

Contents

Chapter 1. Introduction	1
1.1. Kinetically constrained models	4
Chapter 2. The resistance of an update family	7
Chapter 3. The main theorem and an outline of the proof	13
3.1. Induced processes	15
3.2. Quasistable directions	17
3.3. Choosing a rational direction in which to grow	19
3.4. Locally inherited resistance	19
3.5. Constructing a path of infections	21
3.6. The equivalence lemma	22
3.7. Some constants	24
Chapter 4. Locally inherited resistance	27
Chapter 5. Finding a rational direction in which to grow	37
5.1. A rational basis for V^\perp	38
5.2. The curved cells of $\mathbf{S}(W)$	39
5.3. The flat cells of $\mathbf{S}(W)$	41
5.4. Rotating from w to w'	42
5.5. The proof of Lemma 5.3	44
5.6. Deducing the general case	45
Chapter 6. Construction of the quasistable set	49
6.1. Spherical Buffer Systems	51
6.2. An outline of the proof of Lemma 6.9	52
6.3. Some simple observations to get warmed up	54
6.4. Restricted buffer systems	55
6.5. Induced buffer systems	57
6.6. Some simple properties of $\mathbf{S}_{x,P}$	60
6.7. The great escape	64
6.8. Pushing y towards x	66
6.9. The proof of Lemma 6.9	68
6.10. Deducing that Q exists	70
Chapter 7. The resistance of induced update families	75
7.1. Some simple lemmas about induced families	77
7.2. A technical lemma about induced families	79
7.3. The induction steps	80
7.4. The proofs of Lemmas 7.4 and 7.5	82

Chapter 8. Polytopes	85
8.1. Spherical polytopes	85
8.2. Tubular polytopes	86
8.3. Maximal cliques, and the dimension of a face	87
8.4. Our family of polytopes	88
Chapter 9. The bootstrap process in a polytope	91
9.1. The distance between faces of a polytope	92
9.2. The proof of Lemma 9.1	93
9.3. The proof of Lemma 9.3	94
Chapter 10. Interiors, extensions, buffers, and growth sequences	97
10.1. The interior of a polytope	97
10.2. Forwards and sideways faces	98
10.3. Extending and retracting a polytope	99
10.4. Growth sequences	100
10.5. Buffers	102
Chapter 11. Deterministic growth of droplets	105
11.1. A fundamental lemma	105
11.2. Forwards deterministic growth	106
11.3. Sideways deterministic growth	108
11.4. Growing both forwards and backwards	113
Chapter 12. The proof of Theorem 3.1	115
12.1. The base cases: supercritical growth	116
12.2. Tubular droplets	118
12.3. Spherical droplets	124
12.4. The proof of Theorem 3.1	128
Appendix A. Properties of canonical polytopes	133
Appendix B. The distance between faces of a polytope	141
Appendix C. Interiors and extensions	145
C.1. The interior and the closed interior of a polytope	145
C.2. Forwards and sideways faces	148
C.3. The extension of a polytope	149
C.4. The forwards extension and retraction of a polytope	150
C.5. Growth sequences	152
C.6. Buffers	155
Appendix D. Some technical details from Chapters 11 and 12	161
D.1. Some inclusions involving polytopes	161
D.2. Bounding the functions in Chapter 12	163
Appendix E. Perfectly covering a polytope with smaller polytopes	165
Bibliography	177
