

Contents

Preface	v
Introduction	1
Computer Ethics?	1
Is There Really a Need for Ethics in Computing?	4
<i>Endnotes</i>	7
<i>References and Recommended Readings</i>	8

PART ONE ETHICAL FOUNDATIONS 11

Chapter 1 Ethical Decision Making 13

Making Moral Decisions	15
Views on the Nature of Reason	22
The Modern View of Reason	22
The Ancient View of Reason	23
Which View of Reason Is Correct?	25
<i>Endnotes</i>	26
<i>Short Essay Questions</i>	29
<i>Long Essay Questions</i>	29
<i>References and Recommended Readings</i>	31

Chapter 2 Is Ethics Possible? 33

Some Bad Reasons for Saying Ethics Has No Basis	33
Some More Thoughtful Defenses of Ethical Skepticism	37

Coda	46
<i>Endnotes</i>	46
<i>Short Essay Questions</i>	50
<i>Long Essay Questions</i>	51
<i>References and Recommended Readings</i>	52

Chapter 3 The Search for a Basis for Ethics 55

Ethical Egoism	56
Pleasure- and Pain-Based Theories of Ethics	58
Classical Utilitarianism	58
Updated Utilitarianism	61
Act Utilitarianism	61
Rule Utilitarianism	62
Cost-Benefit Analysis	62
Intentions, Freedom, and Universality	63
Stoicism	63
The Theories of Immanuel Kant	64
Imperatives	66
Virtue Ethics	70
The Form of the Good	72
Plato and the Form of the Good	73
G.E. Moore and the Indefinability of the Good	75
Butchvarov and the Order of Goods	76
Conclusion	78
Approaching Ethical Analysis	79
<i>Endnotes</i>	81
<i>Short Essay Questions</i>	91
<i>Long Essay Questions</i>	92
<i>References and Recommended Readings</i>	94

PART TWO ETHICS APPLIED TO A COMPUTERIZED WORLD 97

Chapter 4 Software Piracy, Property, and Protection 99

A Brief History of Hardware	99
A Brief History of Software	102
Euclidean Algorithm for Greatest Common Divisor	106
Software Piracy	107
What Is Software Piracy?	107

How Can Software Rights Be Protected?	117
Arguments for Private Property	117
Arguments against Private Property	121
Intellectual Property	122
Software Protection	123
Trade Secrets	123
Trademarks	125
Copyrights	126
Digital Millennium Copyright Act	130
Licensing and Copyprotection	131
Patents	134
The Opposition to Legal Protection of Software	147
What <i>Is</i> Reasonable and Fair?	149
New Issues Raised by the Internet	154
<i>Endnotes</i>	156
<i>Short Essay Questions</i>	161
<i>Long Essay Questions</i>	161
<i>References and Recommended Readings</i>	162

Chapter 5 Computer Crime 167

Kinds of Computer Crime	168
Crimes against Computers	168
Damage to Computers	168
Crimes Using Computers	172
Embezzlement by Computer	172
Theft of Services	176
Theft of Information	177
Fraud	178
Organized (“Mob”) Computer Crime	182
Counterfeiting	184
Computer Crime Victims	187
Computer Criminals	188
Computer Crime Stoppers	188
Failure to Report Computer Crimes	190
The European Cybercrime Treaty	190
Observations	191
<i>Endnotes</i>	191
<i>Short Essay Questions</i>	196
<i>Long Essay Questions</i>	197
<i>References and Recommended Readings</i>	197

Chapter 6 Computer Intruders, Viruses, and All That 201

- More Ways to Steal Using Computers 201
 - Thefts of Money 202
 - Roundoff Errors 202
 - The Salami Technique 203
 - Rounded-Down Bank Interest 204
 - Breaking In and Entering 204
 - Phreaking Then and Now 204
 - Tampering with Communication Signals 206
- A “Hacker” by Any Other Name 207
 - The Original, “Good” Hackers 207
 - The New Breed of Destructive Hackers 208
 - Scanning 209
 - Cracking Passwords 209
 - Espionage 210
 - Other Methods of Illegal Access 211
- Potentially Destructive Activities 212
 - Vengeance Is the Computer’s 212
 - Trojan Horse 213
 - The Christmas Tree Trojan Horse 213
 - The Cookie Monster 213
 - The “Twelve Tricks Trojan” Horse 214
 - The AIDS Virus (Trojan Horse) 215
 - The Burleson Blackmail 215
 - Other “Bombs” 216
- Worms 216
 - More and More Worms 222
- Virus 223
 - Brain Virus 225
 - Lehigh Virus 225
 - The Israeli Virus 225
 - The Malta Disk Destroyer 226
 - The Ping-Pong Virus 226
 - The Datacrime Virus 226
 - The Bulgarian Dark Avenger 226
 - The Michelangelo Virus 227
 - Macintosh Viruses 227
 - The Health-Care Plan Virus 227
 - Operation Moon Angel 228

Kevin Mitnick	228
Melissa Virus	228
Chernobyl Virus	229
The Love Bug	229
Viruses Make It to the Big Screen	229
Misuse of the (Electronic) Mail	229
Is Hacking Moral, Value-Neutral, or Bad?	232
Hacking as Civil Disobedience	234
The Sorcerer's Apprentice	235
What Is to Be Done?	236
<i>Endnotes</i>	241
<i>Short Essay Questions</i>	246
<i>Long Essay Questions</i>	246
<i>References and Recommended Readings</i>	248

Chapter 7 Privacy 253

Why Is Privacy of Value?	254
"I'll Be Watching You"	256
Some Noteworthy Violations of Privacy Involving Computers	257
A National Computerized Criminal History System?	262
The FBI Wiretap Law	264
The Clipper Chip Proposal	264
Computerized Credit	265
Caller ID	267
Computer Matching	268
How the Internet Complicates Privacy Considerations	271
Cookies	272
Communications Decency Act (CDA) and CDA II (COPA)	272
Carnivore	273
The Worst Scenario	274
What Protections Are There for Privacy?	276
Warren and Brandeis Make a Case for Privacy	277
Existing Privacy Legislation	279
The Importance of Privacy	281
<i>Endnotes</i>	283
<i>Short Essay Questions</i>	285
<i>Long Essay Questions</i>	285
<i>References and Recommended Readings</i>	286

Chapter 8 Errors and Reliability 293

Errors	293
Some Noteworthy Computer-Related Errors	296
Defense	296
Space Exploration	298
Commercial Airlines	299
Medical Risks	300
Robot Errors and Robots as Threats	300
Nuclear Energy Threats	302
Computerized Translation	302
Mistaken Identities	303
Billing and Record-Keeping Errors	303
Automatic Payments	305
More “Dead Souls in the Computer”	305
Military Dangers	305
“Surplus” Computers Sold with Sensitive Information Still in Them	306
Miscellaneous Computer-Related Errors	306
Two More Software Fiascos	308
Y2K Bugs	308
Follow-up	308
Reliability	308
Program Verification	311
Software Engineering	311
Program Testing	313
Structured Walkthroughs	313
When All Is Said and Done	314
Observation	314
<i>Endnotes</i>	315
<i>Short Essay Questions</i>	318
<i>Long Essay Questions</i>	319
<i>References and Recommended Readings</i>	320

Chapter 9 The Computer World of Work 323

The Control Revolution	323
Evolution of Systems	325
Three Functions of DNA	326
The Industrial Revolution Crisis of Control	327
Data Processing and an Information Bureaucracy	328

Information Theory and Communication	329
Levels of Problems in Communication	330
The Information Workplace	331
Loss of Jobs, or Just Relocation?	335
The End of Work?	338
“Technostress”?	339
“Technomalady”?	340
Job Monitoring	341
Women in the Computer Workplace	343
Does Gender Matter in Computing?	345
Increased Access for Disabled Workers	347
Telecommuting	348
Changing Job Panorama	352
Employees and Employers	353
Loyalty	353
Whistle-Blowing	356
Who Owns Your Ideas?	358
<i>Endnotes</i>	360
<i>Short Essay Questions</i>	366
<i>Long Essay Questions</i>	367
<i>References and Recommended Readings</i>	368

Chapter 10 Responsibility, Liability, Law, and Professional Ethics 375

Responsibility	375
Liability	377
Computers and the Law	380
Professional Ethics	383
Professional Codes of Ethics	385
What About Microsoft?	387
Are Science and Technology Morally Neutral?	387
<i>Endnotes</i>	391
<i>Short Essay Questions</i>	392
<i>Long Essay Questions</i>	392
<i>References and Recommended Readings</i>	394

Chapter 11 Computers, the Government, and the Military 399

Information and Power	399
-----------------------	-----

Big Government 400
 Record-Keeping and Surveillance 400
 Government Applications of Computers 402
 The National Security Agency 403
 Other Agency Restrictions on Freedoms 406
 Blame the Computer! 406
 Big Business Influences Big Government 407
 Environmental Impact of Computers 409
 Centralization Versus Decentralization of the
 Government 410
 The Information Superhighway 411
 Goals 411
 A Comparison of Concrete and Electronic Highways 412
 The Vision of the Government for NII 413
 Manufacturing and Commerce 414
 Health Care 414
 Education 414
 Environment 416
 Libraries 416
 Some Dissenting Voices 418
 Nuclear Threats 420
 Computers and Nuclear Power 421
 Computers and the Military 422
 Simulations 423
 “War Games” 425
 False Alarms 425
 “Star Wars” by Any Other Name 427
Endnotes 431
Short Essay Questions 435
Long Essay Questions 436
References and Recommended Readings 438

**Chapter 12 The Artificial Intelligensia and
 Virtual Worlds 443**

Artificial Intelligence—Some General Background 443
 Expert Systems 445
 Game-Playing 447
 Theorem-Proving 447

The Turing Test	447
The Imitation Game	449
Objections	450
ELIZA	452
The Chinese Room	453
Artificial Intelligence and Ethics	454
Consciousness	456
Kurzweil's "Age of Spiritual Machines"	457
Hawking's Perspective	457
The Eco-Computer	457
Cybersex	458
Virtual Worlds	460
Virtual Reality	462
<i>Endnotes</i>	464
<i>Short Essay Questions</i>	466
<i>Long Essay Questions</i>	467
<i>References and Recommended Readings</i>	469

Appendix A 477

Paper #1—Computer Ethics	477
Computer Ethics Term Paper Topics	478
Directions for Students	478

Appendix B 485

ACM Code of Ethics and Professional Conduct	485
General Moral Imperatives	486
More Specific Professional Responsibilities	489
Organizational Leadership Imperatives	492
Compliance with the Code	493

Appendix C 495

IEEE Code of Ethics	495
---------------------	-----

Bibliography 497

Index 507
