

Contents

Chapter 1. Introduction and Main Results	1
1.1. Preliminary setup	4
1.2. Main results: asymptotics of $H_N(e^{-NV})$	9
1.3. Main results: Ratio asymptotics $H_N(Fe^{-NV})/H_N(e^{-NV})$	12
1.4. Main results: Fisher-Hartwig singularities	17
1.5. Applications: Connection to the Gaussian free field on a Riemann surface	21
1.6. Applications: Eigenvalue rigidity	27
1.7. Fisher-Hartwig singularities: A literature overview.	30
1.8. Outline of the remainder of the article	31
 Chapter 2. Differential Identities and Overview of the Proofs	 33
2.1. Orthogonal polynomials and a RH problem	33
2.2. Differential identities	34
2.3. Smooth ratio asymptotics: Outline of the proof of Theorem 1.3	35
2.4. Fisher-Hartwig asymptotics: Outline of the proof of Theorem 1.6	36
2.5. Partition function asymptotics: Outline of the proof of Theorem 1.1	38
2.6. Proof of Proposition 2.1	41
2.7. Proof of Corollary 1.2	43
 Chapter 3. Analysis of θ -functions	 45
3.1. θ has no zeros on \mathbb{R}	45
3.2. Divisor of $\theta(u(z) \pm u(\lambda))$ and of $\Theta(z, \lambda)$	46
3.3. Some further identities for θ -functions	49
 Chapter 4. Analysis of the Riemann-Hilbert Problem for Y	 57
4.1. The first transformation $Y \mapsto T$.	57
4.2. The RH problem for T	58
4.3. The RH problem for S	59
 Chapter 5. The Main Parametrix	 61
5.1. The main parametrix for $F(z)\omega_\epsilon(z) \equiv 1$	61
5.2. The main parametrix for $F(z)\omega_\epsilon(z) \not\equiv 1$	63
 Chapter 6. Local Parametrix	 67
6.1. The Airy local parametrix	67
6.2. The Painlevé local parametrix	69
 Chapter 7. Solving the Small Norm Problem	 77

Chapter 8. Ratio Asymptotics for Non-singular Symbols	81
8.1. Proof of (1.46)	84
8.2. Proof of (1.58)	84
Chapter 9. Ratio Asymptotics for Fisher-Hartwig Symbols	87
9.1. The integral term	87
9.2. The ratio term	92
9.3. Combining the terms	98
Chapter 10. Partition Function Asymptotics for the k -cut Chebyshev Potential	103
10.1. Results for Chebyshev-type orthogonal polynomials	103
10.2. Asymptotics of $H_N(e^{-NV_0})$	108
10.3. The limit $\sigma \rightarrow 1$	114
Chapter 11. Partition Function Asymptotics	119
11.1. The order N^2 term	119
11.2. The order N term	120
11.3. The constant term	121
11.4. Application of θ -function identities to evaluate $\Delta_{11}^{(1)}$ and $\Delta_{11}^{(2)}$	122
11.5. Evaluation of residues	126
11.6. Integration in s	127
11.7. The Chebyshev polynomials	130
Bibliography	133
