Table of Contents

	Preface	VII
Chapter 1	High Polymers and Plastics	1
	1.1 Polymerization, Introduction and Mechanism of Polymerization	1
	1.2 Plastics as Engineering Materials	13
	1.3 Preparation, Properties and Applications of Polyethene	17
	1.4 Elastomers: Natural Rubber	27
	1.5 Synthetic Rubbers: Buna S, Buna N, Thiokol and Polyurethanes	33
	1.6 Composite Materials and Fiber Reinforced Plastics	37
Chapter 2	Fuel Technology	43
	2.1 Fuels: Classification, Calorific Value, HCV and LCV	43
	2.2 Coal	51
	2.3 Liquid Fuels, Petroleum and Refining	56
	2.4 Power Alcohol	65
	2.5 Combustion	69
Chapter 3	Electrochemical Cells and Corrosion	82
	3.1 Galvanic Cells, Reversible and Irreversible Cells, Single Electrode Potential	82
	3.2 Electro Chemical Series and uses of this Series: Standard Electrodes and Concentration Cells	91
	3.3 Batteries-Dry Cell, Ni-Cd Cells, Ni-Metal Hydride Cells, Li Cells and Zinc-Air Cells	100
	3.4 Corrosion	111
	3.5 Formation of Galvanic Cells by Different Metals, by Concentration Cells, by Differential Aeration and Waterline Corrosion	120
	3.6 Passivity of Metals, Pitting Corrosion and Galvanic Series	122
	3.7 Protective Coatings: Surface Preparation	130
Chapter 4	Chemistry of Advanced Materials	137
	4.1 Nanomaterials: Sol-Gel Method and Chemical Reduction Method of Preparation	137
	4.2 Carbon Nanotubes and Fullerenes: Types, Preparation, Properties and Applications	140
	4.3 Liquid Crystals: Types and Applications	148
	4.4 Superconductors: Type-I and Type-II, Properties and Applications	151
	4.5 Green Synthesis: Principles, 3 or 4 Methods of Synthesis with Examples and R4M4 Principles	155

Chapter 5	Solid State Chemistry	161
	5.1 Types of Solids	161
	5.2 Non-Elemental Semiconducting Materials: Stoichiometric, Controlled Valency and Chalcogen Photo/Semiconductors	178
	5.3 Preparation of Semiconductors and Semiconductor Devices	182
	5.4 Insulators: Electrical and Electronic Applications	186
	5.5 Magnetic Materials: Ferro and Ferrimagnetism	187
Chapter 6	Non-Conventional Energy Sources and Storage Devices	198
	6.1 Application and Conversion of Solar Energy	198
	6.2 Photovoltaic Cell: Design, Working and its Importance	203
	6.3 Non-Conventional Energy Sources: Hydropower Include Setup a Hydropower Plant	205
	6.4 Geothermal Energy: Schematic Diagram of a Geothermal Power Plant	208
	6.5 Tidal and Wave Power: Design and Working-Movement of Tides and their Effect on Sea Level	210
	6.6 Ocean Thermal Energy	216
	6.7 Biomass and Biofuels	221
	6.8 Fuel Cells: Cell Representation and H ₂ -O ₂ Fuel Cell: Design and Working, Advantages and Limitations	225
	6.9 Types of Fuel Cells: Alkaline Fuel Cell, Methanol-Oxygen, Phosphoric Acid Fuel Cells and Molten Carbonate Fuel Cells	229
