GREETINGS

III

Continuous casting

1. **Ladle and Tundish Metallurgy for Continuous Casting**
 - 1.1 **The development of secondary steelmaking process routes for the successful continuous casting of flat products** 1
D. V. Barradell, A. S. Normanton, S. S. Millman
 - 1.2 **Molten steel preparation for continuous casting by means of EAF and secondary metallurgy** 9
L. Costanzi, V. De Angelis, D. Capodilupo, M. Mignanti
 - 1.3 **Prospectives of ladle metallurgy processes** 17
Chr. Gatellier, H. Gaye
 - 1.4 **Reactions between tundish lining and steel and their influence on steel cleanliness** 25
N. Bannenberg, H. Lachmund
 - 1.5 **The role of tundish powders in tundish metallurgy** 32
V. Ludlow, H. Watkinson, K. G. Bain, A. S. Normanton
 - 1.6 **Mathematical models of fluid flow phenomena in tundish operations** 39
J. Szekely, G. Trapaga
 - 1.7 **Process technological and metallurgical measures to improve the oxide cleanliness of CC-strands and their evaluation by the MIDAS method** 45
H. Jacobi, H. Nilsson, H.-J. Ehrenberg, K. Wünnenberg
 - 1.8 **Tundish practices development to improve steel cleanliness and caster operations** 54
E. Santa Maria, P. Bellomo, M. De Santis, G. Polli, M. Arnò
 - 1.9 **Measures taken in secondary steelmaking and continuous casting to influence type, shape and number of non-metallic inclusions in flat products.** 62
H.-P. Narzt, K. Jandl, T. Fastner, K. Antlinger, H. Preßlinger
 - 1.10 **Inclusion control in stainless steels at Avesta Sheffield Ltd.** 69
B. Harkness, D. Dyson
2. **Mould performance**
 - 2.1 **Mould powder consumption – a useful criterion?** 77
M. M. Wolf
 - 2.2 **Study of mould flux entrapment by monitoring casting parameters on Hoogovens and British Steel slab casters** 85
T. L. Spierings, W. H. L. Moonen, R. Boom, D. J. Scoones, G. Thornton, A. S. Normanton

cut your costs

METEC, Halle 7/D 27

2.3	Model studies of surface wave phenomena in the continuous casting mould	94
	J. H. Watters, G. S. Jiang, C. J. Treadgold, A. Kumar	
2.4	Use of an electromagnetic brake (EMBR) on a high-performance continuous casting plant	102
	G. Böcher, U. Hoffmann, P. Müller	
2.5	Combined investigations of the EMBR performance at continuous casters of Sollac Dunkerque and Hoogovens IJmuiden	108
	D. W. van der Plas, C. Platvoet, B. Debiesme, J.-P. Radot, J. M. Galpin	
2.6	Lubrication of continuously casted billet mould by ultrasonic vibration	118
	M. Nogues, M. Roscini, M. Forgeux	
2.7	Operation experience with submerged nozzle changing system on two strand slab caster	125
	W. Juchhoff, A. Kröker-Buhé, E. Schnurrenberger, A. Pfyl, M. Winkelmann	
2.8	Mould performance improvements at the Burns Harbour No 2 slab caster	129
	M. R. Ozgu, M. B. Perrine	
2.9	Settlement of suitable casting conditions of microalloyed steels for plates and tubes	134
	E. Santa Maria, A. Ferretti, A. Moschini, G. Salvemini	
2.10	Operational experience with a resonance mould for continuous casting of slabs	140
	G. Böcher, U. Hoffmann, U. Göhler, O. A. Schmidt, H. van Wyl	
2.11	Results of operational use of a resonance mould	147
	C. Möllers, B. André, F. Bodenstein, H. Rzepczyk, E. Sowka	
2.12	Utilization of mould thermal monitoring for improvement of bloom surface quality on the British Steel, Teesside Works 8-strand bloom caster.	155
	D. W. Bruce, N. S. Hunter	
2.13	Mould instrumentation to study casting behaviour of billets	161
	J. L. Lagerberg, D. W. van der Plas	
3.	<i>Process control, automation and quality detection</i>	
3.1	Modernization of the casting platform at CC No 1 and CC No 2 of Krupp Hoesch Stahl AG	168
	R. Berger, F. K. Bouillon, K.-U. Köhler	
3.2	MIDAS-computer-aided automation of continuous casting plants at Preussag Stahl AG, Salzgitter	172
	U. Hoffmann, V. Grabenhorst, R. Embers, N. Kersten	
3.3	Development of fully automated continuous caster at Kakogawa Works	179
	M. Nakao, M. Matsuo, M. Kimura, K. Imiya, M. Shimizu	
3.4	Application of thermal modelling on the optimization of continuous casting processes and on-line quality control	186
	N. Bannenberg, K. Harste, J. Klingbeil	
3.5	Dynamic secondary cooling model for a continuous casting machine	195
	M. Jauhola, E. Kivelä, J. Kontinen, E. Laitinen, S. Louhenkilpi	

3.6	Computerized surface quality prediction in the C.C. of stainless steel slabs	200
	L. Capotosti, R. Capotosti, F. Macci, M. Milone, A. Spaccarotella	
3.7	Artificial neural networks for improved condition monitoring and quality prediction	208
	H. Peters, N. Link, W. Ungerer	
3.8	Enhanced process controls and visualization with modem communication features	215
	J. Troutmann, J. M. Fernandez, A. Kursfeld, R. Ardell	
4.	Metallurgy and operational results	
4.1	Comparison of curved-mould and vertical-bending type machines for continuous slab casting	219
	E. Sowka	
4.2	Casting at near liquidus temperature	227
	P. Naveau, S. Wilmotte, C. Albrecq	
4.3	Enhancement of the Scunthorpe slab caster and early operational results	233
	R. A. Knights, D. E. Humphreys, G. Ashton, B. Patrick, J. McCann, G. Mottram, A. Arlt, V. Haffmann	
4.4	The design and commissioning of the No 2 continuous casting machine at British Steel's Port Talbot Works	241
	A. R. Thomas, E. Hughes	
4.5	Reduction of center segregation in C. C. slabs at Pohang Works	256
	C. H. Yim, S. M. Lee, I. R. Lee, Y. K. Shin	
4.6	Development of Submerged Nozzle for Reduction of Longitudinal Cracks on Continuously Cast Slabs	263
	H. Yama-zoye, Y. Tanizawa, A. Satoh, T. Hirata	
4.7	Hot commissioning and initial operation of BHP Whyalla's new combi-caster	270
	E. Vickery, K. Gregory, H. Festl, F. Bayer, K. Fellingner, G. Reithner	
4.8	Revamping of Thyssen Stahl AG's CC bloom caster at Duisburg-Ruhrort to increase productivity and improve quality	278
	E. Sowka, B. André, R. Bertram, H. Rzepczyk	
4.9	Conversion from bloom to billet casting for high grade wire products at ENSIDESA	285
	R. Morais, O. Suarez, B. Rischka	
4.10	Productivity increase in the melt shop at Fundia Steel AB, Smedjebacken, with particular emphasis on billet caster upgrade	290
	I. Isaksson, G. Hällen	
4.11	High speed billet casting with convex mold at TOA Steel Himeji Works	294
	M. Tsutsui, M. Shioki, O. Tanno, A. Stilli, F. Kawa	
4.12	Investigations and results of SBQ billets cast with double speed at Thyssen Stahl AG, Oberhausen	300
	R. Bruder, J. Wolf, A. Borowski

Milling of all types of CC-moulds

Ein Unternehmen der
EVERTZ-GRUPPE

METEC, Halle 7/D 27

4.13	The influence of the solidification structure and the casting speed on the formation of the centre porosity of various steels, measured with the buoyancy method on long round strands	304
	K. Wünnenberg, H. Jacobi, H.-E. Wiemer	
4.14	Influence of centre segregation of continuously cast high carbon steel billets on the structure of hot rolled wire rod	315
	W. Dening, H.-J. Eckstein, K. Stercken	
4.15	Precipitation of non-metallic inclusions during the solidification of continuously cast bearing steel	320
	B. Forest, J. Saleil, Ph. Damie, G. Auclair, G. Baudry, D. Benoit, M. Bobadilla, M. Wintz	

Near-net-shape casting

1. Thin slab casting

1.1	Trials for thin slab casting on the conventional two strand slab-caster at Klöckner Stahl GmbH in Bremen	330
	H.-U. Lindenberg, W. Juchhoff, A. Kröker-Buhé, R. Heimann	
1.2	The outstanding performance at the Nucor CSP plant in Hickmann and its expansion by an additional casting strand	336
	R. Mott, D. Chase, F. Hofmann, F.-J. Küper	
1.3	The technology of thin slab casting, production and product quality at the Arvedi I.S.P. Works, Cremona	345
	G. Gosio, M. Morando, L. Manini, A. Guindani, F.-P. Pleschiutchnigg, B. Krüger, H. D. Hoppmann, I. v. Hagen	
1.4	CPR – a combined casting – rolling process for the production of steel strips	360
	M. Espenhahn, R. Bertram, G. Flemming, D. Krüger, G. Pietzko, H. Streubel	
1.5	Thin slab casting of stainless steel grades at Avesta Sheffield AB	368
	R. Laki, J. Egerstad, S. Selldin, A. Flick, A. Kropf, K. Schwaha	
1.6	Flexible thin slab rolling: a new challenge to improve production mix and quality	375
	C. Mantovani, A. Carboni, E. Donini, R. Borsi	
1.7	Metallurgical aspects of thin slab casting and rolling of low carbon steels	383
	R. F. Gadellaa, P. J. Kreijger, M. C. M. Cornelissen, B. Donnay, J. C. Herman, V. Leroy	
1.8	Thermomechanical treatment of direct charged thin slabs	391
	R. Kaspar, O. Pawelski	

2. Casting of long products

2.1	Near-net-shape continuous casting and direct rolling of structural beams at Chaparral steel company, Midlothian	397
	L. F. Rostik	
2.2	The use of near-net-shape casting technology for the production of wide flange beams	403
	G. Lessel, H. Grober
