<b>Acknowledgements</b>	<b>viii</b>
<b>Preface</b>	<b>ix</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Background and objectives	1
1.2 Overview	2
<b>2 Some simple analyses</b>	<b>5</b>
2.1 Comparisons at individual times	5
2.2 Response feature analysis	11
2.3 Individual curve fitting	18
2.4 Further reading	23
<b>3 Univariate analysis of variance</b>	<b>25</b>
3.1 The fundamental model	25
3.2 Anova	33
3.3 Calculation of expected mean-squares	37
3.4 Expected mean-squares by 'synthesis'	42
3.5 Contrasts, compound symmetry and <i>F</i> -tests	46
3.6 Relaxing assumptions: univariate, modified univariate, or multivariate tests?	50
3.7 Further reading	58
<b>4 Multivariate analysis</b>	<b>60</b>
4.1 Models without special covariance structure	60
4.2 Hotelling's $T^2$	60
4.3 Testing for polynomial trends	65
4.4 Manova	67
4.5 Further reading	70

<b>5</b>	<b>Regression models</b>	<b>71</b>
5.1	Special case	71
5.2	General case	73
5.3	Structured covariance case	81
5.4	Some covariance structures	83
5.5	Further reading	85
<b>6</b>	<b>Two-stage linear models</b>	<b>87</b>
6.1	Random regression coefficients	87
6.2	Estimation and testing	89
6.3	Particular aspects	91
6.4	Examples	95
6.5	Further reading	98
<b>7</b>	<b>Crossover experiments</b>	<b>100</b>
7.1	Simple $2 \times 2$ designs	100
7.2	A Bayesian approach to $2 \times 2$ designs	105
7.3	More complex crossover designs for two treatments	106
7.4	Crossover trials with a binary response	108
7.5	Further topics	110
7.6	Further reading	112
<b>8</b>	<b>Categorical data</b>	<b>114</b>
8.1	Introduction	114
8.2	Markov chain models	115
8.3	Log-linear models	117
8.4	Linear model methods for group and time comparisons	118
8.5	Randomization test approaches	124
8.6	Some special cases	127
8.7	Further reading	128
<b>9</b>	<b>Some further topics</b>	<b>130</b>
9.1	Some practical matters	130
9.2	Antedependence	134
9.3	Tracking	141
9.4	Nonlinear growth curves	142
9.5	Non-normal observations	147

<b>10 Computer software and examples</b>	<b>152</b>
10.1 Repeated measures facilities in BMDP, SPSS <sup>x</sup> and SAS	152
10.2 Example 1 – BMDP program 2V	157
10.3 Example 2 – BMDP program 2V	165
10.4 Example 3 – BMDP program 2V	174
10.5 Example 4 – SPSS <sup>x</sup> program MANOVA	181
10.6 Example 5 – SPSS <sup>x</sup> program MANOVA	197
10.7 Example 6 – BMDP program 5V	209
<b>Bibliography/Supplementary References</b>	<b>215</b>
<b>Index</b>	<b>251</b>
