<i>Preface</i>	<i>page xi</i>
<i>Organization and Chapter Summaries</i>	xv
<i>Notation</i>	xxiii
Standard Notation	xxiii
Specific Notation Used Extensively	xxiv
<i>Acknowledgments</i>	xxv
<b>1 The Main Themes: Approximate Decision and Sublinear Complexity</b>	<b>1</b>
<b>1.1 Introduction</b>	<b>1</b>
1.1.1 Property Testing at a Glance	2
1.1.2 On the Potential Benefits of Property Testers	3
1.1.3 On the Flavor of Property Testing Research	4
1.1.4 Organization and Some Notations	5
<b>1.2 Approximate Decisions</b>	<b>6</b>
1.2.1 A Detour: Approximate Search Problems	6
1.2.2 Property Testing: Approximate Decision Problems	6
1.2.3 Property Testing: Sublinear Complexity	7
1.2.4 Symmetries and Invariants	10
1.2.5 Objects and Representation	13
<b>1.3 Notions, Definitions, Goals, and Basic Observations</b>	<b>14</b>
1.3.1 Basics	15
1.3.2 Ramifications	18
1.3.3 Proximity-Oblivious Testers (POTs)	19
1.3.4 The Algebra of Property Testing	22
1.3.5 Testing via Learning	26
<b>1.4 Historical Notes</b>	<b>28</b>
<b>1.5 Suggested Reading and Exercises</b>	<b>30</b>
Basic Exercises	31
Additional Exercises	36
<b>1.6 Digest: The Most Important Points</b>	<b>38</b>
<b>2 Testing Linearity (Group Homomorphism)</b>	<b>40</b>
<b>2.1 Preliminaries</b>	<b>40</b>
<b>2.2 The Tester</b>	<b>40</b>
<b>2.3 Chapter Notes</b>	<b>45</b>

<b>3 Low-Degree Tests</b>	49
3.1 A Brief Introduction	49
3.2 A Kind of Intuition (which may be skipped)	50
3.2.1 The Univariate Case	50
3.2.2 The Multivariate Case	51
3.2.3 Linking the Above Intuition to the Actual Proof	52
3.3 Background	53
3.4 The Tester	57
3.4.1 Analysis of the Tester	58
3.4.2 Digest (or an Abstraction)	64
3.5 Chapter Notes	65
Exercises	67
<b>4 Testing Monotonicity</b>	69
4.1 Introduction	69
4.2 Boolean Functions on the Boolean Hypercube	70
4.2.1 The Edge Test	70
4.2.2 Path Tests	75
4.3 Multivalued Functions on the Discrete Line	77
4.3.1 A Tester Based on Binary Search	77
4.3.2 Other Testers	81
4.4 Multivalued Functions on the Hypergrid	82
4.4.1 Dimension Reduction (Proof of Lemma 4.13)	84
4.4.2 Range Reduction (Overview of the Proof of Lemma 4.14)	85
4.5 Chapter Notes	87
4.5.1 History and Credits	87
4.5.2 Related Problems	88
4.5.3 Exercises	89
<b>5 Testing Dictatorships, Juntas, and Monomials</b>	92
5.1 Introduction	92
5.2 Testing Dictatorship via Self-correction	93
5.2.1 The Tester	94
5.2.2 Testing Monomials	97
5.2.3 The Self-correction Paradigm: An Abstraction	101
5.3 Testing Juntas	105
5.4 Chapter Notes	112
Basic Exercises	112
Additional Exercises	115
<b>6 Testing by Implicit Sampling</b>	120
6.1 Introduction	120
6.2 Testing Subsets of $k$ -Juntas	121
6.3 Extension to Properties Approximated by Subsets of $k$ -Juntas	128
6.4 Chapter Notes	131
On Testing Problems Associated with Sets of Boolean Functions	131
Exercises	132

<b>7 Lower Bounds Techniques</b>	134
7.1 Introduction	134
7.2 Indistinguishability of Distributions	135
7.2.1 The Actual Method	137
7.2.2 Illustrating the Application of the Method	140
7.2.3 Further Reflections	141
7.3 Reduction from Communication Complexity	142
7.3.1 Communication Complexity	143
7.3.2 The Methodology	144
7.3.3 Illustrating the Application of the Methodology	146
7.4 Reduction among Testing Problems	149
7.5 Lower Bounds for Restricted Testers	153
7.5.1 One-Sided Error Testers	153
7.5.2 Nonadaptive Testers	154
7.6 Chapter Notes	157
Exercises	157
<b>8 Testing Graph Properties in the Dense Graph Model</b>	162
8.1 The General Context: Introduction to Testing Graph Properties	163
8.1.1 Basic Background	163
8.1.2 Three Models of Testing Graph Properties	164
8.2 The Dense Graph Model: Some Basics	167
8.2.1 The Actual Definition	167
8.2.2 Abuses of the Model: Trivial and Sparse Properties	169
8.2.3 Testing Degree Regularity	170
8.2.4 Digest: Levin's Economical Work Investment Strategy	175
8.3 Graph Partition Problems	176
8.3.1 Testing Bipartiteness	180
8.3.2 The Actual Definition and the General Result	184
8.4 Connection to Szemerédi's Regularity Lemma	187
8.4.1 The Regularity Lemma	188
8.4.2 Subgraph Freeness	189
8.4.3 The Structure of Properties That Have Size-Oblivious Testers	196
8.5 A Taxonomy of the Known Results	197
8.5.1 Testability in $q(\epsilon)$ Queries, for any Function $q$	199
8.5.2 Testability in $\text{poly}(1/\epsilon)$ Queries	200
8.5.3 Testability in $\tilde{O}(1/\epsilon)$ Queries	201
8.5.4 Additional Issues	202
8.6 Chapter Notes	204
8.6.1 Historical Perspective and Credits	204
8.6.2 Testing versus Other Forms of Approximation	206
8.6.3 A Contrast with Recognizing Graph Properties	207
8.6.4 Exercises	208
<b>9 Testing Graph Properties in the Bounded-Degree Graph Model</b>	213
9.1 The Bounded-Degree Model: Definitions and Issues	214
9.2 Testing by a Local Search	218
9.2.1 Testing Subgraph Freeness	218

## CONTENTS

9.2.2	Testing Degree Regularity	219
9.2.3	Testing Connectivity	221
9.2.4	Testing $t$ -Connectivity (Overview and One Detail)	223
9.2.5	Testing Cycle-Freeness (with Two-Sided Error)	227
<b>9.3</b>	<b>Lower Bounds</b>	<b>230</b>
9.3.1	Bipartiteness	230
9.3.2	Applications to Other Properties	232
9.3.3	Linear Lower Bounds	235
<b>9.4</b>	<b>Testing by Random Walks</b>	<b>236</b>
9.4.1	Testing Bipartiteness	236
9.4.2	One-Sided Error Tester for Cycle-Freeness	243
<b>9.5</b>	<b>Testing by Implementing and Utilizing Partition Oracles</b>	<b>248</b>
9.5.1	The Simpler Implementation	252
9.5.2	The Better Implementation	257
<b>9.6</b>	<b>A Taxonomy of the Known Results</b>	<b>259</b>
9.6.1	Testability in $q(\epsilon)$ Queries, for Any Function $q$	259
9.6.2	Testability in $O(k^{1/2}) \cdot \text{poly}(1/\epsilon)$ Queries	260
9.6.3	Additional Issues	261
<b>9.7</b>	<b>Chapter Notes</b>	<b>262</b>
9.7.1	Historical Perspective and Credits	262
9.7.2	Directed Graphs	263
9.7.3	Exercises	264
<b>10</b>	<b>Testing Graph Properties in the General Graph Model</b>	<b>271</b>
<b>10.1</b>	<b>The General Graph Model: Definitions and Issues</b>	<b>272</b>
10.1.1	Perspective: Comparison to the Two Previous Models	272
10.1.2	The Actual Definition	273
<b>10.2</b>	<b>On Obtaining Testers for the Current Model</b>	<b>275</b>
10.2.1	An Explicit Adaptation: The Case of Connectivity	276
10.2.2	Using a Reduction: The Case of Bipartiteness	277
<b>10.3</b>	<b>Estimating the Average Degree and Selecting Random Edges</b>	<b>281</b>
10.3.1	Lower Bounds	282
10.3.2	Algorithms	283
<b>10.4</b>	<b>Using Adjacency Queries: The Case of Bipartiteness</b>	<b>293</b>
<b>10.5</b>	<b>Chapter Notes</b>	<b>296</b>
10.5.1	Gaps between the General Graph Model and the Bounded-Degree Model	296
10.5.2	History and Credits	298
10.5.3	Reflections	298
10.5.4	Exercises	300
<b>11</b>	<b>Testing Properties of Distributions</b>	<b>304</b>
<b>11.1</b>	<b>The Model</b>	<b>304</b>
11.1.1	Testing Properties of Single Distributions	305
11.1.2	Testing Properties of Pairs of Distributions	307
11.1.3	Label-invariant Properties	308
11.1.4	Organization	309

## CONTENTS

<b>11.2</b>	Testing Equality to a Fixed Distribution	309
11.2.1	The Collision Probability Tester and Its Analysis	310
11.2.2	The General Case (Treated by a Reduction to Testing Uniformity)	313
11.2.3	A Lower Bound	319
<b>11.3</b>	Testing Equality between Two Unknown Distributions	320
11.3.1	Detour: Poisson Distributions	321
11.3.2	The Actual Algorithm and Its Analysis	324
11.3.3	Applications: Reduction to the Case of Small Norms	330
<b>11.4</b>	On the Complexity of Testing Properties of Distributions	335
<b>11.5</b>	Chapter Notes	340
11.5.1	History and Credits	340
11.5.2	Exercises	341
<b>12</b>	<b>Ramifications and Related Topics</b>	348
<b>12.1</b>	Tolerant Testing and Distance Approximation	348
<b>12.2</b>	Additional Promises on the Input	351
<b>12.3</b>	Sample-Based Testers	352
<b>12.4</b>	Testing with Respect to Other Distance Measures	353
<b>12.5</b>	Local Computation Algorithms	355
12.5.1	Definitions	356
12.5.2	Finding Huge Structures	358
12.5.3	Local Reconstruction	360
<b>12.6</b>	Noninteractive Proofs of Proximity (MAPs)	361
<b>12.7</b>	Chapter Notes	365
12.7.1	Historical Notes	365
12.7.2	Massively Parameterized Properties	366
12.7.3	Exercises	366
<b>13</b>	<b>Locally Testable Codes and Proofs</b>	370
<b>13.1</b>	Introduction	371
<b>13.2</b>	Definitions	372
13.2.1	Codeword Testers	372
13.2.2	Proof Testers	374
13.2.3	Ramifications and Relation to Property Testing	376
13.2.4	On Relating Locally Testable Codes and Proofs	382
<b>13.3</b>	Results and Ideas	383
13.3.1	The Mere Existence of Locally Testable Codes and Proofs	384
13.3.2	Locally Testable Codes and Proofs of Polynomial Length	387
13.3.3	Locally Testable Codes and Proofs of Nearly Linear Length	397
<b>13.4</b>	Chapter Notes	403
13.4.1	Historical Notes	403
13.4.2	On Obtaining Superfast testers	404
13.4.3	The Alternative Regime: LTCs of Linear Length	405
13.4.4	Locally Decodable Codes	407
13.4.5	Exercises	408

## CONTENTS

<b>Appendix A: Probabilistic Preliminaries</b>	411
<b>A.1</b> Notational Conventions	411
<b>A.2</b> Some Basic Notions and Facts	412
<b>A.3</b> Basic Facts Regarding Expectation and Variance	413
<b>A.4</b> Three Inequalities	415
A.4.1 Markov's Inequality	415
A.4.2 Chebyshev's Inequality	416
A.4.3 Chernoff Bound	419
A.4.4 Pairwise Independent versus Totally Independent Sampling	422
<b>Appendix B: A Mini-Compendium of General Results</b>	423
<b>Appendix C: An Index of Specific Results</b>	427
<i>References</i>	429
<i>Index</i>	443
