<i>Preface</i>	v
<i>List of Figures</i>	xiii
<i>Historical Introduction: The Emergence of Advanced Degrees and Graduate Research</i>	xv
1. GETTING STARTED	1
The right beginning    Meaning and purpose of theses and dissertations    What constitutes an acceptable T/D?    Make a personal time line    Take advantage of technology    Characteristics of high-quality student research    The thesis in an honors program    Thesis and dissertation objectives    Summary	
2. THE RESEARCH ADVISOR	33
Learning about advisor functions    The T/D as a teaching device    Scope of advisor responsibilities    Selection of the research advisor    Summary	

3. DEVELOPING THE PROPOSAL	63
Interactions of student and academic advisor	Disabled or handicapped students
Choosing the topic for study	Problems of foreign students
Personal criteria for student use	Using libraries and other information sources
Summary	
4. PREPARATION OF THE PROPOSAL	89
Getting started	Outlining the proposal
Filling in the outline	Research design
Research methodology	Make software your servant
Summary	
5. THE THESIS OR DISSERTATION COMMITTEE	131
Functions of the committee	Student/committee negotiations
Selecting the committee members	Committee member roles
Summary	
6. APPROVAL OF THE OVERVIEW	153
Characteristics of a sound overview	Purposes of the proposal overview meeting
Consultation with committee members	Coordination role of the advisor
After the overview meeting	Summary
7. CONDUCT OF THE STUDY	183
Time	Use of the computer
Use of private information	Obligations to human subjects
Animal subjects in research	Maintaining communication
Material aid for student research	Student dropouts in the research stage
Summary	
8. WRITING THE MANUSCRIPT	217
The thesis/dissertation format	An approach to the first draft
Using advice and technical assistance
