

## CONTENTS

PREFACE . . . . .	ix
-------------------	----

### PATTERN CLASSIFICATION—IDENTIFICATION

Application of Pattern Recognition to Some Problems in Economics . . . . .	3
<i>Jean-Marie Blin, King-Sun Fu, and Andrew B. Whinston</i>	
A Distribution-Free Pattern Classification Procedure with Performance Monitoring Capability . . . . .	21
<i>Harvey L. Kasdan</i>	
Spectral Analysis in Econometrics . . . . .	39
<i>Phoebus J. Dhrymes</i>	
Approximate Representations of Causal Systems with Bounded Memory . . . . .	51
<i>William L. Root</i>	

### NUMERICAL METHODS

Dual, Feasible Direction Algorithms. . . . .	67
<i>O. L. Mangasarian</i>	
On a Class of Numerical Methods with an Adaptive Integration Subprocedure for Optimal Control Problems . . . . .	89
<i>E. Polak</i>	
Convergent Step Sizes for Curvilinear-Path Methods of Minimization . . . . .	105
<i>James W. Daniel</i>	
An Algorithm for Minimizing a Differentiable Function that Uses Only Function Values . . . . .	117
<i>Jane Cullum</i>	
An Approximation Algorithm for n-th Derivatives and Its Applications to Analysis and to Stochastic Integrals . . . . .	129
<i>L. C. Young</i>	

## CONTENTS

Differential Games with Time Lag . . . . .	287
<i>Austin Blaquière</i>	

Stochastic Differential Games . . . . .	299
<i>Avner Friedman</i>	

### STOCHASTIC CONTROL

Stochastic Models . . . . .	311
<i>E. J. McShane</i>	

Dynamical Systems with Small Stochastic Terms . . . . .	325
<i>Wendell H. Fleming</i>	

Optimality of Controls for Systems with Jump Markov Disturbances . . . . .	335
<i>R. W. Rishel</i>	

### ECONOMICS

Optimal Systems for Information and Decision . . . . .	355
<i>Jacob Marschak</i>	

Shadow Prices for Infinite Growth Programs: The Functional Analysis Approach . . . . .	371
<i>M. Majumdar and R. Radner</i>	

Price Decentralization in the Case of Interrelated Payoffs . . . . .	391
<i>Alain Bensoussan</i>	

A One Sector Model of Economic Growth with Uncertain Technology: An Example of Steady State Analysis in a Stochastic Optimal Control Problem . . . . .	407
<i>William A. Brock and Leonard J. Mirman</i>	

### LINEAR AND NONLINEAR PROGRAMMING

Dual Problems of Optimal Control . . . . .	423
<i>R. Tyrell Rockafellar</i>	

Induced Constraints for Stochastic Optimization Problems . . . . .	433
<i>Roger Wets</i>	

CONTENTS

Problems of Convergence in Stochastic  
Linear Programming . . . . . 445  
*Bernard Van Cutsem*

Coordination of Two-Level Organizations with  
Multiple Objectives . . . . . 455  
*A. M. Geoffrion and W. W. Hogan*

PUBLIC SYSTEMS

The Optimal Number of Servers in a Many  
Server Queueing System . . . . . 469  
*Jos H. A. de Smit*

Allocation of Emergency Units: Response Areas . . . . . 479  
*Jan M. Chaiken*

Optimization of Power Systems . . . . . 487  
*Hermann W. Dommel*

Water Pollution Control . . . . . 499  
*Glenn W. Graves*
