

CONTENTS

<i>Preface and Introduction</i>	<i>vii</i>
<i>List of Symbols</i>	<i>xi</i>

1. The Problem	1
2. Thoughts on Model Building	5
3. On Stochastic Models	9
4. Time Invariance	17
5. Independence	21
6. Intermezzo on the Binomial Distribution	23
7. On the Physical Background to the Assumptions	27
8. The Intensity	29
9. Mathematics, at last!	31
10. Confrontation with Reality	39
11. Critique of the Mathematics	43
12. Critique of the Physics	47
13. Other Applications of the Model	51
14. The Poisson Approximation to the Binomial Distribution	53
15. Spatially Uniform Distribution, Point Processes	59
16. A Detailed Analysis of Actual Observations	65

17. The chi-square Test for Goodness of Fit	81
18. The Historical Perspective	93
Exercises	113
Examples for Further Investigation	141
Programs	161
References	177
Index	179
