Introduction	1
Motivation	1
Approach and antecedents	1
On filtered objects	2
Our main algebraic categories	2
Our operads	3
Our cooperads	3
Outline of the remaining contents	3
Model category structure	4
Conventions	4
Chapter 1. The filtered framework	7
1.1. Predifferential graded objects	7
1.2. “Gr” and associated graded	8
1.3. Complete objects	9
1.4. Monoidal products	9
Chapter 2. Operads in the complete and filtered setting	11
2.1. Complete \mathbb{S} -objects	11
2.2. Curved operads	13
2.3. Free complete operad	14
2.4. Free curved operad on a gr-dg \mathbb{S} -module	15
Chapter 3. Complete cooperads	19
3.1. The tree cooperad	19
3.2. Gr-coaugmentation and gr-conilpotence	23
3.3. Existence of extensions in the altipotent setting	25
3.4. Properties of the tree cooperad	28
3.5. Coderivations	32
Chapter 4. Bar and cobar constructions in the curved setting	35
4.1. Bar construction	35
4.2. Cobar constructions	37
4.3. Convolution algebras	38
4.4. Bar-cobar resolution	41
Chapter 5. Koszul duality for curved operads	45
5.1. Subcomonoid generated by a symmetric module	45
5.2. Koszul dual cooperad	47
5.3. Koszul dual operad	48
5.4. Bar construction of a curved quadratic operad	49

5.5. Curved Koszul operad	50
Chapter 6. The associative case	53
6.1. The curved operad encoding curved associative algebras	53
6.2. Homotopy curved associative algebras	54
6.3. Homotopy categories	59
Appendix A. Categorical filtrations and completions	61
A.1. Categorical filtered objects	62
A.2. Categorical complete filtered objects	62
A.3. Coproducts and products in complete filtered objects	65
A.4. Tensor products in the filtered and complete settings	67
A.5. Strong generation of sequences	68
A.6. Monoidal structure on filtered objects	69
A.7. Monoidal structure on complete filtered objects	70
A.8. Consequences for \mathbb{S} -modules	71
A.9. Filtered gr-dg objects	72
A.10. Monoidal structure on (complete) filtered gr-dg objects	73
Appendix B. Gr-flat objects and the associated graded	75
Appendix C. Model category structures	79
C.1. Cofibrantly generated model structure	79
C.2. The category of complete gr-dg \mathbf{R} -modules	80
C.3. Properties of the model structure on gr-dg \mathbf{R} -modules	87
C.4. Model structure on complete curved operads	91
C.5. Model structure on categories of complete curved algebras	100
C.6. Homotopy category of algebras over a curved operad	104
Bibliography	107
