<i>Figures and Tables</i>	viii
<i>Acknowledgments</i>	xi
1. Introduction	1
Why this book?	1
Repurposing data and methods	2
Following the medium	4
Foregrounding bias	5
Diversifying social research	7
Two important remarks about terminology	9
Overview of chapters	10
Pedagogical features	13
2. Sourcing Digital Inquiries	15
Online platforms and their records	15
Accounting for platform effects	19
The importance of a varied data diet	25
3. Querying and Triangulating	31
Understanding the purpose of digital search	31
Exploiting the anatomy of search and recommendation engines	33
Comparing and triangulating	42

4. Prompting AI	47
What exactly are large generative models?	47
What large generative models can do	51
From prompt engineering to prompt tuning	58
5. Calling Platform APIs	66
The rise of APIs	66
How to work with APIs	69
API-based tools and their risks	74
6. Scraping Documents and Interfaces	79
Scraping or the art of taking websites apart	79
Scraping tricks	85
The limits of scraping	87
7. Wrangling Digital Records	93
Data preparation is data analysis	93
Six wrangling operations	96
Tools for data wrangling	100
8. Mining Texts	109
What to count	110
How to count	117
Where to count	121
9. Exploring through Visualizations	125
Exploratory data analysis	125
The bases of visual exploration	127
The right chart for the right question	131
Pattern detection and interactive visualizations	140
10. Crawling Connections	143
Thinking relationally	143
Disentangling hierarchy and community in networks	148
Riding a web crawler	151

11. Analyzing Relational Landscapes	158
What's in a network?	158
Paths	159
Centrality	162
Community structure	164
Visual network analysis	169
12. Tinkering with Scripts and Libraries	180
Foundations of coding	181
Programming tricks for non-programmers	189
13. Conclusion	196
The "digital" in "digital methods"	196
The combined study of social phenomena and platform effects	198
The separate study of platform effects	201
<i>Glossary</i>	207
<i>References</i>	218
<i>Index</i>	231
