

TABLE OF CONTENTS

| | |
|--|----|
| Preface | xi |
| 1. Observations on the Mathematical Software Effort — <i>W. J. Cody</i> | 1 |
| Introduction | 1 |
| The Past | 2 |
| The Present | 7 |
| The Future | 12 |
| References | 14 |
| 2. LINPACK — A Package for Solving Linear Systems — <i>J. J. Dongarra and G. W. Stewart</i> | 20 |
| Introduction | 20 |
| History | 21 |
| LINPACK and Matrix Decomposition | 22 |
| Nomenclature and Conventions | 25 |
| The Square Part of LINPACK | 27 |
| The Least Squares Part of LINPACK | 31 |
| Numerical Properties | 34 |
| Efficiency | 37 |
| Design and Implementation | 39 |
| Testing | 43 |
| Conclusions | 45 |
| References | 47 |
| 3. FUNPACK — A Package of Special Function Routines — <i>W. J. Cody</i> | 49 |
| Introduction | 49 |
| History | 50 |
| Design | 53 |
| Implementation | 57 |
| Tuning and Testing | 61 |
| Retrospect | 63 |
| Acknowledgments | 64 |
| References | 65 |

| | |
|--|-----|
| 4. EISPACK — A Package for Solving Matrix Eigenvalue Problems — <i>J. J. Dongarra and C. B. Moler</i> | 68 |
| Introduction | 68 |
| History | 69 |
| Organization | 72 |
| Algorithms | 76 |
| Numerical Properties | 82 |
| EISPACK-3 | 85 |
| References | 87 |
| 5. The MINPACK Project — <i>J. Moré, D. Sorensen, B. Garbow, and K. Hillstom</i> | 88 |
| Introduction | 88 |
| History | 89 |
| Algorithms | 91 |
| Scale Invariant Algorithms | 95 |
| Robust Software | 98 |
| Convergence Testing | 100 |
| User Interface | 103 |
| Documentation | 104 |
| Transportability | 106 |
| Concluding Remarks | 109 |
| References | 109 |
| 6. Software for Ordinary Differential Equations — <i>L. F. Shampine and H. A. Watts</i> | 112 |
| Introduction | 112 |
| Mathematical Problem | 113 |
| Numerical Methods and Codes | 114 |
| Software Matters for Solutions Output | 115 |
| Error Control | 117 |
| Choice of Step Size | 121 |
| Accuracy Considerations | 122 |
| Specifying the Differential Equations | 124 |
| Storage Management and Levels of Codes | 126 |
| Providing User Assistance | 127 |
| Choosing a Code | 128 |
| DEPAC Software | 129 |
| Summary | 130 |
| References | 130 |

| | |
|---|-----|
| 7. Sources of Information on Quadrature Software — <i>D. Kahaner</i> | 134 |
| Introduction | 134 |
| One-Dimensional Quadrature | 135 |
| Quadrature Formulas | 135 |
| Gaussian Quadrature | 137 |
| Kronrod Quadrature | 138 |
| Using Quadrature Formulas | 140 |
| Automated Quadrature Programs | 141 |
| Program 1: Direct Communication | 141 |
| Program 2: Reverse Communication | 142 |
| Program 3: An ODE-like Adaptive Quadrature | 143 |
| Program 4: Model 1970 Adaptive Quadrature | 144 |
| Program 5: Modern Global Adaptive Quadrature | 147 |
| Multidimensional Quadrature | 148 |
| Iterated Integral | 148 |
| Program 6: Evaluation of 2-D Iterated Integrals | 149 |
| Pure Multidimensional Methods | 150 |
| Korobov Quadrature | 151 |
| Monte Carlo Quadrature | 152 |
| Software in the Standard Libraries | 152 |
| References | 161 |
| 8. A Survey of Sparse Matrix Software — <i>Iain S. Duff</i> | 165 |
| Introduction | 165 |
| Direct Solution of Linear Equations | 167 |
| Iterative Methods | 171 |
| Elliptic Partial Differential Equations | 175 |
| Eigensystems | 179 |
| Least-Squares Problems | 182 |
| Nonlinear Systems | 183 |
| Linear Programming | 184 |
| Sparse Matrix Packages | 185 |

| | | |
|---|-----|-----|
| Acknowledgments | 186 | |
| References | 186 | |
| 9. Mathematical Software for Elliptic Boundary Value Problems | | 200 |
| — <i>Ronald F. Boisvert and Roland A. Sweet</i> | | |
| Mathematical Preliminaries | 201 | |
| The Operator | 201 | |
| The Domain | 203 | |
| The Boundary Conditions | 203 | |
| Example 1 | 206 | |
| Example 2 | 206 | |
| Algorithmic Issues | 207 | |
| Approximation Methods | 207 | |
| Solution Algorithms | 210 | |
| Software Engineering Issues | 214 | |
| Basic Software Organization | 214 | |
| Representation of Input and Output | 218 | |
| Testing and Evaluation | 222 | |
| Distribution and Maintenance | 224 | |
| Case Studies | 224 | |
| Case Study: FISHPAK | 224 | |
| Example 3 | 228 | |
| Example 4 | 229 | |
| Example 5 | 230 | |
| Case Study: ELLPACK | 231 | |
| Sources of Software for Partial Differential Equations | 237 | |
| Commercial Libraries | 237 | |
| Software Clearing Houses | 237 | |
| Journals That Distribute Software | 238 | |
| Journals That Publish Descriptions of Programs | 238 | |
| Catalog of Software for Elliptic Problems | 238 | |
| References | 255 | |
| Appendix A: Solution of Example 3 Using FISHPAK | 261 | |

Appendix B: List of Contributors to ELLPACK 263

| | |
|---|-----|
| 10. The IMSL Library | |
| — <i>Thomas J. Aird</i> | 264 |
| Introduction | 264 |
| IMSL Company History | 264 |
| Company Organization and Advisory Board | 267 |
| Facts about the IMSL Library | 268 |
| Library Contents | 269 |
| Documentation | 276 |
| Support | 278 |
| Availability | 279 |
| Subscription Fees and Policies | 280 |
| Library Development | 281 |
| The Research and Development Organization | 283 |
| The Development System | 284 |
| References | 291 |
| Appendix A: Sample Chapter Documentation | 292 |
| Appendix B: Sample Subroutine Documentation | 297 |
| Appendix C: Fortran Reference Manuals | 300 |
| 11. The SLATEC Common Mathematical Library | |
| — <i>Bill L. Buzbee</i> | 302 |
| Introduction | 302 |
| Motivations | 302 |
| Organization and Administration | 304 |
| Goals | 304 |
| Library Development | 305 |
| Portability | 305 |
| Standards | 306 |
| Code Selections | 306 |
| Documentation | 310 |

| | |
|--|-----|
| Quick Checks | 310 |
| Disclaimer | 310 |
| Classification System | 311 |
| Abstracts | 311 |
| Distribution of Library Source | 311 |
| Maintenance | 311 |
| Unexpected Benefits from SLATEC | 312 |
| Future Plans | 312 |
| Lessons Learned | 313 |
| Acknowledgments | 315 |
| References | 316 |
| Appendix A: SLATEC Programming Standards | 319 |
| Appendix B: Prologue Comment Cards for Documentation Program | 320 |
| | |
| 12. The Boeing Mathematical Software Library | |
| — <i>A. H. Erisman, K. W. Neves, and I. R. Philips</i> | 321 |
| Introduction | 321 |
| The Boeing Library as a Product | 321 |
| The Boeing Library as a User Tool | 326 |
| The Boeing Library as a Project | 330 |
| The Boeing Library: History and Future | 332 |
| Summary | 335 |
| Acknowledgments | 336 |
| References | 337 |
| Appendix: BCSLIB Standards | 338 |
| | |
| 13. The PORT Mathematical Subroutine Library | |
| — <i>Phyllis Fox</i> | 346 |
| Motivation and History of Development | 346 |
| Portability | 346 |
| PORT's Development in a Research Setting | 350 |
| The PORT Framework | 351 |
| Error Handling | 351 |
| Dynamic Storage Allocation Using a Stack | 352 |
| Language Considerations | 353 |
| Modularity | 353 |
| Testing — An Axiomatic Approach | 354 |

| | |
|--|-----|
| Documentation And Installation | 355 |
| User Reference Sheets | 355 |
| Installation | 356 |
| PORT Sites | 356 |
| Current PORT-related Activities | 357 |
| Benchmarking | 357 |
| Monitoring PORT | 358 |
| Summary | 358 |
| References | 358 |
| Appendix A: Determination of Correct Floating-Point Model Parameters — <i>N. L. Schryer</i> | 360 |
| Appendix B: Definition of Real Floating-Point Quantities: R1MACH | 367 |
| Appendix C: PORT User Reference Sheets: Example | 372 |
| 14. The Evolving NAG Library Service — <i>Brian Ford and James C. T. Pool</i> | 375 |
| Introduction | 375 |
| History of NAG | 376 |
| NAG Library “Machine” | 377 |
| Contribution | 378 |
| Validation | 379 |
| Assembly | 379 |
| Implementation | 382 |
| Distribution | 383 |
| Maintenance/Service | 383 |
| Library Contents | 384 |
| Hierarchy of Software | 384 |
| Organization of the Library and Documentation | 385 |
| Algorithmic Content | 387 |
| Evolution of the NAG Fortran Library | 390 |
| High-Performance Computers | 390 |
| Fortran Standards | 391 |
| Mark 11 of the NAG Fortran Library | 391 |

| | |
|-------------------------------------|-----|
| The Fortran Programming Environment | 393 |
| Interactive Access to Documentation | 393 |
| Graphics | 394 |
| Software Tools | 395 |
| The Future Scientific Workstation | |
| Conclusion | 396 |
| References | 396 |
| Subject Index | 399 |
