Preface.....	xi
Editor	xiii
Contributors	xv

PART I Engineered Systems and Anthropogenic Influence

1 Water Distribution Systems	3
<i>F.A. Bombardelli</i>	
2 Groundwater–Surface Water Discharges.....	19
<i>Christopher Butler and Thomas C. Harmon</i>	
3 Fluid Mechanics of Agricultural Systems	31
<i>Josef Tanny</i>	
4 Desalination and the Environment	41
<i>M.J. Davidson and C.J. Oliver</i>	
5 Bubble Plumes	55
<i>Scott A. Socolofsky and Chris R. Rehmann</i>	
6 Scour around Hydraulic Structures.....	69
<i>F. Sotiropoulos, P. Diplas, and A. Khosronejad</i>	
7 Flow through Urban Canopies.....	85
<i>Rex E. Britter and Silvana Di Sabatino</i>	
8 Flow through Buildings	97
<i>Nigel Berkeley Kaye and Morris R. Flynn</i>	
9 Bluff Body Aerodynamics and Aeroelasticity	111
<i>Ahsan Kareem</i>	
10 Wake–Structure Interactions.....	125
<i>C.H.K. Williamson</i>	
11 Urban Heat Islands.....	143
<i>M. Roth</i>	

PART II Environmental Pollution

12	Atmospheric Dispersion.....	163
	<i>Jeffrey C. Weil</i>	
13	Flow and Dispersion in Street Canyons	175
	<i>Jong-Jin Baik</i>	
14	Air Flow through Tunnels.....	189
	<i>Hong-Ming Jang and Falin Chen</i>	
15	Sound Outdoors and Noise Pollution.....	203
	<i>D.K. Wilson, E.T. Nykaza, M.J. White, M.E. Swearingen, L.L. Pater, and G.A. Luz</i>	
16	Riverine Transport, Mixing, and Dispersion	215
	<i>J. Ezequiel Martin, Meredith L. Carr, and Marcelo H. García</i>	
17	Ocean Outfalls	229
	<i>Philip J.W. Roberts</i>	
18	Modeling Oil Spills to Mitigate Coastal Pollution.....	243
	<i>Poojitha D. Yapa</i>	
19	Miscible and Immiscible Pollutants in Subsurface Systems	257
	<i>Tissa H. Illangasekare and Christophe C. Fripiat</i>	

PART III Numerical Modeling of Environmental Flows

20	Turbulent Flow Modeling	273
	<i>Sukanta Basu</i>	
21	Direct and Large Eddy Simulation of Environmental Flows.....	283
	<i>Sutanu Sarkar and Vincenzo Armenio</i>	
22	Multiscale Nesting and High Performance Computing	301
	<i>Alex Mahalov and Mohamed Moustaoi</i>	
23	Multiscale Representations	311
	<i>Marie Farge, Kai Schneider, Olivier Pannekoucke, and Romain Nguyen van yen</i>	
24	Dispersion Modeling.....	333
	<i>Akula Venkatram</i>	
25	Modeling the Urban Boundary and Canopy Layers	345
	<i>Jason Ching and Fei Chen</i>	
26	Air Pollution Modeling and Its Applications.....	359
	<i>Daewon W. Byun</i> (In Memoriam by Kenneth L. Schere)	
27	Mathematical Models to Improve Performance of Surface Irrigation Systems	381
	<i>D. Zerihun and C.A. Sanchez</i>	
28	Cyberinfrastructure and Community Environmental Modeling.....	399
	<i>J.P.M. Syvitski, Scott D. Peckham, Olaf David, Jonathan L. Goodall, Cecelia Deluca, and Gerhard Theurich</i>	
29	Uncertainty in Environmental NWP Modeling.....	411
	<i>David R. Stauffer</i>	

PART IV Laboratory Modeling of Environmental Flows

30	Physical Modeling of Hydraulics and Sediment Transport.....	427
	<i>Olivier Cazaillet, Sultan Alam, and Clinton S. Willson</i>	
31	Laboratory Modeling	443
	<i>Stuart B. Dalziel</i>	
32	General Laboratory Techniques.....	457
	<i>Thomas Peacock</i>	
33	Hot-Wire Anemometry in Turbulence Research.....	467
	<i>Eliezer Kit</i>	
34	Optical Methods and Unconventional Experimental Setups in Turbulence Research.....	481
	<i>Roi Gurka and Eliezer Kit</i>	

PART V Environmental Measurements

35	Hydrophysical Measurements in Natural Waters	497
	<i>Elena Roget</i>	
36	Flow Measurements in the Atmosphere	511
	<i>Ronald J. Calhoun</i>	
37	Atmospheric Flux Measurements	519
	<i>Eric R. Pardyjak, Chad W. Higgins, and Marc B. Parlange</i>	
38	Clear-Air Radar Profiling of Wind and Turbulence in the Lower Atmosphere	535
	<i>Jean-Luc Caccia</i>	
Index	545
