Introduction	1
Table 1: The stable cases	5
Table 3: The unstable cases for which the LCS does not stop	7
Table 2: The unstable cases for which the LCS stops	8
Chapter 1. General recollections	9
1.1. Commutator calculus and lower central series	9
1.2. Lie rings of lower central series	11
1.3. Computing abelianisations from decompositions	12
Chapter 2. Strategy and first examples	13
2.1. Generation in degree one – first consequences	13
2.2. Artin groups	14
Chapter 3. Partitioned braids	17
3.1. Reminders: Braids	17
3.2. Basic theory of partitioned braids	17
3.3. The lower central series	19
Chapter 4. Virtual and welded braids	25
4.1. Recollections	25
4.2. Notion of support of an element	37
4.3. Virtual braids	38
4.4. Welded braids	40
4.5. Extended welded braids	42
4.6. Partitioned virtual, welded and extended welded braids	43
Chapter 5. Variants on partitioned welded braids	49
5.1. Pure bipartite welded braids	49
5.2. Tripartite welded braids	51
5.3. Partitioned tripartite welded braids	53
5.4. The lower central series	54
Chapter 6. Braids on surfaces	63
6.1. Surfaces	63
6.2. Braids on surfaces: general theory	65
6.3. Presentations of surface braid groups	70
6.4. The lower central series of the whole group	78
6.5. Partitioned braids on surfaces	83
6.6. Partitions with small blocks	90

Appendix A. Some calculations of lower central series	109
A.1. Relative lower central series	109
A.2. Semi-direct products of abelian groups	110
A.3. Free products	113
A.4. Wreath products	115
Appendix B. Presentation of an extension	119
Bibliography	121
