

CONTENTS—VOLUME I

	PAGE
PREFACE	
CHAPTER 1. INTRODUCTION	1
1.1 Probability and Statistics	1
1.2 Observed Frequencies and Histograms	3
1.3 Probability Models	11
1.4 Expected Frequencies	19
CHAPTER 2. EQUI-PROBABLE OUTCOMES	23
2.1 Combinatorial Symbols	23
2.2 Random Sampling Without Replacement	31
2.3 The Hypergeometric Distribution	38
2.4 Random Sampling With Replacement	44
2.5 The Binomial Distribution	51
*2.6 The Theory of Runs	56
*2.7 Symmetric Random Walks	58
CHAPTER 3. THE CALCULUS OF PROBABILITY	65
3.1 Unions and Intersections of Events	65
3.2 Independent Experiments and Product Models	73
3.3 Independent Events	79
3.4 Conditional Probability	84
3.5 Bayes's Theorem	91
*3.6 Union of n Events	99
Review Problems	105
CHAPTER 4. DISCRETE VARIATES	108
4.1 Definitions and Notation	108
4.2 Waiting Times in Bernoulli Trials	118
4.3 The Poisson Distribution	123
4.4 Random Events in Time and Space	127
4.5 Bivariate Distributions	132
4.6 The Multinomial Distribution	143
Review Problems	148
CHAPTER 5. MEAN AND VARIANCE	151
5.1 Mathematical Expectation	151
5.2 Moments; the Mean and Variance	160
5.3 Some Examples	167
5.4 Variance of a Sum; Covariance and Correlation	171
*5.5 Indicator Variables	181
*5.6 Conditional Expectation	186
Review Problems	191
CHAPTER 6. CONTINUOUS VARIATES	193
6.1 Definitions and Notation	193
6.2 Uniform and Exponential Distributions	204
*6.3 Transformations Based on the Probability Integral	209
*6.4 Lifetime Distributions	214
*6.5 Waiting Times in a Poisson Process	219
6.6 The Normal Distribution	225
6.7 The Central Limit Theorem	234
6.8 Some Normal Approximations	240
6.9 The χ^2 , F , and t Distributions	247
Review Problems	258

CHAPTER 7.	BIVARIATE CONTINUOUS DISTRIBUTIONS	262
7.1	Definitions and Notation	262
7.2	Change of Variables	271
7.3	Transformations of Normal Variates	281
*7.4	The Bivariate Normal Distribution	286
*7.5	Conditional Distributions and Regression	290
CHAPTER 8.	GENERATING FUNCTIONS	296
*8.1	Preliminary Results	296
*8.2	Probability Generating Functions	300
*8.3	Moment and Cumulant Generating Functions	309
*8.4	Applications	315
*8.5	Bivariate Generating Functions	320
APPENDIX A.	ANSWERS TO SELECTED PROBLEMS	326
APPENDIX B.	TABLES	332
TABLES	B1,B2 Standardized Normal Distribution	332
TABLE	B3 Student's (t) Distribution	334
TABLE	B4 Chi-square (χ^2) Distribution	335
TABLE	B5 Variance Ratio (F) Distribution	337
INDEX TO VOLUME I		339
