

Contents

Chapter 1. Introduction	1
Chapter 2. Hamiltonian torus actions on ruled 4-manifolds	5
2.1. Preliminaries on Hamiltonian actions	5
2.2. Torus actions on $S^2 \times S^2$ and $\mathbb{C}P^2 \# \overline{\mathbb{C}P^2}$	9
2.3. Equivalent circle actions	13
Chapter 3. Action of $\text{Symp}^{S^1}(S^2 \times S^2, \omega_\lambda)$ on $\mathcal{J}_{\omega_\lambda}^{S^1}$	23
3.1. J -Holomorphic Preliminaries	23
3.2. J -holomorphic spheres in $S^2 \times S^2$ and $\mathbb{C}P^2 \# \overline{\mathbb{C}P^2}$	25
3.3. Intersection of $\mathcal{J}_{\omega_\lambda}^{S^1}$ with the strata	26
3.4. Symplectic actions of compact abelian groups on \mathbb{R}^4	27
3.5. Homotopical description of the strata $\mathcal{J}_{\omega_\lambda}^{S^1} \cap U_k$	32
Chapter 4. The homotopy type of the symplectic centralisers of $S^1(a, b; m)$	47
4.1. When $\mathcal{J}_{\omega_\lambda}^{S^1}$ is homotopy equivalent to a single symplectic orbit	47
4.2. When $\mathcal{J}_{\omega_\lambda}^{S^1}$ is homotopy equivalent to the union of two orbits	48
4.3. Centralizers of Hamiltonian S^1 actions on $S^2 \times S^2$	57
Chapter 5. Partition of the space of invariant almost-complex structures	59
5.1. Space of invariant complex structures	59
5.2. Construction of Equivariant moduli spaces	64
5.3. Isotropy representations	69
Chapter 6. Circle actions on $\mathbb{C}P^2 \# \overline{\mathbb{C}P^2}$	73
6.1. Homotopy type of $\text{Symp}^{S^1}(\mathbb{C}P^2 \# \overline{\mathbb{C}P^2}, \omega_\lambda)$	73
6.2. Isometry groups of odd Hirzebruch surfaces	78
Appendix A. Equivariant versions of classical results from Differential Topology	81
Appendix B. Equivariant automorphism groups	87
Appendix C. J -Holomorphic configurations and equivariant Gompf argument	89
Appendix D. Alexander-Eells isomorphism	91
Bibliography	95
