PART 1 THEORY

I. Foundations 3

- 1.1 Introduction, 3
- 1.2 Randomness, 3
- 1.3 Probability, 7
 - 1.3.1 Axiom Systems, 7
 - 1.3.2 Coherence, 12
 - 1.3.3 Operationalizing Subjective Probability Beliefs, 13
 - 1.3.4 Comparing Probability Definitions, 14
- 1.4 Thomas Bayes, 15
- 1.5 Summary, 18
 - Complement to Chapter I: The Axiomatic Foundation of Decision Making of Leonard J. Savage, 18
 - Exercises, 20

II. Principles 23

- 2.1 Introduction, 23
- 2.2 Bayes' Theorem for Discrete Parameters, 24
 - 2.2.1 Example (Defective Parts), 24
 - 2.2.2 Bayes' Theorem (Discrete Parameter), 24
 - 2.2.3 Remarks, 24
 - 2.2.4 Interpretation of Bayes' Theorem, 25

- 2.3 Bayesian Methods, 25
 - 2.3.1 Estimation: Decision Theory—Utility, 25
Interval Estimation: Credibility Intervals
(Continuous Parameter), 29
 - 2.3.2 Hypothesis Testing, 32
 - Simple vs. Simple, 33
 - Simple vs. Composite, 34
 - The Lindley Paradox, 36
- 2.4 Binomial Distribution with Discrete Parameter, 37
 - 2.4.1 Example, 37
 - 2.4.2 Solution for Defective Parts Example, 38
- 2.5 Bayes' Theorem (Continuous Parameter), 39
- 2.6 Example: Binomial Distribution with Continuous
Parameter, 40
 - 2.6.1 Uniform Prior, 40
 - 2.6.2 Defective Parts Example, 40
- 2.7 Prior Distributions, 42
 - 2.7.1 The Bayesian vs. the Non-Bayesian Approach to
Inference: Empirical Bayes Estimation, 42
 - 2.7.2 Vague (Indifference) Priors, 48
 - Principle of Stable Estimation, 51
 - 2.7.3 Natural Conjugate Priors; g -Priors, 52
 - Data Based Priors, 53
 - g -Priors, 54
 - 2.7.4 Assessing Complete Prior Distributions, 55
- 2.8 Likelihood Principle, 56
 - Likelihood Principle and Conditioning, 56
- 2.9 Predictive Distributions; de Finetti's Theorem;
Philosophy of Predictivism, 57
 - 2.9.1 Predictive Distributions, 57
 - Definition, 57
 - Predictive Density for Defective Parts
Example, 58
 - 2.9.2 Exchangeability, 58
 - Definition, 58
 - Example of (Multivariate) Exchangeability
Without Independence, 59
 - 2.9.3 de Finetti's Theorem, 59

2.10	Robust and Nonparametric Bayesian Inference: The Bayesian Bootstrap, 62	
2.11	Example: Paternity Suits, 64 Observational Data, 64	
2.12	Summary: Advantages of Bayesian Approach, 66 Exercises, 66	
III.	Approximations, Numerical Methods, and Computer Programs	69
3.1	Introduction, 69	
3.2	Large-Sample Posterior Distributions, 70	
3.3	Approximate Evaluation of Bayesian Integrals, 73	
3.3.1	Low Dimension (by Numerical Approximation Methods), 74	
	The Lindley Approximation, 74	
	The Tierney–Kadane Approximation, 77	
	The Naylor–Smith Approximation, 80	
3.3.2	High Dimension (by Monte Carlo Integration), 82	
3.4	Simulation of Bayesian Distributions, 84	
3.5	Bayesian Computer Programs, 85	
3.5.1	Introduction, 85	
3.5.2	Program Summaries, 86	
3.6	Summary, 101 Exercises, 101	
IV.	Assessment of Multivariate Prior Distributions: Assessing the Probability of Nuclear War	103
4.1	Introduction, 103	
4.2	Multivariate Subjective Assessment, 104	
4.3	Overview, 104	
4.4	Model, 104	
4.5	Multivariate Density Assessment, 105 Normal Kernel, 105	
4.6	Summary of Group Assessment Approach, 106	
4.7	Empirical Application: Nuclear War, 107	
4.7.1	Consistency of Response, 108	
4.7.2	Implications, 112	

- 4.7.3 Histograms, 112
- 4.7.4 Smoothed Prior Density (Fitted), 116
- 4.8 Psychological Factors Relating to Subjective Probability Assessment, 119
 - Conclusions Regarding Psychological Factors, 120
- 4.9 Summary, 121
 - Exercises, 121

PART 2 MODELS AND APPLICATIONS

- V. Bayesian Inference in Regression** **125**
 - 5.1 Introduction, 125
 - 5.2 Simple Linear Regression, 125
 - 5.2.1 Model, 125
 - Likelihood Function, 126
 - Prior, 126
 - 5.2.2 Predictive Distribution, 129
 - 5.2.3 Posterior Inferences About the Standard Deviation, 130
 - 5.3 Multivariate Regression Model, 131
 - 5.3.1 Multivariate Vague Priors, 132
 - 5.3.2 Multivariate Regression, 132
 - Likelihood Function, 133
 - Vague Priors, 134
 - Posterior Analysis, 134
 - 5.3.3 Posterior Inferences About the Covariance Matrix, 136
 - 5.3.4 Predictive Density, 136
 - 5.4 Summary, 136
 - Exercises, 137
- VI. Bayesian Multivariate Analysis of Variance and Covariance** **139**
 - 6.1 Introduction, 139
 - 6.2 MANOVA Model: One-Way Layout, 139
 - Reduction to Regression Format, 140
 - 6.3 Likelihood, 140

- 6.4 Priors, 141
- 6.5 Practical Implications of the Exchangeability Assumption in the MANOVA Problem, 141
Other Implications, 142
- 6.6 Posterior, 142
 - 6.6.1 Joint Posterior, 142
 - 6.6.2 Conditional Posterior, 143
 - 6.6.3 Marginal Posterior, 143
 - 6.6.4 Example: Balanced Design, 144
- 6.7 Example: Test Scores, 145
- 6.8 Posterior Distributions of Effects, 147
- 6.9 Summary, 148
Exercises, 148

VII. Bayesian Inference in Classification and Discrimination 151

- 7.1 Introduction, 151
- 7.2 Likelihood Function, 152
- 7.3 Prior Density, 153
- 7.4 Posterior Density, 153
- 7.5 Predictive Density, 153
- 7.6 Posterior Classification Probability, 155
- 7.7 Example: Two Populations, 156
- 7.8 Second Guessing Undecided Respondents:
An Application, 157
 - 7.8.1 Problem, 157
Solution, 157
 - 7.8.2 Illustration, 159
- 7.9 Summary, 161
Exercises, 161

VIII. A Case Study in Applied Bayesian Inference 163

- 8.1 Introduction, 163
- 8.2 The Federalist Papers, 164
- 8.3 Likelihood Function, 164
- 8.4 Posterior Odds for Disputed Authorship, 165
- 8.5 Prior Distribution of Parameters, 167

- 8.6 Final Results, 170
- 8.7 Summary, 171
- Exercises, 171

APPENDIXES

Appendix 1. Bayes, Thomas, by Hilary L. Seal	175
Appendix 2. Thomas Bayes—A Biographical Note, by G. A. Barnard	181
Appendix 3. An Essay Towards Solving a Problem in the Doctrine of Chances, by The Late Rev. Mr. Bayes, F.R.S.	185
Appendix 4. An Essay Towards Solving a Problem in the Doctrine of Chances, by Reverend Thomas Bayes	189
Bibliography	219
Author Index	231
Subject Index	235
