

Contents

Chapter 1. Introduction	1
Chapter 2. Bulk conformal geometry and extension problems	7
2.1. Riemannian conventions	7
2.2. Conformal and almost Riemannian geometry	7
2.3. Extension problems	9
2.4. The generalised divergence extension problem	9
2.5. Conformal tractor calculus	12
2.6. The calculus of scale	14
2.7. The Laplace–Robin solution generating algebra	15
2.8. Product solutions	16
Chapter 3. Tractor exterior calculus	23
3.1. Algebra of invariant operators	25
3.2. Algebra of differential splitting operators	30
3.3. Conformally invariant equations and the cohomology of the Thomas D -operator	34
Chapter 4. The exterior calculus of scale	43
4.1. Poincaré–Einstein structures	44
4.2. Boundary tractors	46
4.3. Boundary conditions for tractor forms	50
4.4. Holographic boundary projectors	54
Chapter 5. Higher form Proca equations	59
5.1. Solution generating operators for differential forms	63
5.2. The product solution	72
5.3. Solutions in Graham–Lee normal form	75
Chapter 6. Obstructions, detours, gauge operators and Q -curvature	77
6.1. Detour and gauge operators	78
6.2. True forms	80
6.3. Fundamental holographic identities	81
Appendix A. The ambient manifold	87
Appendix B. List of common symbols	91
Bibliography	93
