

CONTENTS

I	HILBERT SPACE AND HILBERT SPACE OPERATORS	
	§ 1 Hilbert space-----	1
	§ 2 Linear operators-----	9
	§ 3 Spectral theory-----	17
	§ 4 Differentiation-----	24
	Exercises-----	32
II	GENERALIZED INVERSES OF BOUNDED LINEAR OPERATORS WITH CLOSED RANGE	
	§ 1 Definition and basic properties-----	37
	§ 2 Other definitions-----	47
	§ 3 A representation theorem and applications--	54
	1. An operator-valued integral representation-----	59
	2. An iterative method-----	62
	3. An analog of Schulz's method-----	69
	4. Hyperpower methods-----	71
	5. Tihonov regularization-----	74
	6. A method based on interpolatory function theory-----	76
	7. Other representations-----	81
	§ 4 Steepest descent-----	82
	§ 5 The conjugate gradient method-----	90
	Exercises-----	110
III	GENERALIZED INVERSES OF BOUNDED LINEAR OPERATORS WITH ARBITRARY RANGE	
	§ 1 Definition and basic properties-----	113

§ 2	A representation theorem-----	119
§ 3	Steepest descent-----	124
§ 4	The conjugate gradient method-----	130
	Exercises-----	143
	BIBLIOGRAPHY-----	145
	INDEX OF SYMBOLS-----	162
	SUBJECT INDEX-----	163
