

TABLE OF CONTENTS

Chapter One: Banach Algebras

1-1	Function algebras	1
1-2	Banach algebras	8
1-3	The maximal ideal spaces of some examples	29
1-4	The functional calculus	46
1-5	Analytic structure	56
1-6	Point derivations	63

Chapter Two: Measures

2-1	Representing and annihilating measures	79
2-2	The Choquet boundary	87
2-3	Peak points	96
2-4	Peak sets and interpolation	102
2-5	Representing measures and the Jensen inequality	114

2-6	Representing measures and Schwarz's lemma	127
2-7	Antisymmetric algebras	136
2-8	The essential set	144
Chapter Three: Rational Approximation		
3-1	Preliminaries	149
3-2	Annihilating measures for $R(X)$	158
3-3	Representing measures for $R(X)$	170
3-4	Harmonic functions	179
3-5	The algebras $A(X)$ and A_X	195
Chapter Four: Dirichlet Algebras		
4-1	Dirichlet algebras	207
4-2	Annihilating measures	215
4-3	Applications	228
4-4	Analytic structure in the maximal ideal space	243
Appendix:	Cole's Counterexample to the Peak Point Conjecture	255
Bibliography		263
