

Contents

Chapter 1. Introduction	1
1.1. Formulation of the theorems and corollaries	1
1.2. Outline of the contents	4
Chapter 2. Maps and Diagrams	7
2.1. van Kampen Diagrams	7
2.2. Graded maps on a disk or annulus	9
2.3. 0-Bonds and 0-contiguity submaps	10
2.4. Bonds and contiguity submaps	11
2.5. Graded presentations	13
2.6. Auxiliary parameters	13
2.7. The graded presentation of $B(\mathcal{A}, n)$	14
2.8. Tame diagrams	15
2.9. Mass of a diagram	16
Chapter 3. S -machines	21
3.1. Definition of S -machine as a Rewriting System	21
3.2. Some elementary properties of S -machines	23
3.3. Parameters	24
Chapter 4. Auxiliary Machines	25
4.1. The machine \mathbf{M}_1	25
4.2. Standard computations of \mathbf{M}_1	27
4.3. Primitive Machines	34
4.4. The machine \mathbf{M}_2	35
4.5. Standard computations of \mathbf{M}_2	37
4.6. The machine \mathbf{M}_3	42
4.7. Standard computations of \mathbf{M}_3	43
4.8. The machine \mathbf{M}_4	46
4.9. The machines $\mathbf{M}_{5,1}$ and $\mathbf{M}_{5,2}$	54
Chapter 5. The Machine \mathbf{M}	57
5.1. Definition of the machine	57
5.2. Standard computations of \mathbf{M}	58
5.3. Components of a configuration	60
5.4. Computations of \mathbf{M} with long history	66
5.5. Reverted Bases	69
Chapter 6. Groups Associated to an S -machine	75
6.1. The Groups	75
6.2. Bands and annuli	76

6.3. Trapezia	79
Chapter 7. Modified Length and Area Functions	83
7.1. Modified length function	83
7.2. Disks and weights	83
7.3. Mixtures	84
Chapter 8. Diagrams without Disks	87
8.1. M -minimal diagrams	87
8.2. Annuli	87
8.3. Transpositions of a θ -band with an a -cell	89
8.4. a -trapezia	90
8.5. Combs and Subcombs	97
8.6. G -weight	100
8.7. Quadratic upper bound	103
Chapter 9. Diagrams with Disks	117
9.1. Diminished, Minimal, and D -minimal diagrams	117
9.2. t -spokes	119
9.3. Transposition of a θ -band and a disk	123
9.4. Quasi-trapezia	127
9.5. Shafts	131
9.6. Designs on a Disk	133
Chapter 10. Upper Bound on the Weight of Minimal Diagrams	135
10.1. Weakly minimal diagrams	135
10.2. Definition of the minimal counterexample and cloves	137
10.3. Properties of the cloves of Δ	138
10.4. Paths in the cloves	140
10.5. Trapezia and combs in the cloves	146
Chapter 11. Proof of Theorem 1.1	159
11.1. Assignment of a -relations and weights	159
11.2. Assignment of G -weight	161
11.3. Quadratic upper bound	165
Chapter 12. Proof of Theorem 1.3	167
12.1. g -diagrams and g -minimal diagrams	167
12.2. g -minimal diagrams containing disks	169
12.3. Upper bound	175
Chapter 13. Proof of Theorem 1.4	177
Bibliography	179
