

# Contents

Chapter 1. Introduction	1
1.1. Broué’s conjecture for symmetric groups and beyond	1
1.2. RoCK blocks for double covers of symmetric groups	4
1.3. Quiver Hecke superalgebras	9
Chapter 2. Background material	15
2.1. Basic notation	15
2.2. Graded superalgebras and supermodules	17
2.3. Combinatorics	28
2.4. Lie theory	36
Chapter 3. Quiver Hecke superalgebras	41
3.1. Quiver Hecke superalgebras and a dimension formula	41
3.2. Further properties of quiver Hecke superalgebras	51
3.3. Cuspidality	58
Chapter 4. RoCK blocks of quiver Hecke superalgebras	67
4.1. RoCK blocks	67
4.2. Gelfand-Graev truncation of $\bar{R}_\delta$ and $Z_{\rho,1}$	74
4.3. Gelfand-Graev truncation of $\bar{R}_{d\delta}$	93
4.4. Intertwiners	105
4.5. Affine zigzag relations	113
Chapter 5. RoCK blocks of double covers of symmetric groups	117
5.1. Twisted wreath superproducts	117
5.2. Blocks of double covers	120
5.3. Kang-Kashiwara-Tsuchioka isomorphism	135
5.4. Broué’s conjecture for RoCK blocks of double covers	143
Appendix A. Some calculations in $B_2$	151
A.1. Some small rank computations	151
A.2. A commutation lemma	152
A.3. The elements $\Theta_j^i$	154
A.4. The element $\Upsilon$	160
Bibliography	171
Index	177
