

Contents

Chapter 1	Introduction	1
Chapter 2	A Brief Account on Bäcklund Transformations	3
2.1	A Warm-Up Approach	3
2.2	Chen's Method	4
2.3	Clairin's Method	5
2.4	Hirota's Bilinear Operator Method	6
2.5	Wahlquist-Estabrook Procedure	7
Chapter 3	Nonlinear Schrödinger Equation	9
3.1	Physical Background	9
3.2	Lax Pair and Floquet Theory	10
3.3	Darboux Transformations and Homoclinic Orbit	12
3.4	Linear Instability	15
3.5	Quadratic Products of Eigenfunctions	16
3.6	Melnikov Vectors	16
3.7	Melnikov Integrals	20
Chapter 4	Sine-Gordon Equation	23
4.1	Background	23
4.2	Lax Pair	23
4.3	Darboux Transformations	24
4.4	Melnikov Vectors	25
4.5	Heteroclinic Cycle	28
4.6	Melnikov Vectors Along the Heteroclinic Cycle	31
Chapter 5	Heisenberg Ferromagnet Equation	35
5.1	Background	35
5.2	Lax Pair	36
5.3	Darboux Transformations	36
5.4	Figure Eight Structures Connecting to the Domain Wall	37
5.5	Floquet Theory	40
5.6	Melnikov Vectors	42

5.7	Melnikov Vectors Along the Figure Eight Structures	44
5.8	A Melnikov Function for Landau-Lifshitz-Gilbert Equation	46
Chapter 6	Vector Nonlinear Schrödinger Equations	47
6.1	Physical Background	47
6.2	Lax Pair	47
6.3	Linearized Equations	48
6.4	Homoclinic Orbits and Figure Eight Structures	49
6.5	A Melnikov Vector	51
Chapter 7	Derivative Nonlinear Schrödinger Equations	53
7.1	Physical Background	53
7.2	Lax Pair	53
7.3	Darboux Transformations	54
7.4	Floquet Theory	56
7.5	Strange Tori	56
7.6	Whisker of the Strange $\mathbb{T}^2$	59
7.7	Whisker of the Circle	60
7.8	Diffusion	61
7.9	Diffusion Along the Strange $\mathbb{T}^2$	63
7.10	Diffusion Along the Whisker of the Circle	64
Chapter 8	Discrete Nonlinear Schrödinger Equation	67
8.1	Background	67
8.2	Hamiltonian Structure	67
8.3	Lax Pair and Floquet Theory	68
8.4	Examples of Floquet Spectra	70
8.5	Melnikov Vectors	71
8.6	Darboux Transformations	73
8.7	Homoclinic Orbits and Melnikov Vectors	75
Chapter 9	Davey-Stewartson II Equation	79
9.1	Background	79
9.2	Linear Stability	80
9.3	Lax Pair and Darboux Transformations	80
9.4	Homoclinic Orbits	82
9.5	Melnikov Vectors	86
9.5.1	Melnikov Integrals	87
9.5.2	An Example	88
9.6	Extra Comments	91
Chapter 10	Acoustic Spectral Problem	93
10.1	Physical Background	93
10.2	Connection with Linear Schrödinger Operator	94
10.3	Discrete Symmetries of the Acoustic Problem	95

10.4	Crum Formulae and Dressing Chains for the Acoustic Problem · · · ·	95
10.5	Harry-Dym Equation · · · · ·	99
10.6	Modified Harry-Dym Equation · · · · ·	101
10.7	Moutard Transformations · · · · ·	103
Chapter 11	SUSY and Spectrum Reconstructions · · · · ·	107
11.1	SUSY in Two Dimensions · · · · ·	108
11.2	The Level Addition · · · · ·	109
11.3	Potentials with Cylindrical Symmetry · · · · ·	111
11.4	Extended Supersymmetry · · · · ·	112
Chapter 12	Darboux Transformations for Dirac Equation · · · · ·	115
12.1	Dirac Equation · · · · ·	115
12.2	Crum Law · · · · ·	117
Chapter 13	Moutard Transformations for the 2D and 3D Schrödinger Equations · · · · ·	123
13.1	A 2D Moutard Transformation · · · · ·	123
13.2	A 3D Moutard Transformation · · · · ·	124
Chapter 14	BLP Equation · · · · ·	127
14.1	The Darboux Transformations for the BLP Equation · · · · ·	127
14.2	Crum Law · · · · ·	128
14.3	Exact Solutions · · · · ·	132
14.4	Dressing From Burgers Equation · · · · ·	134
Chapter 15	Goursat Equation · · · · ·	137
15.1	The Reduction Restriction · · · · ·	139
15.2	Binary Darboux Transformations · · · · ·	141
15.3	Moutard Transformations for 2D-MKdV Equation · · · · ·	143
Chapter 16	Links Among Integrable Systems · · · · ·	147
16.1	Borisov-Zykov's Method · · · · ·	147
16.2	Higher Dimensional Systems · · · · ·	149
16.3	Modified Nonlinear Schrödinger Equations · · · · ·	151
16.4	NLS and Toda Lattice · · · · ·	152
Bibliography	· · · · ·	155
Index	· · · · ·	161
