

Contents

I	Epistemology and Knowledge in Control	4
1	The Knowledge Base: Law, Model, System or Theory	5
1.1	Introduction	5
1.2	Definitions	5
1.2.1	Plan and Planning	6
1.2.2	Knowledge Base	6
1.3	Knowledge Base and Epistemological Categories	7
1.3.1	Law and Knowledge Base	7
1.3.2	Model and Knowledge Base	8
1.3.3	The Plan as a Feedback Regulated System	9
1.3.4	Theory Aspect of the Knowledge Base	15
1.4	Conclusion	17
2	A Fuzzy Logic Parking Decision Support System	19
2.1	Introduction	19
2.2	Feedback Regulated System	21
2.3	Fuzzy Logic Solution	22
2.3.1	Knowledge Base	23
2.3.2	Membership Functions	24
2.3.3	Fuzzy Inference	26
2.4	System Implementation	30
2.5	Conclusion	31
II	Legal Knowledge Processing	33
3	Expert Systems in Law And Hypertext	35
3.1	Introduction	35
3.2	Legal Expert System	35
3.2.1	Definition of Expert System by Architecture	35
3.2.2	Definition of the Legal Expert System	35
3.2.3	Selecting Case Related Knowledge from General Prescriptions	36
3.2.4	Knowledge Representation of Legal Expert Systems that Process Prescriptions	36
3.3	Hypertext System	41
3.3.1	Hypermedia and Hypertext	41
3.3.2	Components of Hypertext Systems	41
3.3.3	Browsing as Means of Retrieval	43
3.4	Conclusion	44

4	Improving Access to Legal Information	45
4.1	Introduction	45
4.2	Using JURIS as a Platform for Hypertext Systems	45
4.2.1	Relevant Legal Information in JURIS	46
4.2.2	Elementary Units of Legal Text in JURIS	46
4.2.3	Most Promising Selection Criteria	47
4.3	Interfacing JURIS and Knowledge Based System	49
4.3.1	Architecture of JURISFLEX	49
4.3.2	From Document Database Retrieval to Browsing a Hypertext	50
4.3.3	Systems Behaviour	51
4.4	Conclusion	52
III	Integrated Knowledge Processing for Public Administration	54
5	Contextuation	55
5.1	Relevance of Contextuation to Various Domains	55
5.1.1	Introduction	55
5.1.2	Fields related to Urban Planning	55
5.1.3	Relevance of Contextuation to Urban Planning	58
5.2	Properties of the Context	61
5.2.1	Graph Characterization of Context	62
5.2.2	Ubiquitous Presence of Context	64
5.2.3	Subsidiary Character of Contextuation	65
5.2.4	Time and Future Orientation of Context: Direction	65
5.2.5	Importance of the Immediate Context	69
5.2.6	Complexity involves Contextuation	70
5.2.7	Internal and External Contextuation	73
5.3	Context Sensitive Knowledge Processing	75
5.3.1	Introduction	75
5.3.2	Representation	76
5.3.3	Context Sensitive Hypertext Browser	79
5.3.4	Context Sensitive Interpreter	81
5.3.5	Hypertext Types and Contextuation	83
5.3.6	Vague Knowledge and Contextuation	85
5.3.7	Conclusion	88
6	Knowledge Base Conversion and Case Management	89
6.1	Introduction	89
6.2	Definitions	89
6.3	Standards of Knowledge Representation	91
6.3.1	Table-of-Contents Form of the Scientific Book	92
6.3.2	Executable Rules in Definite Horn-Form	93
6.3.3	Table Format of Relational Databases	94
6.4	Conversion Example	94
6.5	Conclusion	95

7	Knowledge Base Processing in the Planning Administration	97
7.1	Introduction	97
7.2	Categories of Administrative Action	97
7.2.1	Information Retrieval	98
7.2.2	Subsumtion	98
7.2.3	Communicative Action	98
7.3	Categories of Information Systems	99
7.3.1	Word Processor	99
7.3.2	Document Database	100
7.3.3	Relational Database	101
7.3.4	Knowledge Based System	101
7.4	Creation of a Consented Plan by Decontextuation	102
7.5	Conclusion	105
IV	Towards Behaviour Oriented Simulation	106
8	Knowledge Based Route Selection in Public Transport	107
8.1	Introduction	108
8.2	Representation of Public Transport Facilities	110
8.2.1	Design Decisions	110
8.2.2	Description of Representation	111
8.2.3	Knowledge in the Representation of the Network	111
8.3	Knowledge Based Route Selection	114
8.3.1	Definitions	114
8.3.2	Behaviours of Route Choice	114
8.3.3	Combination of Behaviours	125
8.4	Conclusion	127
9	Viewing a Prolog Program as Hypertext	129
9.1	Introduction	129
9.2	Prolog Programs as Hypertext	130
9.2.1	Nodes	130
9.2.2	Links	130
9.2.3	Chunks of Text	131
9.3	Browsing the Prolog Code of NADOLL	131
9.3.1	Setup	132
9.3.2	Browsing OR-Cases	134
9.3.3	Zooming In	134
9.3.4	Hypertext of nextClosestNeighbourStop	135
9.3.5	Loading Further Modules	135
9.4	Conclusion	136
10	Conclusion	137
V	Appendix	141
A	Example: Knowledge Based Planning using Contextuation	143
A.1	§33 German Housing Law	143
A.1.1	Outline of Commentary Text for two Rules	143

A.1.2	Example Knowledge Base of the Legal Consensus	143
A.2	Construction of a First View / Proposal	144
A.3	Spotting the Candidate Concepts for Contextual Reserve	149
A.3.1	Claim of Miller for OR-Cases to come	150
A.3.2	Smith opposes Miller's Claim without specifying an Alternative	150
A.3.3	Claim of Miller for OR-Cases to come	151
A.3.4	Smith opposes Miller's second Claim without specifying an Alternative	153
A.4	Introduction of the OR-Cases / Contextuation	155
A.4.1	Contextuation of 'client fulfils conditions of §33'	155
A.4.2	Contextuation of 'quality of suitable building estate is established'	161
A.5	Consultations and Browsing	166
A.5.1	Inference Engine 'p': Context-independent Consultation	166
A.5.2	Context-sensitive Browsing of the 'Miller'-Rules	167
A.5.3	Context-sensitive Browsing of the 'Smith'-Rules	169
A.5.4	Inference Engine 'pd': Context-dependent Consultation	170
A.5.5	Storing a Case in RDBS-Format: 'Miller / quality of suitable building estate is established'	173
A.5.6	Storing a Case in RDBS-Format: 'Smith / client fulfils conditions of §33'	175
