

- Overview -

Abstract	XII
Zusammenfassung	XV
1 Introduction	1
1.1 Overview	1
1.2 Challenges for research on visual communication in the forestry sciences	1
1.3 Visual communication: challenges for forestry organisations in Germany and Japan	4
1.4 Brief overview of research framework and expected results	11
2 Forestry sciences meet “visual analysis”	13
2.1 Visual materials in forestry sciences: landscape preference and audience orientation	15
2.2 Developments in the social sciences: the contested notion of ‘real’	25
2.3 A new approach: categorising photographs	39
3 Methodology	45
3.1 Why categorise images from photo contests?	46
3.2 Why conduct interviews in groups?	57
3.3 Interview: procedural aspects of categorising exercise	62
3.4 Selection of the images	68
3.5 Presentation of the results	82
4 Results	89
4.1 Results regarding nature-/ forestry-related photo contests	89
4.2 Results from clustering	131
4.3 Description of similarities and differences in Germany and Japan	201

5 Discussion	211
5.1 Evaluation of hypothesis	211
5.2 Evaluation of methodology	215
5.3 Policy implication.....	217
5.4 Future tasks.....	229
6 References	232
Appendix	246
