

Contents

Chapter 1. Introduction	1
1.1. Background	1
1.2. Setting and Main theorems	18
Acknowledgments	23
Chapter 2. Weighted Besov spaces, paraproducts and estimates of functions	25
2.1. Weighted Besov spaces and paraproducts	25
2.2. Approximation operators and commutator estimates	33
Chapter 3. Infinite-dimensional Ornstein-Uhlenbeck process	41
Chapter 4. Approximation equations and their transformation	57
Chapter 5. Bounds for the behaviour of $X^{M,N,(2)}$ in N	67
Chapter 6. Tightness of the laws of $\{X^{M,N}\}$	77
Chapter 7. Properties of the constructed Φ_3^4 -measure	91
7.1. Rotation and reflection invariance	91
7.2. Reflection positivity of the limit measure	91
7.3. Support of the limit measure	93
7.4. Non-Gaussianity of the limit measure	96
Appendix A. A sufficient condition for integrability	103
Bibliography	105
