

# CONTENTS OF COMPLETE VOLUME 7— NERVOUS SYSTEM: TWO-PART SET

## **PART I    Brain**

- SECTION 1 Normal and Abnormal Development
- SECTION 2 Cerebral Cortex and Neurocognitive Disorders
- SECTION 3 Epilepsy
- SECTION 4 Psychiatry
- SECTION 5 Hypothalamus, Pituitary, Sleep, and Thalamus
- SECTION 6 Disorders of Consciousness
- SECTION 7 Basal Ganglia and Movement Disorders
- SECTION 8 Cerebellum and Ataxia
- SECTION 9 Cerebrovascular Circulation and Stroke
- SECTION 10 Multiple Sclerosis and Other Central Nervous System Autoimmune Disorders
- SECTION 11 Infections of the Nervous System
- SECTION 12 Neuro-Oncology
- SECTION 13 Headache
- SECTION 14 Head Trauma

**ISBN: 978-1-4160-6387-2**

## **PART II    Spinal Cord and Peripheral Motor and Sensory Systems**

- SECTION 1 Cranial Nerve and Neuro-Ophthalmological Disorders
- SECTION 2 Spinal Cord: Anatomy and Myelopathies
- SECTION 3 Spinal Trauma
- SECTION 4 Nerve Roots and Plexus Disorders
- SECTION 5 Mononeuropathies
- SECTION 6 Peripheral Neuropathies
- SECTION 7 Autonomic Nervous System and Its Disorders
- SECTION 8 Pain
- SECTION 9 Floppy Infant
- SECTION 10 Motor Neuron and Its Disorders
- SECTION 11 Neuromuscular Junction and Its Disorders
- SECTION 12 Muscle and Its Disorders

**ISBN: 978-1-4160-6386-5**

## SECTION 1—NORMAL AND ABNORMAL DEVELOPMENT

- 1-1 Embryo at 18 Days, 2
- 1-2 Embryo at 20 to 24 Days, 3
- 1-3 Central Nervous System at 28 Days, 4
- 1-4 Central Nervous System at 36 Days, 5
- 1-5 Defective Neural Tube Formation, 6
- 1-6 Defective Neural Tube Formation (Continued), 7
- 1-7 Spinal Dysraphism, 8
- 1-8 Spinal Dysraphism (Continued), 9
- 1-9 Fetal Brain Growth in the First Trimester, 10
- 1-10 Craniosynostosis, 11
- 1-11 Extracranial Hemorrhage and Skull Fractures in the Newborn, 12
- 1-12 Intracranial Hemorrhage in the Newborn, 13
- 1-13 The External Development of the Brain in the Second and Third Trimesters, 14
- 1-14 Mature Brain Ventricles, 15
- 1-15 Hydrocephalus, 16
- 1-16 Surgical Treatment of Hydrocephalus, 17
- 1-17 Cerebral Palsy, 18
- 1-18 Establishing Cellular Diversity in the Embryonic Brain and Spinal Cord, 20
- 1-19 Generation of Neuronal Diversity in the Spinal Cord and Hindbrain, 22
- 1-20 Circuit Formation in the Spinal Cord, 23
- 1-21 Sheath and Satellite Cell Formation, 24
- 1-22 Development of Myelination and Axon Ensheathment, 25
- 1-23 Brachial Plexus and/or Cervical Nerve Root Injuries at Birth, 26
- 1-24 Morphogenesis and Regional Differentiation of the Forebrain, 27
- 1-25 Neurogenesis and Cell Migration in the Developing Neocortex, 28
- 1-26 Neuronal Proliferation and Migration Disorders, 29
- 1-27 Developmental Dyslexia, 30
- 1-28 Autism Spectrum Disorders, 31
- 1-29 Rett Syndrome, 32

## SECTION 2—CEREBRAL CORTEX AND NEUROCOGNITIVE DISORDERS

- 2-1 Superolateral Surface of Brain, 34
- 2-2 Medial Surface of Brain, 35
- 2-3 Inferior Surface of Brain, 36
- 2-4 Cerebral Cortex: Function and Association Pathways, 37
- 2-5 Major Cortical Association Bundles, 38
- 2-6 Corticocortical and Subcorticocortical Projection Circuits, 39
- 2-7 Corpus Callosum, 40
- 2-8 Rhinencephalon and Limbic System, 41
- 2-9 Hippocampus, 42
- 2-10 Fornix, 43
- 2-11 Amygdala, 44
- 2-12 Forebrain Regions Associated with Hypothalamus, 45
- 2-13 Thalamocortical Radiations, 46
- 2-14 Neuronal Structure and Synapses, 47
- 2-15 Chemical Synaptic Transmission, 48
- 2-16 Summation of Excitation and Inhibition, 49
- 2-17 Types of Neurons in Cerebral Cortex, 50
- 2-18 Astrocytes, 51
- 2-19 Testing for Defects of Higher Cortical Function, 52

- 2-20 Memory Circuits, 53
- 2-21 Amnesia, 54
- 2-22 Dominant Hemisphere Language Dysfunction, 55
- 2-23 Nondominant Hemisphere Higher Cortical Dysfunction, 56
- 2-24 Alzheimer Disease: Pathology, 57
- 2-25 Alzheimer Disease: Distribution of Pathology, 58
- 2-26 Alzheimer Disease: Clinical Manifestations, Progressive Phases, 59
- 2-27 Frontotemporal Dementia, 60
- 2-28 Dementia with Lewy Bodies, 61
- 2-29 Vascular Dementia, 62
- 2-30 Treatable Dementias, 63
- 2-31 Normal-Pressure Hydrocephalus, 64

## SECTION 3—EPILEPSY

- 3-1 Electroencephalography, 66
- 3-2 Focal (Partial) Seizures, 67
- 3-3 Generalized Tonic-Clonic Seizures, 68
- 3-4 Absence Seizures, 69
- 3-5 Epileptic Syndromes, 70
- 3-6 Neonatal Seizures, 71
- 3-7 Status Epilepticus, 72
- 3-8 Causes of Seizures, 73
- 3-9 Neurobiology of Epilepsy, 74
- 3-10 Neurobiology of Epilepsy (Continued), 75
- 3-11 Neurobiology of Epilepsy (Continued), 76
- 3-12 Treatment of Epilepsy: Preoperative Evaluation, 77
- 3-13 Treatment of Epilepsy: Resective Surgery, 78

## SECTION 4—PSYCHIATRY

- 4-1 Limbic System, 80
- 4-2 Major Depressive Disorder, 81
- 4-3 Postpartum Depression, 82
- 4-4 Bipolar Disorder, 83
- 4-5 Generalized Anxiety Disorder, 84
- 4-6 Social Anxiety disorder, 85
- 4-7 Panic Disorder, 86
- 4-8 Posttraumatic Stress Disorder, 87
- 4-9 Obsessive-Compulsive Disorder, 88
- 4-10 Somatization, 89
- 4-11 Conversion Disorder, 90
- 4-12 Schizophrenia, 91
- 4-13 Alcohol Use Disorders, 92
- 4-14 Treatment for Alcohol Use Disorders, 93
- 4-15 Alcohol Withdrawal, 94
- 4-16 Opioid Use Disorders, 95
- 4-17 Opioid Withdrawal, 96
- 4-18 Borderline Personality Disorder, 97
- 4-19 Antisocial Personality Disorder, 98
- 4-20 Intimate Partner Abuse, 99
- 4-21 Elder Abuse, 100
- 4-22 Delirium and Acute Personality Changes, 101
- 4-23 Delirium and Acute Personality Changes (Continued), 102
- 4-24 Insomnia, 103
- 4-25 Pediatrics: Depressive Disorders, 104
- 4-26 Pediatrics: Anxiety Disorders, 105
- 4-27 Pediatrics: Disruptive Behavior Disorders, 106
- 4-28 Pediatrics: Attention-Deficit/Hyperactivity Disorder, 107
- 4-29 Pediatrics: Eating Disorders, 108
- 4-30 Child Abuse: Fractures in Abused Children, 109

- 4-31 Child Abuse: Staging of Injuries and Injury Patterns, 110

## SECTION 5—HYPOTHALAMUS, PITUITARY, SLEEP, AND THALAMUS

- 5-1 Anatomic Relationships of the Hypothalamus, 112
- 5-2 Development and Developmental Disorders of the Hypothalamus, 113
- 5-3 Blood Supply of the Hypothalamus and Pituitary Gland, 114
- 5-4 General Topography of the Hypothalamus, 115
- 5-5 Overview of Hypothalamic Nuclei, 116
- 5-6 Hypothalamic Control of the Pituitary Gland, 117
- 5-7 Hypothalamic Control of the Autonomic Nervous System, 118
- 5-8 Olfactory Inputs to the Hypothalamus, 119
- 5-9 Visual Inputs to the Hypothalamus, 120
- 5-10 Somatosensory Inputs to the Hypothalamus, 121
- 5-11 Taste and Other Visceral Sensory Inputs to the Hypothalamus, 122
- 5-12 Limbic and Cortical Inputs to the Hypothalamus, 123
- 5-13 Overview of Hypothalamic Function and Dysfunction, 124
- 5-14 Regulation of Water Balance, 125
- 5-15 Temperature Regulation, 126
- 5-16 Fever: Cytokines and Prostaglandins Cause the Sickness Response, 127
- 5-17 Fever: Hypothalamic Responses During Inflammation Modulate Immune Response, 128
- 5-18 Regulation of Food Intake, Body Weight, and Metabolism, 129
- 5-19 Stress Response, 130
- 5-20 Hypothalamic Regulation of Cardiovascular Function, 131
- 5-21 Hypothalamic Regulation of Sleep, 132
- 5-22 Narcolepsy: A Hypothalamic Sleep Disorder, 133
- 5-23 Sleep-Disordered Breathing, 134
- 5-24 Parasomnias, 135
- 5-25 Divisions of the Pituitary Gland and Its Relationships to the Hypothalamus, 136
- 5-26 Posterior Pituitary Gland, 137
- 5-27 Anatomic Relationships of the Pituitary Gland, 138
- 5-28 Effects of Pituitary Mass Lesions on the Visual Apparatus, 139
- 5-29 Anterior Pituitary Hormone Deficiencies, 140
- 5-30 Severe Anterior Pituitary Hormone Deficiencies (Panhypopituitarism), 141
- 5-31 Postpartum Pituitary Infarction (Sheehan Syndrome), 142
- 5-32 Pituitary Apoplexy, 143
- 5-33 Thalamic Anatomy and Pathology, 144
- 5-34 Thalamic Anatomy and Pathology (Continued), 145

## SECTION 6—DISORDERS OF CONSCIOUSNESS (COMA)

- 6-1 Coma, 148
- 6-2 Disorders of Consciousness, 149

- 6-3 Full Outline of Unresponsiveness Score (FOUR), 150
- 6-4 Prognosis in Coma Related to Severe Head Injuries, 151
- 6-5 Differential Diagnosis of Coma, 152
- 6-6 Hypoxic-Ischemic Brain Damage, 153
- 6-7 Vegetative State and Minimally Conscious State, 154
- 6-8 Brain Death, 155
- 6-9 Ventilatory Patterns and Apnea Test, 156

## SECTION 7—BASAL GANGLIA AND MOVEMENT DISORDERS

- 7-1 Basal Nuclei (Ganglia), 158
- 7-2 Basal Ganglia and Related Structures, 159
- 7-3 Schematic and Cross Section of Basal Ganglia, 160
- 7-4 Parkinsonism: Early Manifestations, 161
- 7-5 Parkinsonism: Successive Clinical Stages, 162
- 7-6 Neuropathology of Parkinson Disease, 163
- 7-7 Progressive Supranuclear Palsy, 164
- 7-8 Corticobasal Degeneration, 165
- 7-9 Parkinsonism: Hypothesized Role of Dopamine, 166
- 7-10 Surgical Management of Movement Disorders, 167
- 7-11 Hyperkinetic Movement Disorder: Idiopathic Torsion Dystonia, 168
- 7-12 Hyperkinetic Movement Disorder: Cervical Dystonia, 169
- 7-13 Chorea/Ballism, 170
- 7-14 Tremor, 171
- 7-15 Tics and Tourette Syndrome, 172
- 7-16 Myoclonus, 173
- 7-17 Wilson Disease, 174
- 7-18 Psychogenic Movement Disorders, 175
- 7-19 Cerebral Palsy, 176

## SECTION 8—CEREBELLUM AND ATAXIA

- 8-1 Cerebellum and the Fourth Ventricle, 178
- 8-2 Cerebellum Gross Anatomy, 179
- 8-3 Cerebellar Peduncles, 180
- 8-4 Cerebellar Cortex and Nuclei, 181
- 8-5 Cerebellar Cortex and Nuclei (Continued), 182
- 8-6 Cerebellar Cortical and Corticonuclear Circuitry, 183
- 8-7 Cerebellar Cortical and Corticonuclear Circuitry (Continued), 184
- 8-8 Cerebellum Subdivisions and Afferent Pathways, 185
- 8-9 Cerebellum Subdivisions and Afferent Pathways (Continued), 186
- 8-10 Cerebellar Efferent Pathways, 187
- 8-11 Cerebellovestibular Pathways, 189
- 8-12 Cerebellum Modular Organization, 190
- 8-13 Cerebrocerebellar Connections, 191
- 8-14 Cerebellar Motor Examination, 192
- 8-15 Cerebellar Cognitive Affective Syndrome, 193
- 8-16 Cerebellar Disorders Differential Diagnosis, 194
- 8-17 Gait Disorders—Differential Diagnosis, 195
- 8-18 Gait Disorders—Differential Diagnosis (Continued), 196
- 8-19 Friedreich Ataxia, 197

## SECTION 9—CEREBROVASCULAR CIRCULATION AND STROKE

### OVERVIEW AND APPROACH TO STROKE PATIENT

- 9-1 Arteries to Brain and Meninges, 200
- 9-2 Territories of the Cerebral Arteries, 201

- 9-3 Arteries of Brain: Lateral and Medial Views, 202
- 9-4 Arteries of Brain: Frontal View and Section, 203
- 9-5 Stroke Subtypes, 204
- 9-6 Temporal Profile of Transient Ischemic Attack (TIA) and Completed Infarction (CI), 205
- 9-7 Clinical Evaluation and Therapeutic Options in Stroke, 206
- 9-8 Clinical Evaluation and Therapeutic Options in Stroke (Continued), 207
- 9-9 Uncommon Etiologic Mechanisms in Stroke, 208

### ANTERIOR CIRCULATION ISCHEMIA

- 9-10 Common Sites of Cerebrovascular Occlusive Disease, 209
- 9-11 Other Etiologies of Carotid Artery Disease, 210
- 9-12 Clinical Manifestations of Carotid Artery Disease, 211
- 9-13 Occlusion of Middle and Anterior Cerebral Arteries, 212
- 9-14 Diagnosis of Internal Carotid Disease, 213
- 9-15 Diagnosis of Carotid Artery Disease, 214
- 9-16 Carotid Endarterectomy, 215
- 9-17 Endovascular ICA Angioplasty and Stenting Using A Protective Device, 216

### VERTEBRAL BASILAR SYSTEM DISORDERS

- 9-18 Arterial Distribution to the Brain: Basal View, 217
- 9-19 Arteries of Posterior Cranial Fossa, 218
- 9-20 Clinical Manifestations of Vertebrobasilar Territory Ischemia, 219
- 9-21 Intracranial Occlusion of Vertebral Artery, 220
- 9-22 Occlusion of Basilar Artery and Branches, 221
- 9-23 Occlusion of "Top of Basilar" and Posterior Cerebral Arteries, 222

### BRAIN EMBOLI

- 9-24 Cardiac Sources of Brain Emboli, 223
- 9-25 Uncommon Cardiac Mechanisms in Stroke, 224

### LACUNAR STROKE

- 9-26 Lacunar Infarction, 225
- 9-27 Risk Factors for Cardiovascular Disease, 226

### OTHER

- 9-28 Hypertensive Encephalopathy, 227
- 9-29 Hypoxia, 228

### COAGULOPATHIES

- 9-30 Role of Platelets in Arterial Thrombosis, 229
- 9-31 Inherited Thrombophilias, 230
- 9-32 Antiphospholipid Antibody Syndrome, 231

### VENOUS SINUS THROMBOSIS

- 9-33 Meninges and Superficial Cerebral Veins, 232
- 9-34 Intracranial Venous Sinuses, 233
- 9-35 Diagnosis of Venous Sinus Thrombosis, 234

### INTRACEREBRAL HEMORRHAGE

- 9-36 Pathogenesis and Types, 235
- 9-37 Clinical Manifestations of Intracranial Hemorrhage Related to Site, 236
- 9-38 Vascular Malformations, 237

### SUBARACHNOID HEMORRHAGE AND INTRACRANIAL ANEURYSMS

- 9-39 Distribution and Clinical Manifestations of Congenital Aneurysm Rupture, 238
- 9-40 Giant Congenital Aneurysms, 239

- 9-41 Ophthalmologic Manifestations of Cerebral Aneurysms, 240
- 9-42 Approach to Internal Carotid Aneurysms, 241
- 9-43 Interventional Radiologic Repair of Berry Aneurysms, 242

### PEDIATRICS

- 9-44 Pediatric Cerebrovascular Disease, 243

### REHABILITATION

- 9-45 Positioning in Bed and Passive Range-of-Motion Exercises After Stroke, 244
- 9-46 Aphasia Rehabilitation, 245
- 9-47 Other Rehabilitative Issues: Dysphagia/Gait Training/Locked-in Syndrome, 246

## SECTION 10—MULTIPLE SCLEROSIS AND OTHER CENTRAL NERVOUS SYSTEM AUTOIMMUNE DISORDERS

### MULTIPLE SCLEROSIS

- 10-1 Overview, 248
- 10-2 Clinical Manifestations, 249
- 10-3 Diagnosis, 250
- 10-4 Diagnosis: Spinal Cord MRI in Multiple Sclerosis, 251
- 10-5 Diagnosis: Visual Evoked Response and Spinal Fluid Analysis, 252
- 10-6 MS Pathophysiology, 253
- 10-7 MS Pathophysiology (Continued), 254
- 10-8 MS Relapses, 256
- 10-9 MS Relapses (Continued), 257
- 10-10 MS Relapses (Continued), 258
- 10-11 MS Relapses: Consequences, 259
- 10-12 Enigma of Progressive MS, 260
- 10-13 MS Pathology, 261
- 10-14 MS Treatment, 262

### NEUROIMMUNOLOGIC SYNDROMES

- 10-15 Neuromyelitis Optica, Acute Disseminated Encephalomyelitis, and Acute Hemorrhagic Leukoencephalitis—Radiologic Findings, 264
- 10-16 Neuromyelitis Optica, Acute Disseminated Encephalomyelitis, and Acute Hemorrhagic Leukoencephalitis—Histopathologic Findings, 265
- 10-17 Other Neuroimmunologic Syndromes: an Overlap Between Primary and Paraneoplastic Processes, 266
- 10-18 Stiff-Man Syndrome, 267
- 10-19 Paraneoplastic Immune-Mediated Disorders, 268
- 10-20 Paraneoplastic Immune-Mediated Disorders (Continued), 269
- 10-21 Neuroimmunology: Paraneoplastic and Other Autoimmune Syndromes—Central Nervous System, 270
- 10-22 Neuroimmunology: Paraneoplastic and Other Autoimmune Syndromes—Peripheral Motor Sensory Unit, 271

## SECTION 11—INFECTIONS OF THE NERVOUS SYSTEM

- 11-1 Bacterial Meningitis, 274
- 11-2 Bacterial Meningitis (Continued), 275
- 11-3 Brain Abscess, 276
- 11-4 Parameningeal Infections, 277
- 11-5 Infections in the Immunocompromised Host: Progressive Multifocal Leukoencephalopathy and Nocardiosis, 278
- 11-6 Infections in the Immunocompromised Host: Listeriosis and Toxoplasmosis, 279
- 11-7 Neurocysticercosis, 280
- 11-8 Spirochetal Infections: Neurosyphilis, 281

- 11-9 Spirochetal Infections: Lyme Disease, 282
- 11-10 Tuberculosis of Brain and Spine, 283
- 11-11 Tetanus, 284
- 11-12 Aseptic Meningitis, 285
- 11-13 Primary HIV Infection of the Nervous System, 286
- 11-14 HIV Life Cycle and Antiretroviral Medications, 287
- 11-15 Poliomyelitis, 288
- 11-16 Herpes Zoster, 289
- 11-17 Herpes Simplex Virus Encephalitis and Rabies, 290
- 11-18 Cerebral Malaria and African Trypanosomiasis, 291
- 11-19 Trichinosis (Trichinellosis), 292
- 11-20 Cryptococcal Meningitis, 293
- 11-21 Creutzfeldt-Jakob Disease, 294
- 11-22 Neurosarcoidosis, 295

**SECTION 12—NEURO-ONCOLOGY**

- 12-1 Clinical Presentations of Brain Tumors, 298
- 12-2 Gliomas, 299
- 12-3 Glioblastoma, 300
- 12-4 Pediatric Brain Tumors, 301
- 12-5 Pediatric Brain Tumors (Continued), 302
- 12-6 Metastatic Tumors to Brain, 303
- 12-7 Meningiomas, 304
- 12-8 Meningiomas (Continued), 305
- 12-9 Pituitary Tumors, 306
- 12-10 Clinically Nonfunctioning Pituitary Tumor, 307
- 12-11 Craniopharyngioma, 308
- 12-12 Tumors of Pineal Region, 309

- 12-13 Vestibular Schwannomas, 310
- 12-14 Removal of Vestibular Schwannoma, 311
- 12-15 Intraventricular Tumors, 312
- 12-16 Chordomas, 313
- 12-17 Differential Diagnosis of CNS Tumors, 314
- 12-18 Treatment Modalities, 315

**SECTION 13—HEADACHE**

- 13-1 Overview of Headaches, 318
- 13-2 Migraine Pathophysiology, 319
- 13-3 Migraine Presentation, 320
- 13-4 Migraine Aura, 321
- 13-5 Migraine Management, 322
- 13-6 Trigeminal Autonomic Cephalalgias: Cluster Headache, 323
- 13-7 Trigeminal Autonomic Cephalalgias: Paroxysmal Hemicrania (PH), 324
- 13-8 Tension-Type Headache and Other Benign Episodic and Chronic Headaches, 325
- 13-9 Pediatric Headache, 326
- 13-10 Cranial Neuralgias—Trigeminal Neuralgia, 327
- 13-11 Other Cranial Neuralgias, 328
- 13-12 Idiopathic Intracranial Hypertension (IIH), Pseudotumor Cerebri, 329
- 13-13 Intracranial Hypotension/ Low Cerebrospinal Fluid Pressure Headache, 330
- 13-14 Giant Cell Arteritis, 331
- 13-15 Contiguous Structure Headaches, 332
- 13-16 Thunderclap Headache and Other Headaches Presenting in the Emergency Department, 333

- 13-17 Headaches Presenting in the Emergency Department (Continued), 334
- 13-18 Headaches Presenting in the Emergency Department (Continued), 335
- 13-19 Headaches Presenting in the Emergency Department (Continued), 336

**SECTION 14—HEAD TRAUMA**

- 14-1 Skull: Anterior View, 338
- 14-2 Skull: Lateral View, 339
- 14-3 Skull: Midsagittal Section, 340
- 14-4 Calvaria, 341
- 14-5 External Aspect of Skull Base, 342
- 14-6 Internal Aspects of Base of Skull: Bones, 343
- 14-7 Internal Aspects of Base of Skull: Orifices, 344
- 14-8 Skull Injuries, 345
- 14-9 Concussion, 346
- 14-10 Acute Epidural Hematoma, 347
- 14-11 Acute Subdural Hematoma, 348
- 14-12 CT Scans and MR Images of Intracranial Hematomas, 349
- 14-13 Vascular Injury, 350
- 14-14 Initial Assessment and Management of Head Injury, 351
- 14-15 Glasgow Coma Score, 352
- 14-16 Neurocritical Care and Management after Traumatic Brain Injury: Devices for Monitoring Intracranial Pressure, 353
- 14-17 Neurocritical Care and Management: Decompressive Craniectomy, 354
