Chapter 1. Introduction	1
1.1. A brief historical overview	2
1.2. Summary of results	5
Acknowledgments	8
Chapter 2. Background on Coxeter and Artin groups	11
2.1. Coxeter and Artin systems	11
2.2. The weak order	13
2.3. Descents and cover reflections	15
2.4. Parabolic subgroups	15
2.5. Garside factorizations	16
2.6. Coxeter elements and sorting words	17
2.7. The absolute order	20
2.8. Root systems	20
2.9. Inversions and colored inversions	21
2.10. Shards and the shard intersection order	25
2.11. The m -eralized weak order	28
Chapter 3. Subword complexes	33
3.1. Simplicial complexes	33
3.2. Subword complexes	34
3.3. Root configurations	36
3.4. Flips in subword complexes	37
3.5. Dual subword complexes	38
3.6. Coxeter-initial subword complexes	39
3.7. Topology of Coxeter-initial subword complexes	41
Chapter 4. Noncrossing partitions	45
4.1. Classical noncrossing partitions	45
4.2. m -eralized noncrossing partitions	49
4.3. The Cambrian rotation and recurrence	51
4.4. Cambrian posets	53
4.5. Some enumerations	56
Chapter 5. Cluster complexes	59
5.1. Classical cluster complexes	59
5.2. m -eralized compatibility relations	60
5.3. m -eralized cluster complexes	62
5.4. The Cambrian rotation and recurrence	64
5.5. Subword complexes and compatibility	68

5.6.	Topological properties	71
5.7.	Clusters and noncrossing partitions	72
5.8.	The linear m -eralized Cambrian poset and the m -Tamari lattice	73
Chapter 6.	Sortable elements	79
6.1.	m -eralized sortable elements	79
6.2.	Classical sortable elements	80
6.3.	The Cambrian recurrence	82
6.4.	Factorwise sortable elements	82
6.5.	Lattice properties of m -eralized sortable elements	86
6.6.	Cambrian lattices	91
6.7.	The Cambrian rotation	94
6.8.	Sortable elements, noncrossing partitions, and clusters	94
6.9.	Sortable elements and the shard intersection order	98
Chapter 7.	Positive m -eralized structures	103
7.1.	The positive m -eralized structures and their embeddings	103
7.2.	Enumeration of positive m -eralized structures	105
7.3.	Symmetries of the positive m -eralized structures	107
Chapter 8.	Conjectures on rational structures	111
8.1.	Rational Catalan numbers	111
8.2.	∞ -eralized structures and possible rational restrictions	113
Chapter 9.	m -eralized structures in representation theory	117
9.1.	Overview	117
9.2.	Combinatorial constructions	118
9.3.	A brief introduction to hereditary Artin algebras	120
9.4.	Factorizations of Coxeter elements and exceptional sequences	124
9.5.	m -eralized clusters and noncrossing partitions	126
9.6.	The bijection between m -eralized clusters and noncrossing partitions	128
9.7.	Positive Fuß-Catalan combinatorics in representation theory	130
9.8.	Representation theory as a source of symmetries	131
9.9.	m -eralized sortable elements and co-aisles in the derived category	133
9.10.	m -eralized clusters and sortable elements	135
	Bibliography	137
