skew • 334	
Matrix • 335	
The transform-origin property • 336	
<b>CSS 3D transformations</b> .....	<b>338</b>
The translate3d property • 341	
A progressive enhancement example using translate3d • 342	
<b>Animating with CSS</b> .....	<b>345</b>
The animation-fill-mode property • 348	
<b>Exercises and training</b> .....	<b>350</b>
<b>Summary</b> .....	<b>350</b>
<b>Chapter 12: Custom Properties and CSS Functions</b> .....	<b>351</b>
<hr/>	
<b>Working with custom properties</b> .....	<b>352</b>
Simple theming • 353	
Setting and getting custom property values with JavaScript • 355	
Custom properties and specificity • 356	
Setting a fallback value • 357	
env() environment variables • 357	
Custom properties and web components • 358	
<b>CSS functions</b> .....	<b>359</b>
calc() • 360	
min() • 361	
max() • 362	
clamp() • 362	
<b>Putting it all together</b> .....	<b>363</b>
<b>Summary</b> .....	<b>366</b>

---

<b>Chapter 13: Forms</b>	<b>367</b>
<b>HTML5 forms</b> .....	<b>368</b>
Understanding the component parts of HTML5 forms • 369	
The placeholder attribute • 370	
<i>Styling the placeholder text</i> • 370	
Styling the input caret with the caret-color CSS property • 371	
The required attribute • 371	
The autofocus attribute • 373	
The autocomplete attribute • 374	
The list attribute and the associated datalist element • 374	
<b>HTML5 input types</b> .....	<b>376</b>
The email input type • 376	
The number input type • 378	
<i>Using min and max to create number ranges</i> • 380	
<i>Changing the step increments</i> • 381	
The url input type • 381	
The tel input type • 383	
The search input type • 385	
The pattern input attribute • 385	
The color type input • 387	
Date and time • 388	
<i>The date input type</i> • 388	
<i>The month input type</i> • 389	
<i>The week input type</i> • 390	
<i>The time input type</i> • 391	
The range input type • 392	
<b>Styling HTML5 forms with CSS</b> .....	<b>393</b>
Indicating required fields • 396	
Creating a background fill effect • 400	
<b>Summary</b> .....	<b>401</b>

---

## **Section III: Latest Platform Features and Parting Advice** **403**

---

### **Chapter 14: Cutting-Edge CSS Features** **405**

---

<b>Cascade layers</b> .....	<b>406</b>
Naming cascade layers • 408	
Where to declare layers • 408	
Adding rules to layers • 409	
The priority of rules in and outside of layers • 409	
Nesting layers inside other layers • 410	
The importance of !important • 411	
<i>!important in cascade layers</i> • 412	
Old browsers • 414	
<b>CSS nesting</b> .....	<b>414</b>
Nesting conditionals such as media queries • 417	
Trying CSS nesting syntax today • 418	
Giving your feedback on the proposal • 418	
Asking browser vendors to implement CSS nesting • 418	
<b>Summary</b> .....	<b>419</b>

### **Chapter 15: Bonus Techniques and Parting Advice** **421**

---

<b>Truncating text</b> .....	<b>422</b>
Single-line truncation • 422	
Multi-line truncation • 423	
<b>Creating horizontal scrolling panels</b> .....	<b>424</b>
Styling scrollbars • 427	
CSS Scroll Snap • 430	
<i>The scroll-snap-type property</i> • 430	
<i>The scroll-snap-align property</i> • 431	
<i>The scroll-snap-stop property</i> • 432	
Smooth scrolling with CSS scroll-behavior • 432	

---

<b>Parting advice .....</b>	<b>434</b>
Getting designs in the browser as soon as possible •	434
Testing on real devices •	434
Embracing progressive enhancement •	434
Defining a browser support matrix •	435
<i>Functional parity, not visual parity</i> •	436
<i>Choosing the browsers to support</i> •	436
<i>Tiering the user experience</i> •	437
Avoiding CSS frameworks in production •	437
Hiding, showing, and loading content across viewports •	438
Validators and linting tools •	439
Performance •	440
<i>Performance tools</i> •	440
The next big things •	444
<b>Summary .....</b>	<b>445</b>
<b>Other Books You May Enjoy</b>	<b>449</b>
<b>Index</b>	<b>455</b>
