

Spine and Spinal Cord Tumors

Classification, Management, and Treatment

Andrew A. Fanous, MD, FAANS, FCNS

Section Chief

Department of Neurological Surgery

INOVA Alexandria Hospital;

Assistant Professor

Department of Neurosurgery

University of Virginia

Alexandria, Virginia, USA

Michael Y. Wang, MD, MBA, FAANS

Professor

Department of Neurological Surgery & Rehab Medicine

Spine Fellowship Director

Chief of Neurosurgery

University of Miami Hospital

University of Miami Miller School of Medicine

Miami, Florida, USA

Allan D. Levi, MD, PhD

Professor and Chairman

Department of Neurological Surgery

University of Miami Miller School of Medicine;

Chief of Neurosurgery

Robert M. Buck Distinguished Chair

Department of Neurological Surgery

Jackson Memorial Hospital

Miami, Florida, USA

Foreword	xxi
Preface	xxii
Contributors	xxiii
Part I: Introduction to Spinal Tumors	
1. Spine and Spinal Cord Anatomy	3
<i>Andrew A. Fanous</i>	
1.1 Introduction	3
1.2 Cervical Spine Anatomy	3
1.2.1 Atlantoaxial Spine	4
1.2.2 Subaxial Spine	5
1.2.3 Ligaments of the Cervical Spine	6
1.2.4 Cervical Spinal Canal	7
1.2.5 Neural Elements of the Cervical Spine	8
1.2.6 Vascular Anatomy of the Cervical Spine	8
1.3 Thoracic Spine Anatomy	8
1.3.1 Thoracic Vertebral Column	8
1.3.2 Ligaments of the Thoracic Spine	9
1.3.3 Thoracic Spinal Canal	10
1.3.4 Neural Elements of the Thoracic Spine	10
1.3.5 Vascular Anatomy of the Thoracic Spine	10
1.4 Lumbar Spine Anatomy	10
1.4.1 Lumbar Vertebral Column	10
1.4.2 Ligaments of the Lumbar Spine	11
1.4.3 Lumbar Spinal Canal	11
1.4.4 Neural Elements of the Lumbar Spine	11
1.4.5 Vascular Anatomy of the Lumbar Spine	12
1.5 Sacral and Coccygeal Spine Anatomy	12
1.5.1 Sacral and Coccygeal Vertebral Column	12
1.5.2 Ligaments of the Sacral and Coccygeal Spine	13
1.5.3 Sacral Spinal Canal	14
1.5.4 Neural Elements of the Sacral and Coccygeal Spine	14
1.5.5 Vascular Anatomy of the Sacral and Coccygeal Spine	14
1.6 Spinal Cord Anatomy	14
1.6.1 Spinal Cord Topography	14
1.6.2 Spinal Cord Tracts	15
1.6.3 Nerve Roots	16
1.6.4 Blood Supply of the Spinal Cord	16
2. Classification of Vertebral and Spinal Neoplasms	19
<i>Yingda Li, Anil Mahavadi, and Michael Y. Wang</i>	
2.1 Introduction	19
2.2 Anatomical Classification	19
2.3 Extradural Tumors	19
2.3.1 Osteoblastic versus Osteolytic Lesions	20
2.3.2 Extradural Tumors Based on Location	20
2.4 Intradural Extramedullary Tumors	21
2.4.1 Meningiomas versus Nerve Sheath Tumors	21
2.5 Intramedullary Tumors	22
2.5.1 Ependymoma	22
2.5.2 Astrocytoma	22
2.5.3 Hemangioblastoma	23
2.6 Pathological Classification	24
2.7 Primary versus Secondary Spinal Tumors	25
2.7.1 Primary Vertebral Tumors	25
2.7.2 Primary Intradural Tumors	25
2.7.3 Secondary Spinal Tumors	26
2.8 Benign versus Malignant Spinal Tumors	26
2.8.1 Benign Vertebral Neoplasms	27
2.8.2 Benign Intradural Neoplasms	27
2.8.3 Malignant Spinal Tumors	27

2.9	Surgical Classification	28	2.14	Surgical Classification: WBB and Tomita Systems, and GSTSG Strategy	29
2.10	Decision-Making Algorithms: The NOMS Framework	28	2.14.1	Surgical Classification of Primary Vertebral Malignancies (WBB System)	29
2.11	Classification of Spinal Cord Compression Severity: The ESCC Scale	28	2.14.2	Surgical Classification of Spinal Metastases (Tomita)	30
2.12	Classification of Spinal Stability: The SINS	29	2.14.3	Classification of Surgical Strategy (GSTSG)	31
2.12.1	Spinal Instability Neoplastic Score	29	2.15	Conclusions	32
2.13	Prognostic Indices	29			
3.	Neurological Presentation and Clinical Diagnosis of Spine Tumors	35			
	<i>Andrew M. Hersh, Abdel-Hameed Al-Mistarehi, Danielle Dang, and Daniel Lubelski</i>				
3.1	Introduction	35	3.4.2	Bowel and Bladder Function	38
3.2	Neck or Back Pain	35	3.5	Grading and Scoring Systems	39
3.2.1	Red Flags of Back Pain	35	3.6	Radiographic Evaluation	39
3.3	Radiculopathy	36	3.7	Electrophysiology	41
3.4	Myelopathy	36	3.8	Laboratory Markers	41
3.4.1	Motor and Sensory Deficits	37	3.9	Conclusion	41
4.	Radiologic Evaluation of Spinal Tumors	45			
	<i>Nicholas G. Matthees and Jeremy N. Hughes</i>				
4.1	Imaging Modalities Used to Evaluate Spinal Tumors	45	4.2.1	Extradural Tumors	46
4.1.1	Plain Film Radiographs	45	4.2.2	Intradural Extramedullary Tumors of the Spine	50
4.1.2	Computed Tomography	45	4.2.3	Intramedullary Tumors of the Spine	53
4.1.3	Myelography	45	4.3	Conclusion	56
4.1.4	Magnetic Resonance Imaging	45			
4.2	Imaging of Tumors	45			
5.	Image-Guided Percutaneous Biopsy for Spinal Tumors	57			
	<i>Zachary M. Wilseck, Adam A. Khan, Leanne Y. Lin, Joseph J. Gemmete, and Venu Vadlamudi</i>				
5.1	Introduction	57	5.3.1	Workup	60
5.2	Imaging of Spinal Tumors	57	5.3.2	Imaging Guidance	60
5.2.1	Imaging Approach to Spinal Tumors	57	5.3.3	Cervical Spine	60
5.2.2	Common Primary Spinal Tumors	58	5.3.4	Thoracic Spine	60
5.2.3	Imaging Modalities	59	5.3.5	Lumbar Spine	61
5.3	Image-Guided Spine Biopsy	60	5.3.6	On-Site Pathology	62
			5.4	Complications	63
			5.5	Conclusion	64

Part II: Primary Vertebral Column Tumors

6.	Surgical Grading of Primary Spinal Column Tumors	69			
	<i>Megan A. Vaughan and Mateo Ziu</i>				
6.1	Introduction	69	6.1.5	Axial Skeleton Tumor Grading	71
6.1.1	Spinal Column Tumors Statistics	69	6.1.6	Utilization of the Staging for Surgical Planning	72
6.1.2	Diagnostic Tools for Primary Vertebral Column Tumors	69	6.2	Conclusions	72
6.1.3	The Role of Biopsy	69			
6.1.4	Staging and Grading of Primary Vertebral Column Tumors	70			
7.	Benign Tumors of the Vertebral Column in Adults	77			
	<i>Ziya L. Gokaslan</i>				
7.1	Tumors	77	7.1.3	Aneurysmal Bone Cysts	79
7.1.1	Vertebral Hemangiomas	77	7.1.4	Giant Cell Tumors	80
7.1.2	Osteoid Osteomas and Osteoblastomas	78	7.1.5	Chondroma and Osteochondroma	81
8.	Malignant Tumors of the Vertebral Column in Adults	85			
	<i>Santino Ottavio Tomasi, Andrew A. Fanous, and Stefano Boriani</i>				
8.1	Introduction	85	8.3.3	Fibrosarcoma	88
8.2	Staging	85	8.3.4	Malignant Fibrous Histiocytoma	89
8.3	Classification	86	8.3.5	Chordoma	89
8.3.1	Osteosarcoma	86	8.3.6	Plasmacytoma and Multiple Myeloma	91
8.3.2	Chondrosarcoma	88	8.3.7	Ewing's Sarcoma	93
			8.3.8	Lymphoma	93
9.	Non-Neoplastic Lesions of the Vertebral Column	97			
	<i>Kevin Ted Huang and John H. Chi</i>				
9.1	Introduction	97	9.7	Fibrous Dysplasia	100
9.2	Schmorl's Nodes	97	9.8	Aneurysmal Bone Cysts	101
9.3	Enostosis	98	9.9	Hemangiomas	102
9.4	Eosinophilic Granuloma	98	9.10	Infections Mimicking Vertebral Tumors	103
9.5	Brown Tumor	98	9.11	Conclusions	103
9.6	Paget's Disease of Bone	99			
10.	Primary Tumors of the Sacrum in Adults	107			
	<i>Andrew Alvarez, Danny Lee, and Francis J. Hornicek</i>				
10.1	Introduction	107	10.2.1	Overview and Clinical Presentation	108
10.2	Chordoma	108	10.2.2	Workup and Management	108
			10.3	Giant Cell Tumors	109

10.3.1	Overview and Clinical Presentation	109	10.5.1	Overview and Clinical Presentation	110
10.3.2	Workup and Management	109	10.5.2	Workup and Management	111
10.4	Neurogenic Tumors	109	10.6	Hematologic Neoplasms	112
10.4.1	Overview and Clinical Presentation	109	10.6.1	Overview and Clinical Presentation	112
10.4.2	Workup and Management	110	10.6.2	Workup and Management	112
10.5	High-Grade Osseous Tumors	110	10.7	Conclusions	112
11.	Vertebral Column Tumors in the Pediatric Population	115			
	<i>Grace Thiong'o and James Rutka</i>				
11.1	Classification and Staging	115	11.5.5	Osteochondroma	118
11.2	Clinical Presentation	115	11.5.6	Eosinophilic Granuloma	118
11.3	Diagnostic Modalities	115	11.6	Primary Malignant Tumors	121
11.4	Treatment and Prognosis	115	11.6.1	Chordoma	121
11.5	Primary Benign Tumors	115	11.6.2	Ewing's Sarcoma	122
11.5.1	Aneurysmal Bone Cyst	115	11.6.3	Chondrosarcoma	122
11.5.2	Osteoid Osteoma	117	11.6.4	Osteosarcoma	122
11.5.3	Osteoblastoma	118	11.7	Metastatic Lesions	123
11.5.4	Giant Cell Tumor	118	11.7.1	Metastatic Neuroblastoma	123
12.	Pathology of Primary Vertebral Column Neoplasms	127			
	<i>Carolina Mantilla Grosso and Adriana Olar</i>				
12.1	Introduction	127	12.2.6	Hemangioma of Bone	132
12.2	Benign Vertebral Column Neoplasms	127	12.2.7	Malignant Vertebral Column Neoplasms	133
12.2.1	Osteoid Osteoma	127	12.2.8	Plasmacytoma and Plasma Cell Myeloma	133
12.2.2	Osteoblastoma	128	12.2.9	Chordoma	134
12.2.3	Giant Cell Tumor of Bone	129	12.2.10	Osteosarcoma	135
12.2.4	Aneurysmal Bone Cyst	130	12.2.11	Chondrosarcoma	137
12.2.5	Osteochondroma	131	12.2.12	Primary Non-Hodgkin's Lymphoma of Bone	138
			12.2.13	Ewing's Sarcoma	139
Part III: Spinal Cord, Meningeal, and Peripheral Nerve Tumors					
13.	Staging of Spinal Cord Neoplasms	147			
	<i>Svetlana Kvint, Paul J. Marcotte, James M. Schuster, and William C. Welch</i>				
13.1	Introduction	147	13.3	Preoperative Neurological Status	151
13.2	Tumor Histology	147	13.4	Extent of Resection	151
13.2.1	Intradural Intramedullary	147	13.5	Conclusion	151
13.2.2	Intradural Extramedullary	149			

14. Cellular and Molecular Biology of the Spinal Cord, Meningeal, and Peripheral Nerve Neoplasms	155		
<i>Joseph Driver and John H. Chi</i>			
14.1 Introduction	155	14.5 Hemangioblastoma	157
14.2 Astrocytoma	155	14.6 Meningioma	158
14.2.1 Grade I Astrocytoma (Pilocytic)	155	14.7 Schwannoma	159
14.2.2 Grade II Astrocytoma	156	14.7.1 Schwannomatosis	160
14.2.3 Grade III/IV Astrocytoma	156	14.8 Neurofibroma	160
14.3 Ependymoma	156	14.9 Malignant Peripheral Nerve Sheath Tumor	160
14.4 Myxopapillary Ependymoma	157		
14.4.1 Subependymoma	157		
14.4.2 Ependymoma	157		
15. Intramedullary Spinal Cord Tumors in Adults	165		
<i>Vyacheslav Makler and Allan D. Levi</i>			
15.1 Introduction	165	15.6 Tumor Types	168
15.2 World Health Organization Grading	165	15.6.1 Ependymomas	168
15.3 Epidemiology	165	15.6.2 Astrocytomas	169
15.4 Genetic Syndromes	166	15.6.3 Hemangioblastomas	170
15.5 Clinical Presentation	167	15.6.4 Metastasis	171
		15.6.5 Primary CNS Lymphoma	171
		15.6.6 Rare Tumors and Mimics	171
16. Intradural Extramedullary Spinal Tumors in Adults	175		
<i>Robert J. Rothrock, Turki Elarjani, and Allan D. Levi</i>			
16.1 Introduction	175	16.5.2 Histology and Pathophysiology	178
16.2 Spinal Meningioma	175	16.5.3 Imaging	178
16.2.1 Epidemiology	175	16.6 Paraganglioma	179
16.2.2 Histology and Pathophysiology	175	16.6.1 Epidemiology	179
16.2.3 Imaging	175	16.6.2 Histology and Pathophysiology	179
16.3 Schwannoma	176	16.6.3 Imaging	179
16.3.1 Epidemiology	176	16.7 Solitary Fibrous Tumor/Hemangiopericytoma	179
16.3.2 Histology and Pathophysiology	176	16.7.1 Epidemiology	179
16.3.3 Imaging	176	16.7.2 Histology and Pathophysiology	179
16.4 Neurofibroma	176	16.7.3 Imaging	179
16.4.1 Epidemiology	176	16.8 Malignant Peripheral Nerve Sheath Tumor	179
16.4.2 Histology and Pathophysiology	177	16.8.1 Epidemiology	179
16.4.3 Imaging	177	16.8.2 Histology and Pathophysiology	179
16.5 Myxopapillary Ependymoma	178	16.8.3 Imaging	179
16.5.1 Epidemiology	178		

16.9	Leptomeningeal Metastasis	180	16.9.3	Imaging	180
16.9.1	Epidemiology	180	16.10	Conclusion	180
16.9.2	Histology and Pathophysiology	180			
17.	Pediatric Spinal Cord Neoplasms				183
	<i>Mark Stephens, Audrey Grossen, and Andrew Jea</i>				
17.1	Introduction	183	17.3	Intradural Extramedullary Tumors	187
17.2	Extradural Spinal Cord Tumors	183	17.3.1	Neurofibroma	187
17.2.1	Osteoid Osteoma	183	17.3.2	Schwannoma	187
17.2.2	Osteoblastoma	184	17.3.3	Myxopapillary Ependymoma	188
17.2.3	Giant Cell Tumor	185	17.4	Intradural Intramedullary Tumors	188
17.2.4	Aneurysmal Bone Cyst	185	17.4.1	Astrocytoma	188
17.2.5	Eosinophilic Granuloma	185	17.4.2	Ependymoma	188
17.2.6	Hemangioma	185	17.4.3	Dermoid Tumors	189
17.2.7	Osteogenic Sarcoma	187	17.4.4	Epidermoid Tumors	189
17.2.8	Ewing's Sarcoma	187	17.4.5	Miscellaneous Lesions	190
17.2.9	Metastatic Lesions	187			
18.	Pathology of Spinal Cord Neoplasms				195
	<i>Yanna Ding and Adriana Olar</i>				
18.1	Circumscribed Astrocytic Gliomas	195	18.6.2	Extraventricular Neurocytoma	212
18.1.1	Pilocytic Astrocytoma	195	18.7	Paraganglioma	214
18.1.2	Pleomorphic Xanthoastrocytoma	198	18.7.1	Definition and Grading	214
18.2	Adult-Type Diffuse Glioma	199	18.7.2	Macroscopy	214
18.2.1	Definition and Grading	199	18.7.3	Histopathology	214
18.2.2	Macroscopy	199	18.7.4	Molecular Features and/or Classification	214
18.2.3	Histopathology	199	18.8	Peripheral Nerve Sheath Tumors	214
18.2.4	Molecular Pathology	199	18.8.1	Definition and Grading	214
18.3	Diffuse Pediatric-Type Gliomas	203	18.8.2	Macroscopy	216
18.4	Ependymal Tumors	205	18.8.3	Histopathology	216
18.4.1	Definition and Grading	205	18.8.4	Molecular Features	218
18.4.2	Macroscopy	205	18.9	Primary Lymphoma of the Spinal Cord	220
18.4.3	Histopathology	206	18.9.1	Definition and Grading	220
18.4.4	Molecular Pathology	207	18.9.2	Macroscopy	221
18.5	Meningioma	207	18.9.3	Histopathology	221
18.5.1	Definition and Grading	207	18.9.4	Molecular Features	221
18.5.2	Macroscopy	207	18.10	Primary Histiocytic Tumors of the Spinal Cord	222
18.5.3	Histopathology	207	18.10.1	Definition and Grading	222
18.5.4	Molecular Features	208	18.10.2	Macroscopy	224
18.6	Glioneuronal Tumors	210	18.10.3	Histopathology	224
18.6.1	Ganglioglioma	210	18.10.4	Molecular Features	224

18.11 Primary Germ Cell Tumors of the Spinal Cord	224	18.11.2 Macroscopy	225
18.11.1 Definition and Grading	224	18.11.3 Histopathology	226
		18.11.4 Molecular Features	229
Part IV: Metastatic Spinal Tumors			
19. Pathophysiology, Classification, and Staging of Metastatic Spinal Tumors	243		
<i>Yasuaki Tokuhashi</i>			
19.1 Pathophysiology	243	19.2.2 Classifications for Neurological Involvement and Spinal Instability	246
19.1.1 Cancer Metastasis to a Distant Organ	243	19.2.3 Scoring Systems for Predicting Life Expectancy	246
19.1.2 Development and Growth of Bone Metastasis ..	243	19.3 Conclusions	252
19.2 Classification and Staging	244		
19.2.1 Anatomical Classification	244		
20. Pathology of Metastatic Spinal and Vertebral Column Neoplasms	253		
<i>Sarah E. Wilken and Adriana Olar</i>			
20.1 Introduction	253	20.5.1 Macroscopy and Histopathology	261
20.2 Approach to Intraoperative Frozen Section of Spinal Metastases	253	20.5.2 Immunohistochemistry	261
20.2.1 The Pathologist's Review of Patient History and Imaging	253	20.5.3 Molecular Pathology	261
20.2.2 Preoperative Patient Workup in Metastasis of Unknown Origin	254	20.6 Renal Cell Carcinoma	262
20.2.3 Limitation of Intraoperative Frozen Section on Spinal Lesions	254	20.6.1 Macroscopy and Histopathology	262
20.2.4 Intraoperative Tissue Triage	255	20.6.2 Immunohistochemistry	263
20.2.5 Effects of Decalcification on Immunohistochemistry and Molecular Studies ..	255	20.6.3 Molecular Pathology	263
20.3 Lung Carcinoma	256	20.7 Carcinomas of Digestive System Origin	263
20.3.1 Macroscopy and Histopathology	257	20.7.1 Adenocarcinoma	263
20.3.2 Immunohistochemistry	258	20.7.2 Neuroendocrine Tumors	265
20.3.3 Molecular Pathology	258	20.7.3 Cholangiocarcinoma	265
20.4 Breast Carcinoma	259	20.7.4 Hepatocellular Carcinoma	266
20.4.1 Macroscopy and Histopathology	259	20.8 Hematolymphoid Malignancies	267
20.4.2 Immunohistochemistry	260	20.9 Melanoma	267
20.4.3 Molecular Pathology	260	20.9.1 Macroscopy and Histopathology	267
20.5 Prostate Carcinoma	261	20.9.2 Immunohistochemistry	268
		20.9.3 Molecular Pathology	268
21. Scoring Systems and Management of Metastatic Spinal Tumors	275	20.10 Drop Metastases	268
<i>Esteban Quiceno, Mohamed A.R. Soliman, Asham Khan, Jeffrey P. Mullin, and John Pollina</i>			
21.1 Introduction	275	21.2 Scores that Guide Surgical Management According to Predicted Life Expectancy	275

21.2.1	Revised Tokunashi Score	275	21.3	Scores that Determine the Risk of Spinal Instability	281
21.2.2	Tomita Score	276			
21.2.3	van der Linden and Bollen Scores	276			
21.2.4	Oswestry Risk Index	277	21.3.1	Spine Instability Neoplastic Score (SINS)	281
21.2.5	New England Spinal Metastasis Score (NESMS)	277	21.4	Scores that Classify Tumors According to Locations	282
21.2.6	Skeletal Oncology Research Group (SORG) Nomogram and Algorithm	278			
21.2.7	The Global Spine Tumor Study Group (GSTSG) Risk Calculator	278	21.4.1	Surgical Classification of Spinal Tumors—Tomita	282
21.2.8	PathFx	278	21.4.2	Bilsky Score	283
21.2.9	Other Life-Expectancy Predicting Scoring Systems	279	21.5	Management Framework	283
21.2.10	Comparison of Survival Scores and Future Applications	281	21.6	Case Example	284
			21.7	Conclusions	285
22.	Metastatic Tumors of the Sacrum in Adults	287			
	<i>Danny Lee, Andrew Alvarez, and Francis J. Hornicek</i>				
22.1	Introduction	287	22.4	Imaging	289
22.2	Pathogenesis and Origins of Bony Metastatic Disease	287	22.5	Diagnosis	290
22.2.1	Hallmarks of Cancer	287	22.6	Management	290
22.2.2	Pathogenesis of Skeletal Metastases	287	22.6.1	Radiation and Radiotherapy	290
22.2.3	Origins of Metastatic Disease	288	22.6.2	Surgical Management	290
22.3	Clinical Presentation	289	22.7	Conclusion	292
Part V: Adjuvant Treatment Modalities for Spinal Tumors					
23.	Systemic and Intrathecal Chemotherapy for Spinal Tumors	299			
	<i>Nicholas B. D'Amico and Randy S. D'Amico</i>				
23.1	Introduction	299	23.2.1	Intrathecal Chemotherapy	300
23.1.1	Spinal Tumor Types	299	23.2.2	Systemic Chemotherapy	301
23.1.2	Currently Available Treatments: Surgery, Radiotherapy, and Chemotherapy	300	23.3	Future Directions of Chemotherapy Delivery	302
23.2	Chemotherapy Routes of Administration: Systemic and Intrathecal	300	23.4	Conclusions	302
24.	Percutaneous Spinal Tumor Ablation	305			
	<i>Zachary M. Wilseck, Adam A. Khan, Leanne Y. Lin, Joseph J. Gemmete, and Venu Vadlamudi</i>				
24.1	Introduction	305	24.2.5	Planar Skeletal Scintigraphy	306
24.2	Imaging	305	24.2.6	Magnetic Resonance Imaging	306
24.2.1	Patient Selection	305	24.3	Classification Systems	306
24.2.2	Radiographs	306	24.4	Indications	307
24.2.3	Computed Tomography	306	24.5	Spinal Ablation	308
24.2.4	Positron Emission Tomography/Computed Tomography	306			

24.5.1	Bipolar Radiofrequency Ablation	308	24.5.7	Tumor Embolization	310
24.5.2	Cryoablation	308	24.6	Post-Treatment Imaging	310
24.5.3	Microwave Ablation	309	24.7	Complications	311
24.5.4	Laser Interstitial Thermal Therapy	310	24.8	Conclusion	312
24.5.5	Thermal Protection Techniques and Thermal Monitoring	310			
24.5.6	Vertebral Augmentation	310			
25.	External Beam Radiation Therapy for Tumors of the Spine	315			
	<i>Sharad Goyal, Yuan James Rao, Minh-Phuong Huynh-Le, and Samir Kanani</i>				
25.1	Evolution of Radiation Therapy	315	25.9.1	3D-CRT	316
25.2	Radiotherapy Treatment Planning Process	315	25.9.2	Intensity-Modulated Radiotherapy	317
25.3	Computed Tomography Simulation	315	25.9.3	Craniospinal Radiation Therapy	317
25.4	Imaging	315	25.9.4	Particle Therapy	317
25.5	Image Fusion	316	25.10	Plan Evaluation	318
25.6	Contouring of Normal Tissue Structures	316	25.11	Radiation Doses and Fractionation	318
25.7	Target Contouring	316	25.11.1	Spinal Metastases	318
25.8	Collaboration with Referring Physicians	316	25.11.2	Primary Spinal Tumors	319
25.9	Planning Techniques	316	25.12	Toxicities	320
			25.13	Conclusion	320
26.	Stereotactic Body Radiotherapy and Radiosurgery for Spinal Tumors	323			
	<i>John Paul G. Kolcun, Tobias Chapman, C. Bryce Johnson, and Andrew A. Fanous</i>				
26.1	Introduction	323	26.2.3	SBRT for Primary Spinal Lesions	327
26.1.1	Evolution of Stereotactic Radiosurgery	323	26.2.4	SBRT for Re-Irradiation	327
26.1.2	Spinal Stereotaxis	323	26.2.5	SBRT Following Surgery	327
26.1.3	Radiobiology	324	26.3	Adverse Effects of Radiation	328
26.1.4	Delivery Methods	324	26.3.1	Spinal Cord Radiosensitivity	329
26.2	Radiosurgical Treatments	325	26.4	Conclusions	329
26.2.1	Indications for Spinal SBRT	325			
26.2.2	SBRT for Metastatic Spinal Lesions	325			
27.	Angiographic Embolization of Spinal Neoplasms	333			
	<i>Jaims Lim, Kunal Vakharia, Muhammed Waqas, and Elad I. Levy</i>				
27.1	Introduction	333	27.3	Preprocedural Imaging	334
27.1.1	Background	333	27.4	Technique	334
27.1.2	Goals of Spinal Tumor Embolization	333	27.4.1	Embolization Material	334
27.2	Anatomy	333	27.4.2	Technical and Imaging Considerations	335
27.2.1	Vascular Supply of the Spine	333	27.4.3	Technical Note on Access of Tumor Feeding Vessels	335
27.2.2	Vascular Supply of the Spinal Cord	334	27.5	Outcomes	336
27.2.3	Watershed Areas in the Spinal Cord	334			
27.2.4	Importance of Anatomy and Vasculature	334			

27.5.1	Success and Complete Embolization	336	27.6	Complications	337
27.5.2	Intraoperative Blood Loss	336			
27.5.3	Pain Relief	337	27.7	Conclusions	337
27.5.4	Curative Treatments for Certain Lesions	337			

Part VI: Surgical Approaches for Tumors of the Spine

28.	Intraoperative Neurophysiological Monitoring in Spinal Tumor Surgery	343			
	<i>Pratipal Kalsi, Anna Rienmuller, and Michael G. Fehlings</i>				
28.1	Anatomy and Physiology of Somatosensory-Evoked Potentials	343	28.8	Spontaneous Free-Running EMG and Its Limitations	344
28.2	Anatomy and Physiology of Motor-Evoked Potentials	343	28.9	Intraoperative Neurophysiological Stimulation	345
28.3	Peripheral Muscular MEPs	343	28.10	Intramedullary Tumors	345
28.4	D-Wave	344	28.11	Intradural Tumors	345
28.5	Electromyography	344	28.12	Metastatic Extradural Lesions	346
28.6	Somatosensory-Evoked Potentials and Intraoperative Use	344	28.13	Tumors at the Cauda Equina Level	347
28.7	MEPs and Intraoperative Interpretation	344	28.14	Safety, Complications, and Limits of Neuromonitoring	348
			28.15	Conclusion and Knowledge Gaps	349
29.	Exoscopic Surgery for Spinal Tumors	353			
	<i>Nicholas B. Dadario, Deepak Khatri, Randy S. D'Amico, David J. Langer</i>				
29.1	Introduction	353	29.5	Advantages of Exoscope	355
29.2	Exoscopes	353	29.6	Limitations	355
29.3	Spinal Tumors	354	29.7	Future Application	356
29.4	Changes in the Operating Room Setup	354	29.8	Conclusion	356
30.	Surgery for Intramedullary Spinal Cord Tumors	357			
	<i>James V. Boddu, Michael Kader, Roberto Perez-Roman, and Allan D. Levi</i>				
30.1	Surgical Anatomy	357	30.3.2	Posterolateral Sulcus Approach	359
30.2	General Surgical Principles and Strategies	357	30.3.3	Transpial Approach	360
30.3	Surgical Approaches	359	30.3.4	Lateral Myelotomy Approach	360
30.3.1	Posterior Median Sulcus Approach	359	30.3.5	Anterior Myelotomy Approach	360
			30.4	Conclusion	360
31.	Surgery for Extramedullary Spinal Tumors	363			
	<i>Aria Jamshidi and Allan D. Levi</i>				
31.1	Introduction	363	31.2	Surgical Considerations	363
31.1.1	Evolution of Intradural Extramedullary Surgery	363	31.2.1	Electrophysiology	363

31.2.2	Preoperative Preparation	364	31.2.6	Microsurgical Technique	366
31.2.3	Approaches	364			
31.2.4	Choice of Approach	365	31.3	Conclusion	370
31.2.5	Need for Spinal Fusion	365			
32.	Surgical Approaches to Tumors of the Craniocervical Junction				373
	<i>Patricia Zadnik Sullivan, Sabrina Heman-Ackah, Andrew A. Fanous, and Neil R. Malhotra</i>				
32.1	Introduction	373	32.3	Review of Surgical Approaches to the Craniocervical Junction	376
32.2	Goals of Surgery at the Craniocervical Junction	373			
32.2.1	Benign Primary Bony Tumors	373	32.3.1	Anterior Approaches	376
32.2.2	Locally Aggressive Tumors	373	32.3.2	Anterolateral Approach	380
32.2.3	Metastatic Tumors	375	32.3.3	Lateral Approach	381
32.2.4	Primary Intradural Tumors	375	32.3.4	Posterolateral Approach	382
			32.4	Conclusion	383
33.	Surgical Approaches for Tumors of the Cervical Spine				385
	<i>Won Hyung A. Ryu, Brian T. David, John O'Toole, and Richard G. Fessler</i>				
33.1	Introduction	385	33.3.7	Case Example	389
33.1.1	Goals of Surgery	385	33.4	Combined Anterior and Posterior Approach	389
33.1.2	Surgical Consideration	385			
33.2	Anterior Approach	386	33.4.1	Cervicothoracic Junction	389
33.2.1	Primary Spine Tumors	386	33.4.2	Positioning	390
33.3	Posterior Approach	387	33.4.3	Surgical Exposure: Supraclavicular	390
33.3.1	Intradural Extramedullary Tumors	387	33.4.4	Surgical Exposure: Transmanubrial-Transclavicular	390
33.3.2	Positioning	388	33.4.5	Surgical Exposure: Trans-Sternal	390
33.3.3	Surgical Exposure: Posterior	388	33.4.6	Tumor Resection	390
33.3.4	Tumor Resection	388	33.4.7	Instrumentation	390
33.3.5	Instrumentation	388	33.4.8	Closure	391
33.3.6	Minimally Invasive Technique	388	33.4.9	Case Examples	391
34.	Total Spondylectomy for Tumors of the Cervical and Thoracic Spine				395
	<i>Joseph H. McMordie and Jean-Paul Wolinsky</i>				
34.1	Introduction	395	34.5	Cervicothoracic Region	399
34.2	Indications	395	34.6	Upper Cervical Region	401
34.3	Spondylectomy	395	34.7	Conclusion	404
34.4	Thoracic Region	396			
35.	Thoracoscopic Procedures for Tumors of the Spine				407
	<i>Shamus R. Carr</i>				
35.1	Introduction	407	35.2.2	Idiopathic Scoliosis and Spinal Deformities	410
35.2	Specific Conditions	408	35.2.3	Thoracic Disk Herniation	411
35.2.1	Spinal Tumors	408	35.3	Conclusions	412

36. Corpectomy and Anterior Lateral Fixation for Tumors of the Thoracic and Lumbar Spine	415		
<i>Ethan Cottrill, Zach Pennington, Camilo Molina, Jeff Ehresman, and Timothy F. Witham</i>			
36.1 Introduction	415	36.5.1 Introduction and Indications	419
36.1.1 Epidemiology of Spinal Tumors.....	415	36.5.2 Description of Technique.....	419
36.2 History and Diagnosis	415	36.5.3 Representative Outcomes.....	419
36.2.1 Clinical Presentation.....	415	36.6 Retroperitoneal Anterolateral Approach to the Lumbar Spine	419
36.2.2 Imaging.....	415	36.6.1 Introduction and Indications.....	419
36.2.3 Biopsy Indications.....	416	36.6.2 Description of Technique.....	419
36.3 Treatment Algorithms	416	36.6.3 Representative Outcomes.....	420
36.3.1 Primary Tumors.....	416	36.7 Transperitoneal Anterior Approach to the Lumbar Spine	420
36.3.2 Metastatic Tumors.....	416	36.7.1 Introduction and Indications.....	420
36.4 Retropleural Thoracotomy Approach to the Thoracic Spine	418	36.7.2 Description of Technique.....	420
36.4.1 Introduction and Indications.....	418	36.7.3 Representative Outcomes.....	420
36.4.2 Description of Technique.....	418	36.8 Stabilization Techniques	420
36.4.3 Representative Outcomes.....	419	36.9 Conclusions	422
36.5 Transpleural Thoracoscopic Approach to the Thoracic Spine	419		
37. Posterolateral Surgical Approaches to Tumors of the Thoracic and Lumbar Spine	425		
<i>Se-Hoon Kim and Daniel H. Kim</i>			
37.1 Introduction	425	37.5 Costotransversectomy	428
37.2 Muscular, Neurovascular Anatomy, and Posterior Thoracic Cage	426	37.6 Lateral Extracavitary Approach	429
37.3 Laminectomy	427	37.7 Total En Bloc Spondylectomy	430
37.4 Transpedicular Approach	428	37.8 Single-Stage Posterolateral Transpedicular Approach	431
38. Posterior Instrumentation for Tumors of the Thoracic and Lumbar Spine	433		
<i>Alexander J. Butler, Nicholas C. Schiller, Chester J. Donnally III, and Michael Y. Wang</i>			
38.1 Introduction to Tumors of the Thoracic and Lumbar Spine	433	38.5 History and Principles of Posterior Instrumentation	436
38.2 Goals of Surgery for Tumors of the Thoracic and Lumbar Spine	433	38.5.1 Harrington Instrumentation System.....	436
38.3 Role of Posterior Instrumentation in the Treatment of Thoracic and Lumbar Spine Tumors	434	38.5.2 Luque Instrumentation System.....	436
38.4 Applications of Posterior Instrumentation in the Treatment of Thoracic and Lumbar Spine Tumors	434	38.5.3 Pedicle Screw Fixation.....	436
		38.6 Surgical Approaches	437
		38.6.1 Posterior Approach to the Thoracic and Lumbar Spine.....	437
		38.6.2 Posterolateral (Costotransversectomy) Approach to the Thoracic Spine.....	437

38.7	Pedicle Screw Placement: Thoracic Spine . . .	437	38.8.1	Lumbar Pedicle Axis Point	438
38.7.1	Thoracic Pedicle Axis Point	437	38.8.2	Lumbar Pedicle Screw Trajectory	438
38.7.2	Thoracic Pedicle Trajectory	438	38.8.3	Complications	439
38.8	Pedicle Screw Placement: Lumbar Spine	438			
39.	Kyphoplasty and Vertebroplasty for Spinal Tumors				443
	<i>Andrew A. Fanous</i>				
39.1	Technique	443	39.2.2	Multiple Myeloma	445
39.1.1	Transpedicular Vertebroplasty	443	39.2.3	Osteolytic Metastatic Tumors	445
39.1.2	Transpedicular Kyphoplasty	443	39.3	Contraindications	446
39.1.3	Paraspinal Vertebral Augmentation	444	39.4	Clinical Outcomes	446
39.1.4	Cervical Vertebral Augmentation	444	39.5	Complications	447
39.2	Indications	444			
39.2.1	Hemangioma	445			
40.	Anterior Transperitoneal and Retroperitoneal Approaches to Tumors of the Lumbar Spine				449
	<i>Pedro O. Coutinho, Harold G. Moore, and Jonathan N. Grauer</i>				
40.1	Preoperative Considerations	449	40.2.3	Posterior Stabilization and Vertebral Body Reconstruction	452
40.2	Surgical Treatment	449	40.2.4	Total En Bloc Spondylectomy	452
40.2.1	Anterior Approaches for Upper Lumbar Spine Tumors	449	40.3	Complications	452
40.2.2	Anterior Approaches for Tumors in the Mid-/Lower Lumbar Spine	450	40.4	Conclusion	453
41.	Lateral Retroperitoneal Approaches to Tumors of the Lumbar Spine				455
	<i>Scott J. Raffa and Michael Y. Wang</i>				
41.1	Introduction	455	41.5	Disadvantages and Risks of the Lateral Approach	457
41.2	Concepts of Lateral Approach	455	41.6	Primary Tumor Pathologies Amenable to the Lateral Approach	458
41.3	General Patient Positioning	455	41.7	Metastatic/Systemic Disease of the Lumbar Spine	458
41.4	Specific Lateral Approach Techniques	455	41.8	Selection of Approach	459
41.4.1	The Minimally Invasive Transpsoas Technique	455	41.9	Conclusions	459
41.4.2	The Direct-Look/Shallow Docking Technique	456			
41.4.3	The Mini-Open Technique	456			
41.4.4	The Anterior to the Psoas Technique	456			
42.	Minimally Invasive Strategies for Spinal Tumor Treatment				461
	<i>Ibrahim Hussain and Michael Y. Wang</i>				
42.1	Introduction	461	42.2	Stereotactic Radiosurgery	461

42.3	Cement Augmentation	463	42.6	Endoscopy	466
42.4	Percutaneous Pedicle Screw Stabilization	463	42.7	Laser Interstitial Thermal Therapy	467
42.5	Tubular Approaches	465	42.8	Conclusion	467
43.	Surgical Approaches to Sacral Tumors	471			
	<i>Evan James Trapana, Allison L. Boden, and Joseph P. Gjolaj</i>				
43.1	Anatomy	471	43.3.4	Imaging	474
43.1.1	Bony Anatomy	471	43.3.5	Biopsy	475
43.1.2	Vascular Anatomy	471	43.3.6	Treatment	475
43.1.3	Sacral Neuroanatomy	472	43.3.7	Sacral Laminectomies	476
			43.3.8	Posterior Sacrectomy	476
43.2	Biomechanics	473	43.4	Patient Outcomes	477
43.3	Clinical Decision-Making of Sacral Tumors	473	43.4.1	Chordoma	477
43.3.1	Epidemiology	473	43.4.2	Giant Cell Tumor	478
43.3.2	Chordomas	473	43.4.3	Chondrosarcoma	478
43.3.3	Giant Cell Tumors	473	43.5	Conclusion	478
44.	Lumbosacral and Pelvic Reconstruction in Tumor Patients	481			
	<i>Joseph P. Gjolaj, Augustus J. Rush III, and Harsh Shah</i>				
44.1	Historical Techniques of Spinopelvic Fixation	481	44.4	Posterior Pelvic Ring Fixation and Anterior Spinal Column Fixation	485
44.2	Principles of Lumbosacral Reconstruction	481	44.4.1	Triangular Frame Reconstruction	485
44.3	Techniques in Spinopelvic Fixation	482	44.4.2	Johns Hopkins University Method	485
44.3.1	Galveston and Modified Galveston Techniques	482	44.5	Outcomes	486
44.3.2	Double Iliac Screw Fixation with Lumbar Segmental Fixation	483	44.5.1	Soft-Tissue Reconstruction	487
44.3.3	S2 Alar-Iliac Screw Fixation	483	44.6	Postoperative Care	487
44.3.4	Four-Rod Reconstruction (Double-Rod Double Iliac Screw)	484	44.7	Conclusions	488
44.3.5	Closed Loop Reconstructions	485			
Index					489
