

Contents

Chapter 1. Introduction	1
Chapter 2. Preliminaries on David homeomorphisms	9
2.1. David Integrability Theorem	9
2.2. David extensions of circle homeomorphisms	11
2.3. Composition with quasiconformal maps	12
2.4. David maps and removability	16
Chapter 3. Expansive covering maps of the circle	21
Chapter 4. David extensions of dynamical homeomorphisms of the circle	27
4.1. Markov partitions of dynamical covering maps	28
4.2. Distortion estimates and proof of Theorem 4.10	33
Chapter 5. David welding	51
Chapter 6. Reflection groups and Schwarz reflection maps	55
6.1. Kleinian reflection groups	55
6.2. Quadrature domains and Schwarz reflections	57
Chapter 7. A general David surgery	59
Chapter 8. David surgery from anti-rational maps to kissing reflection groups	63
8.1. Connections with known results	65
Chapter 9. Conformal removability of Julia and limit sets	67
9.1. Conformal removability of limit sets of necklace reflection groups	67
9.2. Conformal removability of geometrically finite polynomial Julia sets	67
Chapter 10. Mating reflection groups with anti-polynomials: Existence theorem	73
10.1. Necklace groups and Bers slice	73
10.2. Conformal mating	77
10.3. A general mateability theorem	78
Chapter 11. Mating reflection groups with anti-polynomials: Examples	83
11.1. Some known examples	83
11.2. Schwarz reflections in an ellipse and two inscribed disks	84
11.3. Schwarz reflections in an extremal quadrature domain and a circumscribed disk	88
11.4. Mating the cauliflower anti-polynomial with the ideal triangle group	91
Chapter 12. Extremal points in spaces of schlicht functions	99
