

CONTENTS

Preface	vi
1. Introduction	1
1.1. The aims of a systemic grammar	1
The universality of the theory	1
The evaluation of grammars	3
The data of grammar	4
Deep and surface	5
Generativeness	7
The objects generated by a grammar	8
Summary of aims	8
1.2. The content of a grammatical description	9
1.2.1. General	9
Grammar and the other levels of language	9
Deep and surface phenomena	12
1.2.2. Sequence	15
Deep and surface sequence	16
The semantic relevance of surface sequence	17
The theoretical demands made by deep sequence	18
The indeterminacy of deep sequence	19
1.2.3. Constituency	20
The criteria for determining constituency	21
The constituency analysis of auxiliary verbs	25
The disadvantages of grouping the verbs together	26
1.2.4. Syntagmatic relations	29
Low-level and high-level syntagmatic relations	30
Functional relations	32

The identification of grammatical functions	34
Functions in independent interrogative clause structures	36
1.2.5. Paradigmatic relations	39
The difference between paradigmatic and syntagmatic relations	39
The environment of a paradigmatic relation	41
A revised definition of paradigmatic relations	42
The environment of paradigmatic relations as redefined	44
Paradigmatic relations as redefined contrasted with syntagmatic relations	44
Grammatical classes	45
The size of items being classified	47
1.2.6. Summary of the content of a systemic description	49
2. How systemic descriptions are generated	53
2.1. Classification by system-network	53
Classifying verbs in English: sub-classification and cross-classification	53
A comparison with word-and-paradigm grammars	55
Systems and system-networks	56
Paradigmatic environments of systems	59
Recursive systems	60
Syntagmatic restrictions on systems	62
The classification of larger items: dependency and mood	65
Transitivity	67
The classification of phrases	68
Rank	69
Classes and features	72
2.2. Structures	73
Optional and obligatory constituents	74
Optional and obligatory structural patterns	75
What is a structure?	76
The generation of structures	77
2.3. Specifying structures by means of feature-realisation rules	78
The meaning of realisation	79
Types of feature-realisation rules	81
Notational conventions for feature-realisation rules	83
‘Understood’ elements	83
Conditions for postulating features	86
2.4. Specifying structures by means of structure-building rules	87
Kinds of structure-building rules	87

The environments and ordering of structure-building rules	89
Notational conventions for structure-building rules	89
An example	91
2.5. Preselecting features by means of function-realisation rules	94
Discontinuity	94
Notational conventions for function-realisation rules	95
Indirectly preselected features	97
2.6. Summary of the generative apparatus	99
An example	99
Predetermination, choice and meaning	101
3. Non-finite clauses	105
3.1. The facts to be covered by the analysis	105
3.1.1. The factors determining the verb-forms	106
Environmental factors	107
Tense/aspect and voice	109
3.1.2. The realisations of tense/aspect and voice	111
Infinitival and gerundival clauses	111
Participial clauses	112
The reduced-relative analysis of postmodifier participial clauses	113
The sources of complexity in postmodifier participial clauses	114
The rules for verb-forms in postmodifier participial clauses	117
Participial clauses after 'see NP ...'	119
Summary of the factors influencing verb-forms in non-finite clauses	121
3.1.3. Permitted and excluded categories of tense/aspect and voice	121
The hierarchical ordering of tense/aspect and voice features	122
Marked and unmarked features	123
The definition of environments	125
Past versus non-past and time-reference in non-finite clauses	127
Purely structural restrictions: the ungrammaticality of 'being ... ing'	131
How 'being ... ing' can be excluded	132
3.2. The analysis	133
3.2.1. Introduction	133
Tense/aspect and voice in non-finite and finite clauses	134
Distributional classes of non-finite clauses	135
Restrictions on tense/aspect and voice	136
3.2.2. The system-network	137
The interaction of the features of clauses and of their verbs	137

Environmental restrictions on clause features	140
3.2.3. The feature-realisation rules	142
Why these rules are so simple	142
The realisations of tense/aspect and voice: auxiliaries or affixes?	145
3.2.4. The structure-building rules	146
Portmanteau realisations	147
Adding the auxiliaries	148
The function 'BE'	150
The ordering of the auxiliaries and affixes	151
The realisations of past and perfect	153
Progressive gerundivals	153
The structure-building rules summarised	154
3.2.5. The function-realisation rules	155
3.2.6. Summary of the analysis	156
4. Introduction to noun-clauses	161
4.1. The kinds of constructions to be covered	161
The range of constructions to be covered	162
4.2. Some facts regarding noun-clauses	165
4.2.1. The structure of the matrix-clause and the noun-clause's functions	166
SUBJECT and COMPLEMENT	166
ATTRIBUANT, ACTOR, GOAL, COMPLETER and ADDRESSEE	167
SUBJECT and MOOD-SUBJECT	170
Summary	171
4.2.2. Extraposition	173
Functions of extraposed clauses	173
Environments where extraposition is impossible or obligatory	174
4.2.3. The finiteness of the noun-clause	175
The functions of participial clauses	176
The functions of infinitival and gerundival clauses	177
Extraposition	177
4.2.4. The presence or absence of SUBJECT in the noun-clause	179
Identifying the SUBJECT in a non-finite clause	179
Conditions for the occurrence of SUBJECT	181
The referent of a 'missing' SUBJECT	182
4.2.5. The position of SUBJECT in the noun-clause; 'SUBJECT-fronting'	183
SUBJECT-fronting defined	183
Extraposition	184
SUBJECT and M-SUBJECT in the noun-clause's structure	185

Recursive SUBJECT-fronting	186
Environments allowing SUBJECT-fronting	186
SUBJECT-fronting when the noun-clause is not SUBJECT	187
Summary	189
4.2.6. The position of COMPLEMENT in the noun-clause; 'COMPLEMENT-fronting'	189
COMPLEMENT-fronting	190
Related constructions	191
What can be fronted	192
4.2.7. The mood of the matrix-clause; 'QUESTION-fronting'	193
The class of the fronted item and of the noun-clause	193
The position of the noun-clause	194
The finiteness of the noun-clause and its functions	194
QUESTION-fronting in 'factive' constructions	196
Differences between QUESTION-fronting and SUBJECT- or COMPLEMENT-fronting	197
Recursive QUESTION-fronting	198
4.2.8. The presence or absence of BINDER in the noun-clause	199
The occurrence of <i>that</i>	199
The occurrence of <i>for</i>	200
4.2.9. Tense and aspect in the noun-clause	201
Restrictions on [past]	201
Environments permitting [past]	203
Finite clauses that must be [non-past]	203
Restrictions on [perfect]	204
Restrictions on [progressive] and [non-progressive]	205
[Progressive] and [non-progressive] 'perception' clauses	206
Restrictions on [progressive] and [non-progressive] summarised	208
Restrictions on 'non-stative'	208
4.2.10. Voice in the noun-clause, and constructions involving <i>need</i> , <i>want</i> , etc.	210
Voice-restrictions with <i>watch</i> , etc.	210
Voice-restrictions with <i>order</i> , etc.	211
Voice-restrictions with <i>need</i> , etc.	212
The SUBJECT of the noun-clause with <i>need</i> , etc.	214
4.2.11. Reaction and cognition	215
Semantic differences	215
Formal differences	215
4.2.12. Factive and modal constructions	219
Semantic differences	219

The polarity of the matrix-clause	220
Formal differences	221
The constructions to which this contrast applies	224
‘Factive’ versus ‘modal’ summarised	225
4.2.13. The possibility of a governing preposition	226
The presence or absence of the agentive <i>by</i> before a noun-clause	226
Phrasal-verb prepositions suppressed before noun-clauses	227
4.2.14. The interaction of these factors with each other; ‘construction-sets’	228
Free and deterministic relations between parameters	228
‘Construction-sets’	229
The numbering of the construction-sets	232
The relation between the verbs or adjectives and the construction-sets	232
4.2.15. The choice of verb or adjective in the matrix-clause	233
The functions of the item reflecting the construction-set	233
The kinds of item occurring as ATTRIBUTE	234
The relation between verb/adjective classes and construction-sets	235
The approach to classification	235
The classes in detail	236
5. A grammar for noun-clauses	241
5.1. The grammar	242
5.1.1. The system-network	242
Network A	243
The main divisions of network A	243
Deficiencies of network A	246
Network B	247
Network C: verbs	249
The sub-classification of lexical verbs and adjectives	249
5.1.2. The feature-realisation rules	255
The relations between the features and the functions	255
The relations among the functions	256
5.1.3. The structure-building rules	257
SUBJECT and M-SUBJECT	260
FRONTED and Q-FRONTED	260
The discontinuity of the noun-clause	261
The FRONTED item’s function in the noun-clause	262
The FRONTED item’s effect on the noun-clause’s features	263
Sequence-rules	264

5.1.4. The function-realisation rules	265
Functions with and without realisations	265
The systemic relations of the realising features	269
5.2. The noun-clause's place in the structure of the matrix-clause	271
5.2.1. The structure of the matrix-clause and the functions of the noun-clause	276
Transitivity and voice in the matrix-clause	276
ATTRIBUANT, COMPLETER, ACTOR and GOAL	276
ATTRIBUTE and ADDRESSEE	277
SUBJECT	278
COMPLEMENT	279
Summary of the introduction and conflation of these functions	280
The selection of the lexical verb	282
The selection of the 'predicate'	283
Voice in the matrix-clause	284
The sequence of elements in the matrix-clause	285
Summary	287
5.2.2. Extraposition	287
The position of an extraposed noun-clause	287
Restrictions on extraposition	289
The expletive <i>it</i>	291
5.2.3. The possibility of a governing preposition	292
5.3. Finite and non-finite clauses	292
5.3.1. The finiteness of the noun-clause	293
The finiteness options regardless of environment	293
Environmental restrictions	294
Structural differences between construction-sets	294
The function-realisation rules	296
The structure-building rules	299
5.3.2. The presence or absence of SUBJECT in the noun-clause	300
The grammar for the noun-clause itself	300
Direct restrictions imposed by 'SUBJECTFULL' and 'SUBJECTLESS'	301
Indirect restrictions imposed by SUBJECT	303
5.3.3. The presence or absence of BINDER in the noun-clause	304
<i>That</i> in the grammar for noun-clauses	304
Environmental restrictions on <i>that</i>	307
<i>For</i> in the grammar for noun-clauses	309
Environmental restrictions on <i>for</i>	309
5.4. Restrictions on tense/aspect and voice	311

5.4.1. Tense and aspect in the noun-clause	311
5.4.2. Voice in the noun-clause and constructions involving <i>need</i> , <i>want</i> , etc.	314
Restrictions imposed by <i>watch</i>	314
Restrictions imposed by <i>order</i> , etc.	315
Restrictions imposed by <i>need</i> , etc.	315
5.4.3. Constructions allowing past-tense noun-clauses	316
The grammar for these contrasts	318
[Reaction], [cognition], [modal] and [factive]	319
Semantic differences	319
The finiteness of the noun-clause	322
The presence or absence of SUBJECT in the noun-clause	323
The fronting of SUBJECT	324
QUESTION-fronting	325
The use of <i>so</i>	326
The use of <i>as</i>	327
The transitivity function of the noun-clause	328
Extraposition	328
5.5. Fronting and discontinuity	329
5.5.1. COMPLEMENT-fronting	330
The matrix-clause: features determining structures	330
The noun-clause: structures determining features	332
5.5.2. SUBJECT-fronting	333
The matrix-clause	333
The noun-clause	337
Recursive SUBJECT-fronting	338
5.5.3. QUESTION-fronting	341
The matrix-clause	341
[wh, independent] matrix-clauses	342
[wh, dependent] matrix-clauses	344
[Alternative] matrix-clauses	345
The noun-clause	346
Recursive QUESTION-fronting	348
5.6. The selection of the lexical predicate	350
The lexical predicate	350
Restrictions imposed by the construction-sets	350
Restrictions imposed by the matrix-clause's transitivity	352
Restrictions imposed by the verb- and adjective-classes	353
5.7. An example	354

Appendix. Classes of verbs and adjectives	369
I. Adjectives	369
II. Verbs	369
Bibliography	373
General index	377
Index of words	381
Index of functions	383
Index of features	385
