

Contents

Chapter 1. Introduction	1
Chapter 2. A_∞ -algebras, Kadeishvili's theorem and Merkulov's construction	7
2.1. Basic definitions	7
2.2. Duality	12
2.3. Bar and cobar constructions	19
2.4. Kadeishvili's theorem	24
2.5. Special cases of Kadeishvili's Theorem	30
2.6. Counitality	32
2.7. Pretriangulated A_∞ -categories and twisted complexes	40
Chapter 3. Quasi-hereditary algebras and bocses	43
3.1. Definitions and recollections	43
3.2. Extensions between modules over a bocs	47
3.3. A_∞ -coalgebra structures on projective resolutions	49
3.4. Uniqueness of Borel subalgebras	52
Chapter 4. A_∞ -structures on Ext-algebras and uniqueness of bocses	57
4.1. An explicit A_∞ -coalgebra structure on \mathcal{P}	57
4.2. Truncated multiplications and the differential on the semifree dg algebra	62
4.3. Well-behaved splittings	65
4.4. The main result	67
Appendix A. The lift of the comultiplication μ_2 on \mathcal{P}	83
Appendix B. The homotopy μ_3 on \mathcal{P} up to which μ_2 is coassociative	87
Appendix C. The maps $\mu_4^0, \mu_4^1, \mu_4^2$ on \mathcal{P}	99
Appendix D. The maps μ_5^0 and μ_5^1 on \mathcal{P}	123
Appendix E. The map μ_6^0 on \mathcal{P}	157
Bibliography	217
