Part I GENERAL CONCEPTS 1

Chapter 1 Athletes and Neurological Injuries: A View From 10,000 Feet 3

The Present 4
Spectrum of Neurological Injury in Sport 4
Concluding Thoughts 32
References 32

Chapter 2 Medicolegal Considerations in Neurological Sports Medicine 43

With Increased Awareness Comes Increased Scrutiny 43
The King of Concussions 44
Negligence 44
Duty and Breach 45
Violation of a Statutory Duty 45
Standard of Care Defined by Experts 46
Standard of Care Established Through Literature, Rules, Protocols,
and Textbooks 47
Good Samaritan Laws 48
Proximate Cause 48
Assumption of the Risk 48
Theories of Negligence 49
Cases of Interest 49
NFL and NCAA Concussion Litigation 52
Concluding Thoughts 54
References 55

Chapter 3	Having a Game Plan	59
	Developing an Emergency Action Plan	59
	Caring for Athletic Injuries	64
	Responsibilities of Host and Visiting Medical Staff	71
	Concluding Thoughts	73
	References	73
Part II	SPORTS-RELATED HEAD INJURIES	75
Chapter 4	Biomechanics, Pathophysiology, and Classification of Concussion	77
	Biomechanics and Basic Concepts	77
	Lessons Learned From Football	80
	Lessons Learned From Other Sports	84
	Pathophysiology of Concussion	89
	Classification of Concussion and Grading Systems	94
	Concluding Thoughts	96
	References	96
Chapter 5	In the Trenches: Acute Evaluation and Management of Concussion . . .	103
	Presentation	105
	Acute Evaluation	110
	Concluding Thoughts	114
	References	115
Chapter 6	Neuroimaging and Neurophysiological Studies in the Head-Injured Athlete	121
	Standard Neuroimaging	121
	Advanced Structural Techniques	125
	Advanced Functional Techniques	129
	Neurophysiological Techniques	133
	Concluding Thoughts	135
	References	135
Chapter 7	Neuropsychological Assessment in Concussion	141
	Use of Symptom Checklists	142
	Value of Neuropsychological Assessment of Concussion	143

Issues With Computerized Assessments	147
Other Considerations	150
Other Issues Addressed by Neuropsychologists in Assessing Concussed Patients	151
Concluding Thoughts	155
References	155

Chapter 8 Role of Balance Testing and Other Adjunct Measures in Concussion 163

Balance Assessment in Concussion	163
Emerging Technology and Future Directions for Adjunct Measures of Assessment in Concussion	169
Concluding Thoughts	173
References	173

Chapter 9 Postconcussion Syndrome 179

What's In a Definition	179
Scope of the Problem	181
A Neuroanatomical Substrate for Prolonged Symptoms	181
Psychogenesis of PCS and PPCS	182
A Modern Conceptual Framework for PCS and PPCS	183
Concluding Thoughts	184
References	184

Chapter 10 Neuropathology of Chronic Traumatic Encephalopathy 189

Definition of Chronic Traumatic Encephalopathy	189
Posttraumatic Encephalopathy Versus Chronic Traumatic Encephalopathy	192
Gross Morphology and Histomorphology of Chronic Traumatic Encephalopathy	194
Concluding Thoughts	202
References	202

Chapter 11 The Emerging Role of Subconcussion 209

A Working Definition	209
Laboratory Evidence of Subconcussive Effects	210
Clinical Evidence of Subconcussion	211
Concluding Thoughts	214
References	216

Chapter 12	Severe Head Injury and Second Impact Syndrome	219
	Cerebral Contusions and Intraparenchymal Hemorrhage	219
	Traumatic Subarachnoid Hemorrhage	220
	Subdural Hematoma	221
	Skull Fractures	222
	Epidural Hematoma	223
	Diffuse Axonal Injury	224
	Arterial Dissection and Stroke	225
	Fatalities	227
	Other Posttraumatic Sequelae	228
	Second Impact Syndrome	229
	Concluding Thoughts	231
	References	231
Chapter 13	Neurological Considerations in Return to Sport Participation	235
	History of Return to Play	235
	Symptom Complex and Identification	239
	Return to Play and Brain Abnormalities	240
	Addressing and Resolving Return-to-Play Issues	244
	Concluding Thoughts	249
	References	249
Chapter 14	The Role of Pharmacologic Therapy and Rehabilitation in Concussion . .	251
	The Decision to Treat Pharmacologically	251
	Somatic Symptoms	252
	Sleep Disturbance Symptoms	257
	Emotional Symptoms	258
	Cognitive Symptoms	260
	The Role of Rehabilitation in Concussion Management	262
	Concluding Thoughts	264
	References	264
Chapter 15	The Research Behind Natural Neuroprotective Approaches to Concussion	271
	Eicosapentaenoic Acid and Docosahexaenoic Acid	271
	Curcumin	272
	Resveratrol	275
	Creatine	276
	Green Tea	278

Caffeine	278
Vitamins E and C	280
Vitamin D	281
<i>Scutellaria baicalensis</i>	282
Examples of Other Neuroprotective Nutraceuticals	283
Another Natural Approach: Hyperbaric Oxygen Therapy	283
Concluding Thoughts	284
Acknowledgment	285
References	285

Part III SPORT-RELATED INJURIES OF THE SPINE AND PERIPHERAL NERVOUS SYSTEM297

Chapter 16 Cervical, Thoracic, and Lumbar Spine Injuries: Types, Causal Mechanisms, and Clinical Features299

Background and Epidemiology	299
Normal Anatomy	300
Types of Tissue Injuries and Neurologic Syndromes	300
Common Cervical Injuries and Conditions	307
Common Thoracic Injuries	313
Common Lumbar Injuries	313
Concluding Thoughts	318
References	318

Chapter 17 Management of Spine Injuries, Including Rehabilitation, Surgical Considerations, and Return to Play321

On-the-Field Assessment	321
Radiological Assessment	324
Treatment and Rehabilitation	325
Surgical Considerations	330
Cervical Spine Injuries and Their Management and Treatment	331
Thoracic and Lumbar Spine Injuries and Their Management	334
Concluding Thoughts	336
References	337

Chapter 18 Peripheral Nerve Injuries in Athletes341

Epidemiology	341
Pathogenesis	341
Clinical Evaluation	345

Additional Testing	346
Management Rationale	347
Surgical Options: Primary Nerve Surgery	349
Surgical Options: Secondary Surgery (Soft Tissue or Bony Reconstruction)	350
Postoperative Management and Return to Play	351
Legal Implications	351
Concluding Thoughts	351
References	352

Part IV OTHER SPORTS–RELATED NEUROLOGICAL ISSUES 353

Chapter 19 Headaches in Athletics 355

Clinical Approach and Assessment	355
Commonly Recognized Headache Syndromes Coincidental to Sporting Activity	357
Prolonged Sporting Activity as a Trigger for Commonly Recognized Headache Syndromes	359
Primary Exertional Headache	360
Headaches Attributed to Head or Neck Trauma	361
Headaches Attributed to Sport-Specific Mechanisms	362
Concluding Thoughts	363
References	363

Chapter 20 Heat Illness in Sport 365

Background	365
Contributory Factors in Heat Illness	365
Prevention	367
The Spectrum of Heat Illness and Management	368
Return to Play	370
Concluding Thoughts	370
References	370

Appendix A American Spinal Injury Association (ASIA) Standard Neurological Classification of Spinal Cord Injury 373

Appendix B Sample Concussion Symptom Checklist 375

Appendix C.1 Sport Concussion Assessment Tool (SCAT3) 377

Appendix C.2 Sport Concussion Assessment Tool for Children 383

Appendix D Concussion in Sports Palm Card 389

Index 391
