1	INTRODUCTION	1
2	LITERATURE REVIEW	3
2.1	FRACTURE MECHANICS	3
2.1.1	Introduction and Concepts	3
2.1.2	Linear-Elastic Fracture Mechanics (LEFM)	4
2.1.2.1	The Stress Intensity Factor (K) Criterion	6
2.1.3	Elastic-Plastic Fracture Mechanics (EPFM)	9
2.1.3.1	The Crack Tip Opening Displacement Criterion	9
2.1.3.2	The J -Integral Criterion	14
2.2	RESIDUAL STRESSES	18
2.2.1	Concept, Types and Their Development in Materials	18
2.2.2	Measurements	20
2.2.2.1	The X-Ray Diffraction Method	20
2.2.2.2	The Hole-Drilling Method	24
2.3	EFFECTS OF RESIDUAL STRESS FIELDS ON THE FRACTURE BEHAVIOUR OF MATERIALS	26
3	MATERIALS AND EXPERIMENTAL PROCEDURES	30
3.1	OVERVIEW OF THE EXPERIMENTS PERFORMED	30
3.2	MATERIALS	31
3.3	SPECIMEN PREPARATION DETAILS	31
3.4	EXPERIMENTAL PROCEDURES	36
3.4.1	Mechanical Tests	36
3.4.2	Impact Tests	37
3.4.3	Microstructure and Microhardness Evaluations	37
3.4.4	Stress-Relief Heat Treatments	38
3.4.5	Generation of Residual Stress Fields	39
3.4.5.1	Preloading	39
3.4.5.2	Shot-Peening	40
3.4.5.3	“Hot-Spot”	43
3.4.5.4	Grinding	45
3.4.6	Measurement of Residual Stress Fields	45
3.4.6.1	X-Ray Analysis	46
3.4.6.2	Hole-Drilling	49
3.4.7	Finite Element Analysis	50
3.4.8	Fracture Mechanics Tests	50
