

Contents

Chapter 1. Introduction	1
Chapter 2. Quaternionic contact structures and the Biquard connection	7
Chapter 3. The torsion and curvature of the Biquard connection	13
3.1. The torsion tensor	13
3.2. The Curvature Tensor	18
Chapter 4. QC-Einstein quaternionic contact structures	23
4.1. The Bianchi identities	24
4.2. Examples of qc-Einstein structures	28
4.3. Proof of Theorem 1.3	31
Chapter 5. Conformal transformations of a qc-structure	37
5.1. Conformal transformations preserving the qc-Einstein condition	38
5.2. Quaternionic Heisenberg group. Proof of Theorem 1.1	39
Chapter 6. Special functions and pseudo-Einstein quaternionic contact structures	47
6.1. Quaternionic pluriharmonic functions	47
6.2. Quaternionic pluriharmonic functions on hypercomplex manifold	51
6.3. The hypersurface case	53
6.4. Anti-CRF functions on Quaternionic contact manifold	55
Chapter 7. Infinitesimal Automorphisms	63
7.1. 3-contact manifolds	63
7.2. QC vector fields	65
Chapter 8. Quaternionic contact Yamabe problem	71
8.1. The Divergence Formula	71
8.2. Partial solutions of the qc-Yamabe problem	72
8.3. Proof of Theorem 1.2	74
Acknowledgements	75
Bibliography	77
Index	81
