

CONTENTS

INTRODUCTION	1
CHAPTER 1.	SOME INFORMATION FROM THE THEORY OF PROBABILITY AND MATHEMATICAL STATISTICS	4
1.1	Random Variables and Processes	4
1.2	Some Concepts from the Theory of Estimation	9
1.3	Properties of Estimators	14
1.4	On a Problem of Testing of Hypothesis	16
CHAPTER 2.	PARAMETER ESTIMATION FOR SIGNALS OBSERVED IN THE PRESENCE OF GAUSSIAN NOISE	19
2.1	Introduction	19
2.2	Reproducing Kernel Hilbert Space and Likelihood ratio	21
2.3	Parameter Estimation for Signals in the Smooth Case ...	33
2.4	Parameter Estimation for Signals in the Non-Regular Case	49
CHAPTER 3.	PARAMETER ESTIMATION FOR DIFFUSION TYPE PROCESSES	65
3.1	Introduction	65
3.2	Auxiliary Results	66
3.3	Lower Bound and LAN	69
3.4	Properties of Estimators	84
3.5	Disorder Problem	110

CHAPTER 4.	PARAMETER ESTIMATION FOR POINT PROCESSES	118
4.1	Introduction	118
4.2	Auxiliary Results	119
4.3	Estimation of the Parameter of Intensity in the Smooth Case	122
4.4	Estimation of the Parameter of Intensity in the Discontinuous Case	145
4.5	Estimation of Parameters for Processes of Poisson Type	160
CHAPTER 5.	WEAK CONVERGENCE OF LIKELIHOOD RATIO AND PROPERTIES OF ESTIMATORS	175
5.1	On Methods of Studying the Properties of Estimators ...	175
5.2	Hajek Bound	178
5.3	Properties of Estimators in Regular Case	182
5.4	Properties of Estimators in Non-regular Case	193
