Preface to the Fourth Edition	vii
Preface to the Third Edition	xi
Preface to the Second Edition	xiii
Preface to the First Edition	xvii
Notation and Conventions	xxi
1 Infinite Galois Theory and Profinite Groups	1
1.1 Inverse Limits	1
1.2 Profinite Groups	4
1.3 Infinite Galois Theory	10
1.4 The p -adic Integers and the Prüfer Group	13
1.5 The Absolute Galois Group of a Finite Field	16
Exercises	17
Notes	19
2 Valuations	21
2.1 Valuations, Places, and Valuation Rings	21
2.2 Discrete Valuations	23
2.3 Extensions of Valuations and Places	27
2.4 Galois Extensions	33
2.5 Integral Extensions and Dedekind Domains	34
Exercises	38
3 Linear Disjointness	41
3.1 Linear Disjointness of Fields	41
3.2 Purely Transcendental Extensions	47
3.3 Separable Extensions	48
3.4 Regular Extensions	49
3.5 Primary Extensions	54
3.6 The Imperfect Degree of a Field	55
3.7 Derivatives	60
Exercises	62

4 Algebraic Function Fields of One Variable	63
4.1 Function Fields of One Variable	63
4.2 The Riemann–Roch Theorem	65
4.3 Holomorphy Rings	67
4.4 Extensions of Function Fields	69
4.5 Completions	72
4.6 The Different	77
4.7 Hyperelliptic Fields	80
4.8 Hyperelliptic Fields with a Rational Quadratic Subfield	83
Exercises	85
Notes	86
5 The Riemann Hypothesis for Function Fields	87
5.1 Class Numbers	87
5.2 Zeta Functions	89
5.3 Zeta Functions under Constant Field Extensions	91
5.4 The Functional Equation	92
5.5 The Riemann Hypothesis and Degree 1 Prime Divisors	94
5.6 Reduction Steps	95
5.7 An Upper Bound	96
5.8 A Lower Bound	98
Exercises	101
Notes	103
6 Plane Curves	105
6.1 Affine and Projective Plane Curves	105
6.2 Points and Prime Divisors	107
6.3 The Genus of a Plane Curve	109
6.4 Points on a Curve over a Finite Field	113
Exercises	115
Notes	115
7 The Chebotarev Density Theorem	117
7.1 Decomposition Groups	117
7.2 The Artin Symbol over Global Fields	122
7.3 Dirichlet Density	123
7.4 Function Fields	125
7.5 Number Fields	131
Exercises	138
Notes	139
8 Ultraproducts	141
8.1 First Order Predicate Calculus	141
8.2 Structures	143
8.3 Models	144
8.4 Elementary Substructures	146
8.5 Ultrafilters	147

8.6	Ultraproducts	148
8.7	Regular Ultrafilters	152
8.8	Regular Ultraproducts	154
8.9	Nonprincipal Ultraproducts of Finite Fields	155
	Exercises	156
	Notes	157
9	Decision Procedures	159
9.1	Deduction Theory	159
9.2	Gödel's Completeness Theorem	162
9.3	Primitive Recursive Functions	164
9.4	Primitive Recursive Relations	166
9.5	Recursive Functions	167
9.6	Recursive and Primitive Recursive Procedures	168
9.7	A Reduction Step in Decidability Procedures	170
	Exercises	171
	Notes	172
10	Algebraically Closed Fields	173
10.1	Elimination of Quantifiers	173
10.2	A Quantifier Elimination Procedure	175
10.3	Effectiveness	177
10.4	Applications	178
	Exercises	180
	Notes	180
11	Elements of Algebraic Geometry	183
11.1	Algebraic Sets	183
11.2	Varieties	186
11.3	Substitutions in Irreducible Polynomials	188
11.4	Rational Maps	189
11.5	Hyperplane Sections	191
11.6	Descent	194
11.7	Projective Varieties	196
11.8	About the Language of Algebraic Geometry	198
	Exercises	200
	Notes	202
12	Pseudo Algebraically Closed Fields	203
12.1	PAC Fields	203
12.2	Reduction to Plane Curves	205
12.3	The PAC Property is an Elementary Statement	209
12.4	PAC Fields of Positive Characteristic	211
12.5	PAC Fields with Valuations	213
12.6	The Absolute Galois Group of a PAC Field	217

12.7	A non-PAC Field K with K_{ins} PAC	221
	Exercises	226
	Notes	227
13	Hilbertian Fields	229
13.1	Hilbert Sets and Reduction Lemmas	229
13.2	Hilbert Sets under Separable Algebraic Extensions	233
13.3	Purely Inseparable Extensions	234
13.4	Imperfect Fields	238
	Exercises	240
	Notes	240
14	The Classical Hilbertian Fields	243
14.1	Further Reduction	243
14.2	Function Fields Over Infinite Fields	247
14.3	Global Fields	249
14.4	Hilbertian Rings	253
14.5	Hilbertianity via Coverings	256
14.6	Non-Hilbertian g -Hilbertian Fields	260
	Exercises	263
	Notes	265
15	The Diamond Theorem	267
15.1	Twisted Wreath Products	267
15.2	The Diamond Theorem	273
15.3	Weissauer's Theorem	277
	Exercises	280
	Notes	280
16	Nonstandard Structures	281
16.1	Higher Order Predicate Calculus	281
16.2	Enlargements	282
16.3	Concurrent Relations	284
16.4	The Existence of Enlargements	286
16.5	Examples	288
	Exercises	289
	Notes	290
17	The Nonstandard Approach to Hilbert's Irreducibility Theorem ...	291
17.1	Criteria for Hilbertianity	291
17.2	Arithmetical Primes Versus Functional Primes	293
17.3	Fields with the Product Formula	295
17.4	Generalized Krull Domains	298
17.5	Examples	301
	Exercises	304
	Notes	305

18 Galois Groups over Hilbertian Fields	307
18.1 Galois Groups of Polynomials	307
18.2 Stable Polynomials	310
18.3 Regular Realization of Finite Abelian Groups	314
18.4 Split Embedding Problems with Abelian Kernels	319
18.5 Embedding Quadratic Extensions in $\mathbb{Z}/2^n\mathbb{Z}$ -Extensions	322
18.6 \mathbb{Z}_p -Extensions of Hilbertian Fields	324
18.7 Symmetric and Alternating Groups over Hilbertian Fields	331
18.8 GAR-Realizations	336
18.9 Embedding Problems over Hilbertian Fields	342
18.10 Regularity of Finite Groups over Complete Discrete-Valued Fields	344
Exercises	346
Notes	346
19 Small Profinite Groups	349
19.1 Finitely Generated Profinite Groups	349
19.2 Abelian Extensions of Hilbertian Fields	354
Exercises	355
Notes	356
20 Free Profinite Groups	357
20.1 The Rank of a Profinite Group	357
20.2 Profinite Completions of Groups	360
20.3 Formations of Finite Groups	364
20.4 Free pro- C Groups	366
20.5 Subgroups of Free Discrete Groups	370
20.6 Open Subgroups of Free Profinite Groups	377
20.7 An Embedding Property	380
Exercises	381
Notes	382
21 The Haar Measure	383
21.1 The Haar Measure of a Profinite Group	383
21.2 Existence of the Haar Measure	386
21.3 Independence	391
21.4 Cartesian Product of Haar Measures	396
21.5 The Haar Measure of the Absolute Galois Group	398
21.6 The PAC Nullstellensatz	401
21.7 Baire's Theorem	402
21.8 The Bottom Theorem	406
21.9 Triviality of a Group of Automorphisms	411
21.10 PAC Fields over Uncountable Hilbertian Fields	414
21.11 On the Stability of Fields	418
21.12 PAC Galois Extensions of Hilbertian Fields	422

21.13 Algebraic Groups	424
Exercises	427
Notes	428
22 Effective Field Theory and Algebraic Geometry	429
22.1 Presented Rings and Fields	429
22.2 Extensions of Presented Fields	432
22.3 Galois Extensions of Presented Fields	437
22.4 The Algebraic and Separable Closures of Presented Fields	438
22.5 Constructive Algebraic Geometry	439
22.6 Presented Rings and Constructible Sets	447
22.7 Basic Normal Stratification	450
Exercises	451
Notes	452
23 The Elementary Theory of e-Free PAC Fields	455
23.1 \aleph_1 -Saturated PAC Fields	455
23.2 The Elementary Equivalence Theorem of \aleph_1 -Saturated PAC Fields	456
23.3 Elementary Equivalence of PAC Fields	459
23.4 On e -Free PAC Fields	462
23.5 The Elementary Theory of Perfect e -Free PAC Fields	464
23.6 The Probable Truth of a Sentence	465
23.7 Change of Base Field	468
23.8 The Fields $K_{\text{sep}}(\sigma_1, \dots, \sigma_e)$	470
23.9 The Transfer Theorem	472
23.10 The Elementary Theory of Finite Fields	474
Exercises	477
Notes	478
24 Problems of Arithmetical Geometry	479
24.1 The Decomposition-Intersection Procedure	479
24.2 C_i -Fields and Weakly C_i -Fields	480
24.3 Perfect PAC Fields which are C_i	485
24.4 The Existential Theory of PAC Fields	487
24.5 Kronecker Classes of Number Fields	488
24.6 Davenport's Problem	491
24.7 On Permutation Groups	495
24.8 Schur's Conjecture	503
24.9 The Generalized Carlitz Conjecture	512
Exercises	515
Notes	517
25 Projective Groups and Frattini Covers	519
25.1 The Frattini Group of a Profinite Group	519
25.2 Cartesian Squares	521
25.3 On C -Projective Groups	525

25.4	Projective Groups	528
25.5	Free Products of Finitely many Profinite Groups	530
25.6	Frattni Covers	531
25.7	The Universal Frattni Cover	536
25.8	Projective Pro- p -Groups	537
25.9	Supernatural Numbers	543
25.10	The Sylow Theorems	545
25.11	On Complements of Normal Subgroups	547
25.12	The Universal Frattni p -Cover	551
25.13	Examples of Universal Frattni p -covers	555
25.14	The Special Linear Group $SL(2, \mathbb{Z}_p)$	557
25.15	The General Linear Group $GL(2, \mathbb{Z}_p)$	560
25.16	Absolute Galois Groups	562
	Exercises	563
	Notes	566
26	PAC Fields and Projective Absolute Galois Groups	569
26.1	Projective Groups as Absolute Galois Groups	569
26.2	Countably Generated Projective Groups	571
26.3	Perfect PAC Fields of Bounded Corank	574
26.4	Basic Elementary Statements	575
26.5	Reduction Steps	579
26.6	Application of Ultraproducts	583
	Exercises	585
	Notes	585
27	Frobenius Fields	587
27.1	The Field Crossing Argument	587
27.2	The Beckmann–Black Problem	590
27.3	The Embedding Property and Maximal Frattni Covers	592
27.4	The Smallest Embedding Cover of a Profinite Group	594
27.5	A Decision Procedure	599
27.6	Examples	600
27.7	Non-projective Smallest Embedding Cover	604
27.8	A Theorem of Iwasawa	605
27.9	Free Profinite Groups of Countable Rank	607
27.10	Application of the Nielsen–Schreier Formula	610
	Exercises	615
	Notes	617
28	Free Profinite Groups of Infinite Rank	619
28.1	Characterization of Free Profinite Groups by Embedding Problems	620
28.2	Applications of Theorem 28.1.7	625
28.3	The Pro- C Completion of a Free Discrete Group	629
28.4	The Group Theoretic Diamond Theorem	631
28.5	The Melnikov Group of a Profinite Group	637

28.6	Homogeneous Pro- C Groups	639
28.7	The S -rank of Closed Normal Subgroups	644
28.8	Closed Normal Subgroups with a Basis Element	647
28.9	Accessible Subgroups	650
	Exercises	657
	Notes	657
29	Random Elements in Profinite Groups	659
29.1	Random Elements in a Free Profinite Group	659
29.2	Random Elements in Free pro- p Groups	664
29.3	Random e -tuples in $\hat{\mathbb{Z}}^n$	666
29.4	The Golod–Shafarevich Inequality	670
29.5	On the Index of Normal Subgroups Generated by Random Elements	678
29.6	Freeness of Normal Subgroups Generated by Random Elements	682
	Notes	685
30	Omega-free PAC Fields	687
30.1	Model Companions	687
30.2	The Model Companion in an Augmented Theory of Fields	691
30.3	New Non-Classical Hilbertian Fields	696
30.4	An Abundance of ω -Free PAC Fields	698
	Notes	701
31	Hilbertian Subfields of Galois Extensions	703
31.1	Small Extensions	704
31.2	Auxiliary Results	707
31.3	The Main Result	711
	Notes	712
32	Undecidability	713
32.1	Turing Machines	713
32.2	Computation of Functions by Turing Machines	714
32.3	Recursive Inseparability of Sets of Turing Machines	718
32.4	The Predicate Calculus	720
32.5	Undecidability in the Theory of Graphs	723
32.6	Assigning Graphs to Profinite Groups	728
32.7	The Graph Conditions	729
32.8	Assigning Profinite Groups to Graphs	731
32.9	Assigning Fields to Graphs	734
32.10	Interpretation of the Theory of Graphs in the Theory of Fields ..	735
	Exercises	737
	Notes	738
33	Algebraically Closed Fields with Distinguished Automorphisms ...	739
33.1	The Base Field K	739
33.2	Coding in PAC Fields with Monadic Quantifiers	741

33.3	The Theory of Almost all $\langle \tilde{K}, \sigma_1, \dots, \sigma_e \rangle$'s	744
33.4	The Probability of Truth Sentences	746
34	Galois Stratification	749
34.1	The Artin Symbol	749
34.2	Conjugacy Domains under Projections	751
34.3	Normal Stratification	756
34.4	Elimination of One Variable	758
34.5	The Complete Elimination Procedure	760
34.6	Model-Theoretic Applications	762
34.7	A Limit of Theories	766
	Exercises	767
	Notes	769
35	Galois Stratification over Finite Fields	771
35.1	The Elementary Theory of Frobenius Fields	771
35.2	The Elementary Theory of Finite Fields	775
35.3	Near Rationality of the Zeta Function of a Galois Formula	779
	Exercises	787
	Notes	789
36	Problems of Field Arithmetic	791
36.1	Solved Problems	791
36.2	Open Problems	795
	References	799
	Index	813
