

An Atlas of Amplitude-Integrated EEGs in the Newborn

Third Edition

Edited by

Lena Hellström-Westas MD, PhD

*Senior Professor of Perinatal Medicine, Department of Women's and Children's Health
Uppsala University, Sweden*

Linda S de Vries MD, PhD

*Emeritus Professor in Neonatal Neurology at Utrecht and
Leiden University Medical Center, The Netherlands*

Sampsa Vanhatalo MD, PhD

*Professor, Departments of Physiology and Clinical Neurophysiology
Children's Hospital, Helsinki University Hospital and University of Helsinki, Finland*

With contributions from

Sonia L Bonifacio MD

*Medical Director, NeuroNICU, Clinical Professor of Pediatrics
Stanford Medicine Children's Health, California, USA*

Mohamed El-Dib MD

*Director, Neonatal Neurocritical Care, Brigham and Women's Hospital, Associate Professor
of Pediatrics, Harvard Medical School, Boston, Massachusetts, USA*

Kathi Salley Randall RN, MSN, CNS, NNP-BC

Synapse Care Solutions, Las Vegas, Nevada, USA

And a Foreword from

Geraldine Boylan PhD, MRIA

*Professor of Neonatal Physiology, Department of Paediatrics & Child Health, and Director,
INFANT Research Centre, University College Cork, Ireland*

CONTENTS

Foreword by <i>Geraldine Boylan</i>	vii
aEEG Atlas: List of Abbreviations.....	viii
1. Monitoring the Newborn Brain	1
<i>Lena Hellström-Westas, Sampsa Vanhatalo and Linda S de Vries</i>	
1.1 History of aEEG.....	1
1.2 Underpinnings of the CFM/aEEG Success	1
1.3 Absolute Measures vs. Pattern Recognition in the aEEG Interpretation	3
1.4 Comparability between aEEG Devices	3
Acknowledgements	6
References.....	6
2. Brain Activity and Generation of EEG Signal	7
<i>Sampsa Vanhatalo</i>	
2.1 Anatomy of the EEG Signal.....	7
2.2 Spatial View of the EEG Signal.....	7
2.3 General Aspects of Visual EEG Interpretation	7
2.4 Key Concepts in the Visual Review of EEG Signals and aEEG Trends	7
2.5 A Systematic Approach to Reviewing the aEEG Trend.....	9
2.6 Review after Monitoring.....	9
2.7 Rationale of the aEEG Trend	9
2.8 Background Classifications.....	9
2.9 Continuous Background.....	9
2.10 Discontinuous Background.....	9
2.11 Pathological Activities in the aEEG.....	11
2.12 Early Maturation of EEG and aEEG activity.....	11
2.13 Reliability in the Visual Review of aEEG Trends and Raw EEG Signals	12
References.....	12
3. Electrode Application, Recording Caveats and Artefacts	13
<i>Kathi Salley Randall and Sampsa Vanhatalo</i>	
3.1 Number of Electrodes	13
3.2 Alternatives for the Electrode Attachment.....	13
3.3 Non-Invasive Electrodes.....	14
3.4 Invasive Electrodes	14
3.5 Training for aEEG Recording.....	14
3.6 Pitfalls and Caveats, Artefacts	15
3.6.1 Impedance vs. Electrode Contact vs. Signal Quality.....	15
3.6.2 Artefacts	15
References.....	17
4. Seizures	22
<i>Mohamed El-Dib, Sampsa Vanhatalo and Lena Hellström-Westas</i>	
4.1 Etiology and Diagnosis of Neonatal Seizures	22
4.2 Postnatal Age at Seizure Onset	22
4.3 Electrographic Seizure Definition.....	22
4.4 Seizure Detection with aEEG	23
4.5 Seizure Types That May Go Unnoticed in the aEEG Trend.....	23
4.6 Seizure Burden (SB).....	27
4.7 Role of Automated Seizure Detection.....	27
References.....	30
5. Neonatal Encephalopathy in the Full-Term Infant	
Due to Hypoxia-Ischemia and Focal Brain Lesions	31
<i>Linda S de Vries and Lena Hellström-Westas</i>	
5.1 Neonatal Encephalopathy (NE) Due to Hypoxia-Ischemia	31
5.1.1 aEEG Background Activity.....	31
5.1.2 Sleep-Wake Cycling (SWC).....	31
5.1.3 Reactivity to Care	32

5.1.4	aEEG, NIRS and Biomarkers.....	32
5.1.5	Preterm Infants with HIE	32
5.1.6	Seizures in Infants with NE Following HI or Focal Brain Lesions.....	32
5.2	Neonatal Encephalopathy Due to Causes Other Than Hypoxia-Ischemia	32
	References.....	34
6.	Neonatal Encephalopathy Due to Infections, Metabolic Disorders and Genetic Causes.....	91
	<i>Linda S de Vries and Sonia L Bonifacio</i>	
6.1	Hypoglycemia	91
6.2	Metabolic Diseases	91
6.3	Hyperbilirubinaemia	91
6.4	Central Nervous System Infections.....	91
6.5	Neurocutaneous Syndromes and Brain Malformations.....	91
6.6	Neonatal Epilepsy.....	92
	References.....	92
7.	The Preterm aEEG.....	140
	<i>Lena Hellström-Westas, Linda S de Vries and Sampsa Vanhatalo</i>	
7.1	aEEG Monitoring of Preterm Infants	140
7.2	Normal Maturational Changes	140
7.3	Assessing Continuity in the Preterm aEEG	141
7.4	aEEG Recordings in Extremely Preterm Infants.....	142
7.5	Burdjalov Score and Measures of aEEG Maturation	142
7.6	Sleep-Wake Cycling (SWC).....	145
7.7	aEEG Monitoring in Sick and Unstable Preterm Infants.....	146
7.8	Acute Changes.....	148
7.9	Chronic Changes.....	149
7.10	Seizures	149
7.11	Prediction of Outcome	149
	References.....	151
8.	Other EEG Trends and Computational Measures.....	173
	<i>Sampsa Vanhatalo</i>	
8.1	Feature-Based Trends.....	173
8.2	Interpreting Trends.....	173
8.3	Visualization of Trends Other Than aEEG.....	173
8.4	Other Computational Measures	175
8.4.1	Measures with Correlates in Visual Review	175
8.4.2	Computational Measures beyond the Visually Reviewed EEG Properties.....	177
8.4.3	Future Directions in the Computational Analyses of the Newborn EEG	177
	References.....	177
9.	Advancing Neonatal Neurocritical Care with Brain Monitoring	178
	<i>Sonia L Bonifacio</i>	
9.1	Introduction	178
9.2	Neurocritical Care for Neonates.....	178
9.3	All Care Is Brain Care—Applying Principles of NeuroNICU Care to Every Baby in Every Unit	179
9.4	Multimodal Monitoring.....	180
9.5	Suggested Clinical Practice Guidelines for Review of aEEG/vEEG	181
	References.....	181
