Chapter 1. Introduction	1
Acknowledgments	13
Chapter 2. The relation between the structure algebra $D^*(\widetilde{M})^\Gamma$ and $\Psi_1^0(\widetilde{M})$	15
2.1. Realizing the surgery sequence with pseudodifferential operators	15
Chapter 3. Rho classes	19
3.1. Analytic properties of $\pi_{\geq}(\widetilde{D})$	19
3.2. Rho classes and K-theory of pseudodifferential operators	20
Chapter 4. Non-commutative de Rham homology and Chern characters	21
4.1. Non-commutative de Rham homology	21
4.2. Chern characters	23
4.3. Excision in non-commutative de Rham homology	29
4.4. Splitting constructions in relative K-theory and homology	30
Chapter 5. Pseudodifferential operators and smooth subalgebras	35
5.1. Mishchenko bundle translated to universal covering	35
5.2. Pseudodifferential operators with coefficients in differential forms on $\mathbb{C}\Gamma$	38
5.3. Mishchenko-Fomenko calculi associated to dense holomorphically closed subalgebras of $C_{red}^*\Gamma$	40
Chapter 6. Mapping analytic surgery to homology	41
6.1. The delocalized homology exact sequence	41
6.2. Lott's connection and delocalized traces	41
6.3. Mapping the analytic surgery sequence to non-commutative de Rham homology	47
6.4. The algebraic index and the localized Chern character $\text{Ch}_\Gamma^e$	53
6.5. Comparison with Lott's $\varrho$ form	56
6.6. Proof of Proposition 6.32	61
Chapter 7. Higher rho numbers associated to elements in $HC^*(\mathbb{C}\Gamma, \langle x \rangle)$	65
7.1. The role of cyclic group cohomology	65
7.2. Cyclic cohomology of hyperbolic groups	66
7.3. Extending cocycles for hyperbolic groups	70
7.4. Extending cocycles for groups of polynomial growth	73
7.5. Delocalized cyclic group homology and non-commutative de Rham homology	73
7.6. Higher rho numbers	76

Chapter 8. Higher rho numbers from relative cohomology $H^*(M \rightarrow B\Gamma)$	83
8.1. Alexander-Spanier cochains and singular cohomology	83
8.2. Lifting $H^*(M \rightarrow B\Gamma)$ to relative cyclic cocycles	88
8.3. Rapid decay	91
8.4. Extending cyclic cocycles associated to classes in $H_{pol}^*(M \xrightarrow{u} B\Gamma)$	94
Chapter 9. Delocalized higher Atiyah-Patodi-Singer indices	97
9.1. Higher APS indices associated to elements in $HC^*(\mathbb{C}\Gamma, \langle x \rangle)$	97
9.2. Higher APS indices associated to elements in $H^*(M \rightarrow B\Gamma)$	98
9.3. Filling of positive scalar curvature metrics	99
Chapter 10. The space of metrics of positive scalar curvature and higher rho-invariants	101
Chapter 11. Naturality for the action by the diffeomorphism group	105
11.1. Actions of diffeomorphisms	105
11.2. Moduli spaces of metrics of positive scalar curvature	112
11.3. Defining the size of the moduli space	114
Chapter 12. The role of real K-theory	117
Chapter 13. Geometric applications of delocalized cyclic cohomology	123
Chapter 14. Geometric applications of relative cohomology	129
Chapter 15. Geometric applications: A topological approach	135
Chapter 16. Concluding remarks	139
Bibliography	141
